A LETTER FROM THE DEAN

Dear Alumni:

I wish to add my approval to that of those who have in recent years urged that the alumni of the College publish a periodical. We at the College have a tendency to overlook the fact that you who are not directly connected with the activities of the institution are unable to follow the many important events that take place. Similarly, what you are doing in your practice, in your medical society connections, in all of the important relationships which you enjoy, is of interest to every other graduate. The Alumni Quarterly gives opportunity for this exchange of information.

For example, one of your number was recently elected president of an important state medical society. Probably many other alumni are in such positions and have not made it known to their old college friends. Within the last month, one of your number was responsible for securing a very valuable home for the Academy of Medicine in a large Eastern city. Another for many years has been secretary of the medical examining board of one of the important Western states. One distinguished alumnus of the College is now taking leadership in building a large hospital in one of the major cities of America.

The Alumni Quarterly can serve as a forum for the exchange of ideas among all of us. Recent activities of the College may not be fully appreciated by some of the alumni. It may not have occurred to you that beginning in September of this year your Alma Mater will be established in its new home in one of the finest locations of New York City. Its hospital will accommodate over four hundred patients, and the new college building connected with the hospital will be modern in every respect. These are but a few of the reasons why I should like to congratulate the officers of the Alumni Association and all of you who are to be privileged in having available an alumni publication devoted to the interests and activities of the entire College family.

In the near future it is hoped that the Alumni Quarterly will furnish opportunity to tell you of the plans which the old college has for carrying forward medical service to the public in keeping with the best thought of our time.

The new college building will be ready for occupancy about September first. In the meantime, those of you who are to be in New York during the summer months will be welcome to visit the new plant and see for yourselves the progress that is being made.

With best wishes for the success of the Alumni Quarterly, and with cordial greetings to all of you, I am

Sincerely yours,

CLAUDE A. BURRETT, M.D.
Dean

An Analysis of Replies to a Questionnaire

JOHN E. TRITSCH, '18, President

With the idea in mind of obtaining information as to the manner in which alumni associations of other medical schools function, the President of our Association sent a questionnaire to the Alumni Associations of every medical school in the United States, a total of sixty-five. This number excluded those which gave a partial (two year) course. From these sixty-five we were fortunate enough to receive forty-one replies.

Of the forty-one replies, five came from independent medical colleges, (i.e. those not connected with universities) and thirty-six were university schools of medicine. All of the independent colleges had alumni associations. Only two of the university schools had no alumni association, one was in the process of formation; thirteen had no separate medical alumni association. Consequently, nineteen of the university schools of medicine and five independent colleges had medical alumni associations.

We shall consider the replies under the natural headings given in the original questionnaire.

1. Membership.

Twenty associations have only one type of membership. Ten have additional forms, such as life, honorary, and associate.

In seven, no dues are levied. Of the 24 charging dues, the average is two dollars per year, and range from one to five dollars. Solicitation of funds in one way or another forms an adjuvant means of revenue in about one half of those replying to the questionnaire.

2. Meetings.

Annual meetings are held in practically all instances, supplemented by one to four social functions. Regional meetings are scheduled in twelve.

3. Organization.

Nearly all elect officers on an annual basis. Closer contact is maintained, in fifty per cent of those replying, by the medium of class secretaries.

4. Publication.

There were thirty-two responses to this question. Of these, twenty-one have their own publication and three have space in their regular University Alumni Bulletins.

Frequency of issue;-

Annually	1	Nine times	2
Twice a yr.	4	Ten times	3
Quarterly	7	Monthly	2
Five times	1	Fortnightly	1
Eight times	1		

These are financed in the following manner.

From Treasury	11
By college	5
Subscription and ads	2
Treasury and college	1
Subscription, ads and Treasury	1
Subscription and loyalty fund	1
Dues	7
Gifts	2

5. Relationship of Alumni Association to the Administration of the Medical Schools.

No relationship	15
Definite relationship	11
Loose relationship	5
Did not answer.	10

In this connection it may be interesting to note that of these, sixteen contributed to school projects and various undergraduate activities.

6. Alumni Benefits.

Twenty-three alumni organizations make no provision for needy members, while seven give aid in some way.

We wish to thank the alumni associations of the various medical colleges for their cooperation in responding to our questionnaire.

Alumni Day - 1938

Alumni day 1938 was held on June 3rd, and was eminently successful from the point of view of program, as well as attendance. Over 250 members were registered, which is well above the usual number.

The morning was spent at the Flower-Fifth Avenue Hospital, where the numerous scientific programs were held. The meeting then adjourned to the hospital roof, for an open air buffet luncheon which everyone thoroughly enjoyed.

There followed a short meeting in the Nurses' Reception Room at which a few business problems were discussed and the election of new officers were announced. Then on to the grand ballroom of the Waldorf Astoria Hotel and the graduation exercises, where 60 seniors received their diplomas.

The full day was climaxed by the banquet held in the Sert Room of the Waldorf, where in addition to an excellent dinner and some very fine speakers, the committee had obtained a number of unusually amusing entertainers.

"He Who Lingers Is Lost"

An Alumni Association, as well as any other organization is useless without members. We realize that most graduates of the college are *good loyal* alumni but why not be *active* members of your Alumni Association? Remember that the strength and policies of any organization depend upon the quantity as well as the quality of its membership. We urge, therefore, that every graduate of the past and those of the future keep in close contact with the activities of your Alma Mater. Avail yourself of this opportunity by filling in the enclosed application blank immediately and become an active member of your Alumni Association.

The Faculty Club of the Student-Faculty Bowling League defeated the Senior Class Club in the last play-off game and become champions of the League.

The Faculty Club have remained undefeated for the past four or five years in their play-off games against student teams.

Equipping the New College Building

SAMUEL B. MOORE, '01

Seventy-five years is a lengthy period in the history of any institution. Our college has passed through numerous times of stress, and occasionally seemed likely to falter in its course. We have instituted several of the forward movements in medical education, and while handicapped with outmoded buildings, have given our students a noteworthy education. Within the last four years we have acquired a modern hospital for our patients, and have now practically completed a splendid new college building adjoining the Flower-Fifth Avenue Hospital, where laboratory, didactic, and clinical teaching will be conducted in accord with most modern ideas.

Some of the equipment can be salvaged from our present institution, but for the most part, entirely new furnishings will be essential. Through the interest of the Trustees, the building has been carefully financed, so that all debts incurred by new construction can be amortized in a few years. The builders have exercised meticulous care in carrying out their program within the estimated costs.

The faculty have undertaken the matter of outfitting the College, and to that end have appointed a committee to obtain the necessary funds. Your committee therefore bespeaks a generous response on your part, so that this eminently practical portion of the program may go forward.

We urge you to send in checks payable to the New York Medical College and Flower Hospital, which may be dedicated for use in the various laboratories, or departments, or may be dedicated as memorials by individual department heads. It would likewise be appreciated if you would interest your friends in the project, or if you prefer, give their names to us for personal interviews. Promptness in your contributions will be a source of great encouragement.

FREE CHOICE

HORACE E. AYERS, '09

Just at a time when legislators are advancing their bills in Assemblies and Senates of the various states, and this applies also to our national representatives in Congress and Senate, it is the duty of the 140,000 doctors in these United States to guard against any legislation that would hamper the right of any citizen to choose his own doctor.

This is the one plank in the platform of the New York State Workmens Compensation Law which stabilized the economic problem for the doctor who treats injured workers. This plank or keystone of the arch is termed FREE CHOICE and it must in all legislation where medical practice is concerned, be boldly written in the Preamble. Without this the doctor would soon find himself economically stranded, to say nothing of breaking down the traditional intimate relationship between the doctor and patient and eventually the destruction of the principle of "Free Enterprise."

The Workmens Compensation Law of N. Y. State was ammended by the Legislature in 1935, which among other things included the Magna Charta of the whole law, namely, Free Choice of a doctor by the injured worker. In order to have this amendment effective it also called for setting up proper machinery to insure its effectiveness, such as designation of doctors to do this work according to their fitness; and let it be said this part of the labor has been well done. In so far as *our alumni are concerned, not one doctor has been summoned before the Industrial Council for violation of any section of the Amendment during the past four years.* Our College Alumni can look with pride at such a record.

The function of an alumni organization is to keep graduates in closer contact with their Alma Mater, as well as with each other. With this in mind, we believe that a publication of some type is essential.

We therefore present to you the first issue of the ALUMNI QUARTERLY to acquaint you with the progress of our college and the activities of our fellows throughout the country. We hope the idea will meet with your approval.

The success of our venture will largely depend in maintaining a broad outlook on alumni affairs. In consideration of this, our policy will be to give as much leeway as possible to those members who may wish to express their opinion concerning matters pertaining to our organization.

Cooperation will be necessary, and we are asking your help in stimulating an alumni spirit, by sending us timely notes about your confreres or yourself, letters of criticism, suggestions, or any other material which may be of interest.

The New York Medical College Orchestra has just been organized. 12 to 15 members hold rehearsals on Wednesday evenings at 8 p.m. in the college building. Any member of the faculty or any alumnus is urged to attend.

The All College Dinner

There is no more important step forward in life of a medical college than to obtain modern quarters for its teaching and scientific programs. Thus, to celebrate the erection of a new building for the New York Medical College at 106th Street at Fifth Avenue, a dinner was held on February 23rd, 1939 in the main ballroom of the Hotel Plaza in New York City.

Included in an attendance of nearly five hundred were members of the hospital staff, the faculty, nursing staff, students, and numerous friends of the college and hospital.

The dinner committee, headed by Dr. John S. Herrlin, Jr., '23 arranged an entertaining program of dinner music and an excellent vocalist. Addresses in honor of the occasion were made by Dean Claude A. Burrett and Mr. Charles D. Halsey, the president of the board of trustees.

College Scientific Bulletin

One year ago the first number of the scientific bulletin of the College and Hospitals appeared. This quarterly journal proved an immediate success which is attested by a circulation of approximately 1,200 numbers. Thirty-six articles totalling 284 pages comprised Volume I. Every important medical library in the United States and many foreign libraries have become subscribers. The titles of bulletin papers are included in the Quarterly Cumulative Index Medicus.

The bulletin represents an exceedingly significant phase of the College educational program. Through it the institution has made important contributions to medical literature; it has stimulated research; it has been responsible for the development of many friendships in kindred institutions and has constituted a precedent for several others. The second volume will begin with the April 1939 issue.

Died August 3rd, 1938, of heart disease.
- Henry C. Smith, class of 1874
Died June 6th, 1938, at the age of 85, following an operation.
- Samuel H. Vehslage, class of 1879
Died June 19th, 1938, at the age of 89
- Harry S. Willard, class of 1896
Died December 11, 1938, at the age of 62, of heart disease.

THE MEDICAL STUDENTS LEAGUE

WILLIAM W. WOOD, M.S., B.D., Director

The Medical Students' Club (the "Y") has taken a long stride during the current academic year. This primarily may be attributed to the fact that on June last, the college set aside space for the club within its dormitory. A reception room, kitchenette, an auxiliary room, and a lounge make for a splendid combination; such an arrangement adds genuinely to the college spirit.

The governing body is made up of the Advisory Board, of which Milton J. Wilson '18 is chairman, and the under-

graduate Committee, headed by Stuart Phelps Barden '40.

Daily some 120-140 students make use of the recreation facilities; in addition to these impromptu sessions, the Club sponsors an inter-medical school basket-ball league, fencing class for beginners, an inter class-faculty bowling league, and inter-community (medical and otherwise) ping-pong contests. Plenty of action and fun here!

In the cultural avenues, art and music hold sway. During the winter months,

through the kindness of Mr. T. A. Merwin, recorded concerts brought to us the great masterpieces. Instruction accompanied. On April 17th, the Second Annual Art exhibit will open, continuing through Sunday April 23rd when a tea and musical will be given. Dr. Philipp G. R. Schmahl, '11 is the chairman of the committee. Mrs. Elaine Cahee Murphy '40, is in charge of the student teas. The Alumni and Hahnemann dances were well attended and thoroughly enjoyed.

The Counselor luncheons sponsored by the Faculty Activities Committee, bring together bi-monthly the student groups with their respective faculty advisors; academic as well as personal issues are considered a part of this friendly exchange.

An employment bureau is in the process of the making. The support of the alumni is earnestly hoped for in this new venture.

It is quite natural to assume the more a part of his community an undergraduate finds himself, the better alumnus he will become.

PERSONALS

George F. Raynor, '00, has recently recovered from a very severe illness.

Joseph H. Fobes, '01, presented an unusual case of Fibrolipoma of the Cecum before the Section of Surgery of the New York Academy of Medicine, Dr. Fobes is a Founder Diplomate of the American Board of Surgery.

Louis Rene Kaufman, '04 and Donald E. Brace, '14, presented a case of Atelectasis before the Section of Surgery of the New York Academy of Medicine.

Sprague Carleton, '06, addressed the William Harvey Society of Tufts Medical College in their annual lecture. The title of his address was "A Thirty Year History of Urology".

George H. Ding, '06, is president of the Kings County Homeopathic Society. This society is functioning successfully in a financial and fraternal way under his pleasant leadership.

Horace E. Ayers, '09, is on the Committee on Membership of the Medical Society of the County of New York. He is also a member of the Industrial Council of the New York State Department of Labor.

Philipp J. R. Schmahl, '11, was elected a Fellow of the American College of Physicians. Dr. Schmahl is also a Diplomate of the American Board of Internal Medicine.

Dr. Brace, '14, discussed a paper by Dr. Lincoln Sise, Director of Anaesthesia, Lahey Clinic, Boston. The subject was "The Opportunities in "Anaesthesia" presented to The American Society of Anaesthetists meeting in Philadelphia.

John E. Tritsch, '18, is on the Committee on Medical Economics of the Medical Society of the County of New York.

George H. van Gilluwe, '18, was recently appointed Director of Anaesthesia at St. Vincent's Hospital, New York City.

Thomas R. Thorburn, '18, of New York City has been appointed as examiner in physiology on the New York State Board of Medical Examiners. Milton J. Raisbeck, '16, has been on the same board for several years as examiner in chemistry.

Irwin M. Stillman, '18, associate attending in Medicine at Coney Island Hospital and at Harbor Hospital, is leaving for New Orleans to attend the annual convention of the American College of Physicians, at which time he will take the practical examination of the American Board of Internal Medicine.

Theodore A. Jost, '19, has been appointed Health Commissioner of Mount Vernon, New York.

Frances Kardons, '21, of Brooklyn was critically ill for many months but has now fully recovered.

Robert P. Samworth, '22, addressed the Section on Physical Therapy of the Kings County Medical Society on "Physical Therapy in Traumatic Conditions".

Harry D. Leinoff, '27, has passed the written examination of the American Board of Internal Medicine.

Max Seide, '27, was superintendent of Coney Island Hospital for many years and befriended many of our alumni who interned at that institution. Dr. Seide is now Superintendent of Cumberland St. Hospital.

Herman Charache, '29, of Brooklyn is a prolific writer of articles on cancer, particularly on its clinical phases.

George A. Bochow, '30, of Mount Vernon recently returned from a two weeks stay in Haiti, visiting the hospital and medical school in Port au Prince during his travels. Owing to the squalor and poverty there, public health conditions are deplorable, he writes. Natives regard the hospital as a place to die, and therefore receive treatment at 22 medical stations set up in various communities.

Rebecca Liswood, '30 assistant pediatrician at Sea View Hospital, is heard frequently in radio talks on child health.

We extend our condolences to Henry W. Eisfelder, '31, of Queens in the recent loss of his daughter.

Angelo S. D'Eloia, '31, has just established himself in the practice of Radiology in Yonkers, New York.

Ricardo L. Gorbea, '32, and Mrs. Gorbea are expecting a new arrival in June.

The class of 1933 is holding its annual class reunion on March 30, at 8:30 p.m., at N. T. G's. Boulevard Night Club. A large turnout is expected. (*We hope to see more class reunions according to the example set annually by '33.* Ed.)

Frank J. Borrelli, '33, has been appointed Radiologist at Gotham Hospital, New York.

Frank E. Fierro, '33, and Mrs. Fierro are happily awaiting the arrival of a stork sometime in the early fall.

Floyd D. Gindhart, '33, has removed his offices to West 42nd Street, confining his work entirely to compensation cases.

Dominick A. Zurlo, '34, now practicing in Glens Falls, New York, is expecting a blessed event almost anytime now.

Roy E. Wallace, '34, after completing an internship at Genesee Hospital, has established himself in practice in Seneca Falls, New York. He is on the staff of the Seneca Falls Hospital.

William H. Merrit, '34, is at Montefiore Hospital completing his second year in the Graduate Course in Radiology offered by the Graduate School of the University of Pennsylvania Medical College.

C. Michael Witzberger, '34, after completing a Fellowship in Pediatrics at New York Medical College and a Post-Graduate course in Pediatrics at Harvard Medical School, is now a full-time Instructor in Pediatrics at New York Medical College.

Morris E. Greenberg, '34, is now in general practice in Brooklyn near the Williamsburgh Housing Project and has an appointment in medicine at Greenpoint Hospital. He writes us that for those contemplating a location adjacent

to Housing Projects, one can expect a large volume of practice from the very start although a large part would be from the relatively lower income brackets.

Jerome Leon, '34, is assistant superintendent of the Sea View Tuberculosis Hospital on Staten Island.

Nathan O. Sara, '34, of Brooklyn expects a family addition in October.

Abraham Rosenthal, '34, has completed a residency in pathology at Metropolitan Hospital and a residency in surgery at St. Raphael's Hospital in New Haven and is now practicing in Brooklyn. He is a member of The Doctor's Musical Society Orchestra.

Lawrence E. Viola, '34, is Resident in obstetrics and gynecology at Metropolitan Hospital.

Beryl Rosenberg, '34, of Queens and Brooklyn has recently become the proud father of a bouncing baby girl.

Samuel Restifo, '35, is now practicing in General Surgery in Cleveland, Ohio,

George J. Irvin, Jr., '35, has also located in Cleveland, Ohio, practicing in gynecology and obstetrics.

Arthur V. Graham, '35, is practicing in Brooklyn and is also connected with the General Insurance Company.

Sander V. Smith, '35, was recently appointed Deputy Superintendent in charge of the Metropolitan Hospital Clinic on 88th Street.

Sidney A. Beckwith, '35, who interned at St. John's Riverside Hospital in Yonkers, has been a member of the medical staff of the Grenfell Mission, Labrador, for over a year.

O. J. Fronek, '36, is Senior Resident in Surgery at Huron Road Hospital, Cleveland and is opening his offices in Cleveland this July for the practice of General Surgery.

Chester Heimlich, '36, is located in Attica, Ohio, practicing general medicine. Dr. and Mrs. Heimlich are the proud parents of a baby boy born August, 1938.

Elizabeth Cannon, '36, is now in Cleveland practicing Internal Medicine and Obstetrics.

Harry Barr, Jr., '36, is practicing in Cleveland associated with his father. Dr. Barr was married to Miss Sally Brady January 1, 1939.

Joseph A. Pietrafese, '36, will be Chief Resident in Gynecology and Obstetrics at Huron Road Hospital, Cleveland, for the year 1939-40.

Edward Loizeaux, '36, is now physician in charge at a CCC camp in Lillington, North Carolina. Dr. Loizeaux recently married Miss Anne Jahelka.

Edward Calhoun, '36, now Resident in Surgery at Flower-Fifth Avenue Hospital has been appointed Chief Resident and Resident in Surgery dating from July, 1939. Dr. Calhoun recently married Miss Camilla Davis.

M. Virginia Boschen, '36, is practicing in Dobbs Ferry, New York.

Viola Fleischmann, '36, is serving a residency at Willard Parker Hospital for Contagious Diseases, New York City.

F. Everett Gaillard, '36, after completing a two year internship in medicine at New York Post-Graduate Hospital and Medical college, will be associated with Dr. Spain of New York City. Dr. Gaillard's wedding to the former Miss Edith Pearce of New York City took place recently.

Paul Ingrassia, '36, is practicing in Nanuet, New York. Dr. Ingrassia and Miss Levec were recently married.

Edward Kiefer, '37, at present Resident in Medicine at Huron Road Hospital, Cleveland, Ohio, will open his office in Springfield, Ohio, in August, 1939. Dr. and Mrs. Kiefer are the proud parents of a son born in January, 1939.

Edward Rohmer, '37, has been appointed Resident in Surgery at Metropolitan Hospital, New York City, dating from July, 1939.

John Burrett, '37, at present Resident in Medicine at Flower and Fifth Avenue Hospitals will study in physiology with

Dr. Cannon of Harvard during the coming academic year. This will be followed with studies in Cardiology with Dr. Paul White.

Philip Zoller, '37, will serve a two year Surgical Residency at the New York Post-Graduate Medical School and Hospital.

William Heeve, '37, has enrolled for the three year Post-Graduate Course in Surgery at the Graduate Medical School of the University of Pennsylvania.

John Annito, '37, after a year's internship at Christ's Hospital in Jersey City is now completing his first and basic science year in Obstetrics and Gynecology at the Graduate Medical School of the University of Pennsylvania.

Thomas F. Lynch, '37, has been appointed to the residency at St. Elizabeth's Hospital, New York City.

Nicholas Novalis, '37, now completing his senior internship at Flower and Fifth Avenue Hospitals will open his offices on Central Park West.

Charles Tramont, '37, is doing general practice in Mount Vernon, Ohio.

James Dodge, '37, has located in Trenton, New Jersey, for general practice.

R. Roberts, '38, now interning at Huron Road Hospital, Cleveland, has accepted an appointment as Resident of the Auburn City Hospital, Auburn, New York, dating from July, 1939.
