LOW TOXICITY AND HIGH ANTIBACTERIAL ACTIVITY OF SULFONAMIDE COMBINATIONS

Despite the dramatic success of penicillin and streptomycin, it has become increasingly evident that the "sulfa drugs" will continue to play an important role in the therapy of many bacterial infections. The reasons are readily apparent. The effectiveness of penicillin is limited to gram positive strains except for the gonococcus and meningococcus. Furthermore, in most acute bacterial infections, penicillin is not more effective than the sulfonamides; it is definitely inferior to the latter drugs in meningococcal meningitis. The high hopes put into streptomycin on the basis of its effectiveness against gram negative strains have not materialized because of two major drawbacks, namely, the puzzling rapidity with which many bacteria acquire complete resistance to this antibiotic and the relative frequency of serious and apparently permanent damage to the eighth cranial nerve. Moreover, patients under intensive therapy with penicillin or streptomycin may develop "superinfections" with pathogens not sensitive to these agents. This fact challenges the wisdom of using either antibiotic alone in serious acute bacterial infections, and points to the use of combined therapy with sulfonamides and antibiotics as the best protection against such dangers.

Unfortunately, the sulfonamides most widely used today share the tendency to injure the kidneys through intratubular deposition of crystals from supersaturated solutions. The risk of renal complications may be reduced with some sulfonamide compounds by giving alkaline adjuvants and by maintaining diuresis.

For the last eight years, Dr. David Lehr of the Department of Pharmacology, has been actively engaged in animal experimental and clinical studies on the prevention of renal complications from sulfonamides. These investigations finally led to a simpler and far more effective means of preventing kidney damage, consisting in the use of mixtures of several sulfonamides in partial dosage instead of any one single compound in full dosage as used heretofore. This new form of therapy was introduced at the Flower and Fifth Avenue Hospitals and at the Metropolitan Hospital on Welfare Island in 1944.

The principle of therapy with sulfa drug mixtures emerged from the observation that the sulfonamide compounds do not affect the solubility of one another but dissolve independently. In other words, a saturated solution of any one sulfa drug could still be further fully satu-

THE FRESHMAN CLASS

The 90th session of the New York Medical College opened on Monday, September 20th, 1948. The total number of applications received ran slightly over 2,300. The new freshman class numbers 124, of which 21 are women. Each one of the 2,300 applicants were interviewed. No favoritism was shown, and each one had a fair chance to demonstrate their achievements for admission.

rated with one or more sulfonamides of different molecular structure. The therapeutic significance of this principle lies in the fact that the antibacterial activity of mixtures—for example, sulfathiazole, sulfadiazine and sulfamerazine, which do not differ widely in their bacterial spectrum—corresponds largely to the total content of free sulfonamide. Thus, by employing combinations of partial dosages, it becomes possible to attain excellent therapeutic blood concentrations with the risk of crystaluria in proportion only to the amounts of the single drugs present. In other words, the danger of renal complications is only as great as if a single sulfonamide had been administered in one third the routine dosage.

In extensive animal experimental studies Dr. Lehr investigated the toxicity of various mixtures containing either two or three of the newer sulfa drugs such as sulfathiazole, sulfadiazine, sulfamerazine, sulfamethazine, sulfapyrazine and sulfacetimide. The mortality from combinations was strikingly low if compared to the values for any one single sulfonamide drug. Combinations of three sulfonamides proved significantly less toxic than combinations of two. Evidence derived from post mortem examination of albino rats and from chemical analyses of the blood, kidneys and urine, proved that the low toxicity of mixtures was due to the absence of crystalline deposition in the urinary tract.

Therapeutic studies with various sulfonamide combinations were carried out at the Departments of Medicine in collaboration with Drs. Morgenbesser and Svigals, and at the Department of Pediatrics in collaboration with Drs. Slobody, Greenberg, Willner and Abramson.

The therapeutic response to the combinations sulfathiazole-sulfadiazine, sulfadiazine-sulfamerazine, and sulfathiazole-sulfadiazine-sulfamerazine was highly satisfactory in most instances. Defervescence and clinical improvement seemed to occur with greater speed if compared to previous experience with any of the drugs administered separately. Crystaluria was infrequent and appeared almost eliminated with triple combinations, despite the intentional omission of adjuvant alkali therapy. No signs of renal irritation were observed at the routine dosage level. In addition, the incidence of allergic reactions was substantially lower than expected from previous experience with single sulfonamides. This was explained by "dilution" of individual sulfonamide concentrations in the tissues below the level necessary for the production of allergic reactions.

Experimental and clinical studies with various triple combinations are continuing.

MIDSUMMER NIGHTMARE

When three alumni are more or less involved, a story can rightfully be brought to the attention of our good Editor, especially when the tale or the situation is rather fantastic. So here goes, dear Dr. Fobes, hoping the destination is not wastebasket.

Perhaps a little editorial comment on my generally accepted veracity would go a good ways. I have told several friends of this adventure, and I didn't like the way they indulgently listened through the story, their faces set in that whimsically polite expression. They did not actually say it; "I am somewhat of a liar myself, but go ahead with your story". I am of the class of 1911, and perhaps reverence for my age saved me. Some years ago, a fish-story of Cape Hatteras was published in this bulletin, and perhaps that hasn't helped much to build up a reputation, though I can officially prove the shark weighed 298 pounds and was seven and a half feet long. What is the use, you can't live past three score without a little slip here and there, and as long as you lie gracefully and not too much, you are not expected to get your score card notarized after each round.

The personae dramatis are Dr. C. C. Salzman, '24 (deus ex machina to the rescue), his nephew: Dr. Paul Gold, '45 (active member of the crew), Mrs. Schmahl, (alumna by adoption) and yours truly P. J. R. (villain & perpetrator of the crime). The scene is laid in the Ridgewood Section of Long Island, not far from Queens Boulevard. There are two convenient adjoining cemeteries, skirting the Road, and the time is a little after midnight. There are no translucent apparitions floating about, still in my simple way I do believe some restless spirits roam the section and take it out on unsuspecting travelers. The fact is, it was raining too hard for any impish pranks, and any self-respecting ghost would stick to his comfortable, warm grave on a beastly night, like that of July 21-22. So all the blame rests with me. The newspaper reports of that night will refresh your memory on the cloudbursts, that particularly visited Long Island, flooded roadways and tunnels and raised just merry hell in the vicinity of New York.

Mrs. S. and I had been invited to a father and son birthday party. Please note that young Dr. Paul is the son, at least I have no knowledge that he is officially a father, and as his former faculty adviser I am a stickler about these proprieties. Besides, Paul's father was

there. We made merry plenty. When ready to adjourn, the rain came down in buckets. There was a slight lull shortly after midnight, and we took advantage to take a quick leave and scamper into my car. Paul Gold was to be dropped at Metropolitan Hospital, where he is resident in Obs. Babies come, rain or shine, but sometimes the accoucheur finds himself at odds with the elements. Dr. Gold did not get to the Metropolitan that night, he came close to not ever seeing these time honored halls again, where these little displaced persons pop into citizenship on a scale, that would make the U. N. weep.

At this particular time Paul was sitting to my right, Mrs. Schmahl in the rear of my good old amphibian cruiser Dodge. Visibility was bad, as we made our way toward the cemeteries. It wasn't just rain, it was a cloudburst. There is a little dip in the road that leads to Queen's Boulevard. I have driven through a little puddle there hundreds of times. We could dimly see two cars stalled in the "little puddle", and of course I was already getting bids from my two passengers to turn back. It is a curious thing, how old guys will get up their bravado, and tempt the fates, where less "matured" minds would tread with care. I just couldn't help showing off my prowess, and knowing well the shallow side of "the puddle", I drove in a pace or two. Amphibian or no, even a Dodge knows, when it's licked. The poor thing sputtered and coughed a few times and with a sigh, that floated out over the tombstones, gave up the ghost. To bolster up the morale of the parties of the second part, I smiled and laughed. There were no Murads handy, so I lighted a camel and was all set for a Lemac anticlimax. I was pleased to hear my brood chuckle and giggle until I too felt the cause of their merriment. Our feet were getting wet. Little squirts of water were coming up from nowhere in particular, and it was a matter of a minute or less, before we sat in water to our ankles. Dr. Gold doesn't smoke, so he couldn't readily be nonchalant. He whispered something to my wife, which I couldn't quite catch, but it sounded like "certain people should stick to medicine." At any rate I began to realize, that people, who live in automobiles, should have their cars caulked every season. That was the first minute. At the end of the second Paul and I were sitting comfortably in water up to our umbilicusses. Mrs. S. had retreated upward on the rear upholstery and was crouched against the rear window. By that time the smiles had faded. We couldn't see six inches in the driving rain and were unaware, what had become of the other car and its passengers. Again youth had

its innng of resoucefulness and good judgment. Paul said: "Doctor, don't you think I better get out and get some help." My bravado had evaporated into a residue of chills and misery. I heartily agreed with him. The stocks of Dodge had gone down, it seemed as if the bottom had dropped out of Dodge. "Dr. Pauli", as we call him, is a giant in Obs. and Gyn., a family trait, but in stature he just barely made the army. A shower slashed at us, when he opened the door; he managed to open his umbrella, but when he stepped off the running board, he was in a river nearly to his chin. We shall not forget the sight of Paul, umbrella lifted high above his head, his other hand busy pushing away floating logs, his chin lifted above the water level, walking, swimming into the inky blackness of the tombstone forest. He was kind enough to slam the door, but by this time, the car was a water tank, anyhow. I looked at my poor wife, perched up high in the rear of the car. And she looked at me. She didn't say "I told you so", she simply said, "O.K., where do we go from here?"—Let's go swimming! It sounded good, but it wasn't so funny. Mrs. S. can dive, but I asked her to let herself down, feet first into the rear basin. There was little time to lose, and I began to fear, that I shouldn't be able to force the door open. I was sitting in water up to my chest. Mrs. S. climbed down and over the seat, as I forced open the door, and out we went into the black whirlpool. We fought the logs, and drift wood bumping into our faces. The visibility was zero, the heavens had opened and just dumped a little ocean on us. We sensed, that we had to fight our way in the opposite direction, in which we had faced. All of this had happened within about four minutes.

The weaker sex—now I'll tell one. My wife must have been twenty yards ahead of me, I could no longer see her. I wasn't doing so well by myself. The shock of the first plunge had kind of softened the cement in the joints, I felt coming apart and the old pump rebelled at the speed of the propeller. It wasn't nice at all. I couldn't make an academic statement, whether it was swimming or floating or walking. I remember most of the little reserve I had left, was spent in fighting logs, which seemed to drift in from all directions.

We soon had footing, and after about two blocks progress, the water was only to our knees. As the rain let up a little, we realized that a lake had been born in these five minutes, which covered an area of five square blocks. This seems barely credible, but I saw on a subsequent day, how currents were hurled from

narrow ravines, that cut through the sides of the road. Drainage must have been completely choked. Ours was a curious, if not harrowing experience to encounter within the limits of the greater city of New York.

But the story must go on. Mrs. Schmahl came to a car, that had not stalled, but turned back. She hailed the driver and after some pleading persuaded him "to wait for my poor husband". He let us in his car, dripping as we were from head to foot. We got out once, at a Creamery, to telephone, wading knee deep in water. We sent an S. O. S. to Dr. Salzman. Like Noah's ark, our benefactor finally deposited us at a diner, on a knoll, high and dry. The dove, we sent out, was set to reach Dr. Salzman, and did. We kept in telephone communication. He made two futile attempts to reach us, but could not get through until the third.

And where was Paul?—After we had downed two cups of steaming coffee at the diner, we ventured to the door. The rain had eased, and at a distance we could just distinguish a figure with an umbrella at a little shanty about three blocks away. My whistle would not work, but Mrs. S. has a good singing voice, and after awhile coaxed Paul over with a sirene charm. As we looked down toward the lake, we saw no car, it was completely inundated. Good old Carl and his sturdy Cadillac reached us about two A.M. As we were huddled in the diner, three truckmen entered, drenched to the skin by the rain. They averred, that they had never been so rain-soaked. I looked at them with contempt and said: "brother you ain't heard nothin' yet," and told them our story. It is a nice story in retrospect, but boy, oh boy, it was tough going, while it lasted. Carl, who had twins waiting to be admitted to this nice, peaceful world at a Long Island Hospital, got us home by 2:30 A.M., still wet and shivering. Paul was picked up by a police car, and brought back to his home.

Mrs. S. had a pain in her chest, when we finally reached home, and I was afraid, that was "it". But a few drops of aconite in a hot toddy fixed us up—I guess—We seem to be better, than ever, at least that's the way old folks talk.
Post Script:

I have passed through the cemetery road since. I don't mind taking a licking, but I hate to have it rubbed in. It was a full moon night, and they say the sea and the graveyards get restless around that time, not to mention full term gravidae.

The tombstones were bathed in silver, or were they the tombstones, with their little urns

on top? Some did look like stately ghosts, and the harder I looked, the more lively they appeared, at least they seemed to get out of focus and in. Scotch wouldn't do that, Bourbon might. I heard a whisper and some snickers, as their heads bobbed and they went into a huddle:

"Rain, rain, please we pray,
 Soon come back another day,"
 So what! I should get mad and lose my temper!
 For spirits I have little use,
 Unless it's Scotch or some good booze.

PHILIPP J. R. SCHMAHL, '11

"GOLD RUSH" CARNIVAL

Submerged under the general hustle and bustle of College and Hospital activity, a busy group of students is hard at work on the 1948 Carnival to be held on November 5th, (Friday). They plan extravagant things for us that night—the great Wild West will move right into the Lobby and we're all invited to stake a claim, in subscription form, on the new '49 Fordor Ford. The "gold miners" (you'n me) who attend will relax and cavort in a real old time saloon, complete with swinging doors, can-can show and honky-tonk music. There'll be games of skill and chance with prizes worth many nuggets of gold. The Carnival Committee is rounding up enough to fill every saddlebag, and please every prospector's gal.

James E. Bowes, Chairman of the Student Loan Fund, and his committee, are trying to put the Carnival in the Big Time by doubling the \$11,000 already existing in the Fund.

REGISTRATION NURSING SCHOOL

Fifty-four new students were admitted to the School of Nursing, Monday, September 27, 1948 making the total enrollment to date 200.

The usual three day orientation program was arranged for these new students so that they could familiarize themselves with the physical facilities and general set up of the school in relation to the total institution.

The following students were registered:

Behl, Myra New York, N. Y.
 Bonomo, Marie Staten Island, N. Y.
 Castagnetti, Jean Staten Island, N. Y.
 Conover, Violette Englewood, N. J.
 Corizzo, Alice Newburg, New York
 Currie, Nancy Belleville, N. J.
 DiMitrio, Constance Long Island City, N. Y.
 Eberle, Roberta Dumont, N. J.
 Finney, Joan Rockaway Park, N. Y.

Gardella, Rita White Plains, N. Y.
 Gately, Miriam Hackensack, N. J.
 Gardner, Nancy Pleasantville, N. Y.
 Genovese, Rita College Point, N. Y.
 Grosse, Helga Flushing, N. Y.
 Hagen, Anne Goshen, N. Y.
 Hall, Singlea Lockport, N. Y.
 Herrmann, Rosemarie Hempstead, N. Y.
 Hill, Joan Brooklyn, N. Y.
 Holler, Buddy Bayside, N. Y.
 Hufnagel, Mildred Norwalk, Conn.
 Janson, Lorraine Rockville Centre, N. Y.
 Joinson, Dorothy Staten Island, N. Y.
 Jones, Eileen Kings Park, N. Y.
 Juisto, Josephine Port Chester, N. Y.
 Korbmacher, Charlotte Ramsey, N. J.
 Kurzhals, Doris Peekskill, N. Y.
 La Duca, Antoinette Long Island City, N. Y.
 Landecker, Patricia Pleasant Plains, S.I., N.Y.
 Larson, Rose New York, N. Y.
 Laurelli, Louise Peekskill, N. Y.
 Letterese, Nancy Bronx, N. Y.
 Lorenzut, Norma White Plains, N. Y.
 Lucas, Olga New York, N. Y.
 MacDonald, Ruth Port Washington, N. Y.
 McLoughlin, Ann White Plains, N. Y.
 Miller, Lucille Great Neck, N. Y.
 Mollé Marilyn Dumont, N. J.
 Myers, Evelyn Bronx, N. Y.
 Newsom, Susan Great Neck, N. Y.
 Quinn, Marjorie Bayside, N. Y.
 Reagan, Ann Peekskill, N. Y.
 Rodgers, Florence Tarrytown, N. Y.
 Sciortino, Rosemarie Bronx, N. Y.
 Scofield, Audrey Katonah, N. Y.
 Seymour, Dolores Newburgh, N. Y.
 Simmons, Christine Newburgh, N. Y.
 Skinner, Joan Bayshore, N. Y.
 Sternberg, Karen Surrey, England
 Subach, Patricia Waterbury, Conn.
 Sypher, Mary Woodmere, N. Y.
 Voorhis, Marilyn Englewood, N. J.
 Wall, Marian Elizabeth, N. J.
 Wirth, Eleanor North Plainfield, N. J.
 Woodlock, Mary Ann Ramsey, N. J.

NEW EDITION OF DR. KLEINER'S BOOK APPEARS

The C. V. Mosby Company has just published the second edition of HUMAN BIO-CHEMISTRY by Dr. Israel S. Kleiner, Director of the Department of Physiology and Biochemistry. The second edition has a new chapter, "Chemical Structure in Relation to Biological Phenomena", several new illustrations, diagrams, and charts. Much of the text has been revised, and as a consequence of all these changes the new edition exceeds the old by 76 pages.

DINNER OF THE SOCIETY OF THE NEW YORK MEDICAL COLLEGE FLOWER and FIFTH AVENUE HOSPITALS

The first annual dinner of the Society of the New York Medical College, Flower and Fifth Avenue Hospitals, and Affiliated Institutions, was held at the Biltmore Hotel on Thursday, September 30, 1948. The attendance was between 650-700. Cocktails were served at 7:00 p.m., and the dinner started promptly at 8:15.

At the speakers table were the following: Dr. J. A. W. Hetrick, Dean and President of the New York Medical College, Dr. Edward Bernecker, Commissioner of Hospitals of the City of New York, Mr. Charles D. Halsey, President of the Board of Trustees of New York Medical College, Flower and Fifth Avenue Hospitals. Mrs. Charles Wolf, through the courtesy of Dr. Nathan Smith and her husband, Dr. Charles Wolf, rendered the "Star Spangled Banner" in a very impressive way, the lights being darkened and the flags illuminated. The Toastmaster was the President of the Society, Dr. Joseph H. Fobes. The first speaker of the evening was Dean Hetrick who gave a very interesting talk on the expansion of the College, its aims and desires, and its new affiliation with Morrisania Hospital for future training. He emphasized the importance of cooperation among all the staffs of the hospitals connected with the College. Dr. John Siudmak, assisted by a quartet, rendered many piano selections throughout the evening. We feel a great deal of gratitude toward Dr. John and his associates.

Dr. Edward Bernecker, who is an old friend of ours, was the next speaker. We can remember him when he was an intern, then superintendent, then general superintendent, and now, commissioner of hospitals which he has been for a good many years. He has a real friendship toward all of our institutions, and so expressed himself. Dr. Bernecker welcomed the staff officers of the Morrisania Hospital into the affiliated program, which now includes facilities to handle 12,000 in City Hospital, Queens General Hospital, Otisville Municipal Sanatorium and the Morrisania Hospital. Since the city and the college first joined interests more than seventy-five years ago, Dr. Bernecker said, the plan has resulted in better care for the city's indigent sick and has allowed the college to perfect the teaching of its students. He also said he has never seen an institution that has

made so much progress, and would help along in any way possible in the future.

The next speaker was Mr. Charles D. Halsey, President of the Board of Trustees of the College and Hospital, who had come from an important meeting for the United Hospital Drive, to attend our dinner. Mr. Halsey gave congratulations to Dean Hetrick and the rest of the faculty for the excellent work that they have done. He said the Board of Trustees were behind this expansion and would help it. The other members at the speaker table were: Dr. J. Homer Cudmore, President of the Medical Board of the New York City Hospitals; Dr. Linn J. Boyd, Metropolitan Hospital; Dr. John Duff, Morrisania Hospital; Dr. S. A. Thompson, Otisville Sanatorium; Dr. Benjamin J. Derak, Queens General Hospital, and Dr. Thomas H. McGavack, Chairman of the Program Committee.

The evening was closed with a report from Dr. McGavack and the singing of "Auld Lang Syne". At 10:30 the program for the year was distributed among the members. It represents an excellent scientific and practical application to the problems of the College.

GIFT SHOP

When in need of gifts, toys, toiletries, leather goods, greetings cards, etc., the Gift Shop, located to the south of the main hospital entrance can supply you. Also, there is a complete and up-to-date lending library at your service.

With Christmas just around the corner, we ask you not to forget the large and select assortment of Christmas Cards. Remember, every penny spent at the Gift Shop helps your hospital.

Women's Auxiliary,
PEGGY H. BENJAMIN,
Publicity Director.

DOCTORS IN PUERTO RICO

According to the Medical Association of Puerto Rico, a total of 190 Puerto Rican medical students have received free scholarships from the Insular Government to study in the United States and Mexico. 34 of these students will receive their doctor's certificates this year. There are 752 doctors in active service in Puerto Rico, of whom 61 are foreigners practicing with special licenses. The new doctors will serve in government institutions for a period of five years.

PERSONALS

Please send personal items to the News
Editor, 1 East 105th St., N.Y.C. 29.

1894

Francis Helmuth Dreyer, Thompson Ridge, N.Y. Dr. Dreyer addressed the following to Dr. Forbes:—I am "Frank's Boy". My father was major domo in the old College at 23rd Street and Third Avenue, where I was born. In 1889 we moved to the College at 63rd Street and Avenue A, (York Avenue). We lived in the college building for eight years, leaving there in 1896. These buildings have since been torn down. I am the last link connecting these two old colleges with the present one.

1898

Frederick W. Goodrich, Catskill, N.Y.—At the annual Dinner Meeting of the Greene County Medical Society held on July 13, 1948, Dr. Frederick W. Goodrich, graduate of our College in 1898, was one of the four Greene County physicians honored, having reached the fiftieth milestone in the practice of medicine.

1901

Dr. and Mrs. Joseph H. Fobes have celebrated their—wedding anniversary together with their lovely daughter, Carol, on September 8, 1948 at the "Tavern on the Green" in Central Park. They were joshing and wouldn't tell this inquisitive reporter and his wife, who fortunately ran into them, what numeral to place on the dash above, but they reminisced of the time when they lived at 1 West 68th Street the grounds of the tavern were nothing but a sheep pasture. So, have your guess. Mrs. Fobes is very charming, quick minded and a critic of fashion, music and the terpsichorean art. She is much the housewife, mid her social activities, at their 13 room house at Montclair. Joe is still possessed with a pleasing and amiable personality, ready with an outburst of hearty and paroxysmal laughter, full of wit and rich in interesting anecdotes. He has the welfare of his students and associates at heart. Lets wish them good luck and many more anniversaries.

SAUL A. SCHATZ, '30.

1901

Harrison G. Sloat, Fishkill, N.Y., advises that—"Having reached the statutory age for retirement on July 20th, I was automatically separated from service in the U.S. Veterans Administration on July 31, 1948."

1906

Ralston Reed, Morristown, N.J., won an award at the annual meeting of the American Physicians Literary Guild at Chicago, in June.—First Place—Class A.—a short story symposium, GOLD, which qualifies him as contestant in next year's contest by the same society. Dr. Reed submitted a war statuette at the A.M.A. meeting at Atlantic City last year of the American Physicians Art Association, which won commendation—Pretty spry, after 42 years of general practice.

1912

W. Franklin Wood is the Director of McLean Hospital, Waverly, Mass., which is a part of the Massachusetts General Hospital. This hospital is one of the three oldest hospitals in the country, and is the oldest in New England. Dr. Wood is also

president of the Massachusetts Hospital Association. Dr. Robert McGuffie, also of the class of 1912, stopped in to see Dr. Wood recently, and they had a great bull session discussing the old times when the college was located down on the East River next to the gas tanks.

1917

Maurice A. Barnard joined the full time medical staff of the Eastman Kodak Company of Rochester, N.Y., and is stationed at Kodak Park in Rochester. Dr. Barnard has been on the anesthesia staff of the Genesee Hospital since 1924. He, Mrs. Barnard, their son, Donald, and their daughter, Nancy, live at 2850 Elmwood Avenue, Rochester, 10, N.Y.

Samuel A. Goldstein, Newark, N.J., was appointed Assistant Visiting Surgeon on the surgical staff of the Newark Community Hospital. On August 13, 1948 Mrs. and Dr. Goldstein left for a trip through South America, visiting Rio De Janeiro, Buenos Aires and Montevideo. They expected to return about September 20th.

1927

Harry C. Philips is now located at the Arizona State Hospital, Phoenix, Arizona.

Dr. Leonard Paul Wershub, President of the Alumni Association, recently returned from an extensive tour of Northern Italy with his family. The Wershubs also visited France and Switzerland, but are unanimous in their high praise of historic and impressive Northern Italy—the cradle of Christianity. Travel conditions were excellent, roads and railroads as in pre-war status, and no shortage of food or other essentials was encountered. Penicillin and sulfonamides are still difficult to obtain, but ground work has been started on a large plant outside of Rome for the manufacture of penicillin. Going over on the Queen Elizabeth we ran into Dr. James W. Morgan of the class of 1947, who was traveling to Scotland with his mother and father. Dr. Morgan plans to return to Massachusetts to start practice sometime in the fall. No other Flower graduates were encountered, though Americans were numerous, and all seemed to be enjoying the sights.

1930

The class of 1930 deeply regrets the untimely passing of our esteemed classmate, Dr. Samuel M. Klaristenfeld, on July 11, 1948. We extend our heartfelt sympathy to his family.

George A. Bochow, Mt. Vernon, N.Y., announces the arrival of a third child, (second daughter) born on July 28, 1948, name Alyson Jacquenette. Dr. Bochow also encloses a newspaper photo of his son George, Jr.—The picture is titled Man or Mite? George Jr. was born with three teeth and weighed eight pounds. At present he is eighteen months old and weighs 34 pounds. The picture shows him lifting a ten pound dumbbell, which he does very easily. At the age of three months, George Jr. was able to suspend himself from a horizontal bar—His diet?—Canned evaporated milk, with added vitamins, PLUS—raw oysters, clams, pickled herring, lobsters and crab meat.—MAN OR MITE?

Dr. and Mrs. Irvin I. Lubowe joyfully announce the arrival of Mark's brother, Stephen Farvel, on August 22, 1948.

Paul Train has been promoted to Assistant Professor of Surgery at New York Medical College, and Assistant Attending Surgeon at Flower and Fifth Avenue Hospitals.

1931

Nat Kanner, Brooklyn, N. Y., "is Associate Editor of the 'I.P.A. Voice' the most popular drug journal in the country. He is also Medical Director of the Pharmacist's Aid and Welfare Society, and executive board director of the New York Pharmacist Welfare Society. He is engaged in general practice at 929 Marcy Avenue, Brooklyn, 16, N.Y."

Matthew Z. Levy, the medical school pal of Dr. George H. Stein, is practicing radiology in Bensonhurst, N.Y. Dr. Levy spent his recent vacation in Mexico City, with his wife.

Bella Singer, the wife of Dr. George H. Stein, now has her Boards in Therapeutic as well as Diagnostic Radiology, and is practicing her specialty in Elizabeth, N.J. The Steins have two children, David and Anne Lee.

George H. Stein, Elizabeth, N.J., is now affiliated with Dr. Manfred Kraemer, one of the leading gastroenterologists of Newark, N.J. Dr. Stein does the radiology for this, three man Gastro-Enterology group.

1932

Louis H. Gold, Hartford, Conn.—In furnishing the Alumni office with the new address of one of his classmates, Dr. Gold added the following:—The Chironian is an Excellent bulletin—Best Wishes.

1933

Jacob A. Saltzman is now a diplomate of the American Board of Dermatology and Syphilology. He is practicing that specialty in Waterbury, Conn.

1935

The July, 1948, issue of SURGERY contains an article entitled "Patella Fractures" written by Arthur A. Michele, M.D. (class of 1935) and Frederick J. Krueger, M.D.

1936

Thomas L. Ippolito, is now in practice at 75 East Avenue, Norwalk, Conn. Dr. Ippolito was recently certified by the American Board of Internal Medicine.

1938

Meyer E. Golob announces the opening of his office at 1075 Park Avenue, New York, 28, N.Y., for the practice of Psychiatry and Neurology.

Dr. and Mrs. Sidney L. Green were happy to acquire a second offspring in the person of another son, George Howard, on May 28, 1948. Dr. Green has been invited to conduct a seminar on principles of child guidance at the Extension School of the New York Psychoanalytic Institute this fall. He has also been invited to conduct a series of seminars for the workers of the Riverdale Children's Association, and to be a member of the panel at a round table conference on the problems of the pre-school child to be held at the Carolyn Zachry Institute in October.

He presented a paper on "The Emotional Problems of Children of Separated Parents" at the National Conference of Social Workers in Atlantic City, in April, 1948.

Bernard Alan Roberts announces the opening of his office at 880 Fifth Avenue, New York City, for the practice of Ophthalmology.

Albert Verges-Flaque writes. "An invitation by the Clínica Pila in Ponce, Puerto Rico has been extended to me to give some conferences, and do some urological surgery in this beautiful tropical island. Dr. Anthony L. Lombardi, of the 1936 class, is in Bayamon P.R. and I'll try to contact him.

1940

Vincent Lodico has just announced the opening of his office for the practice of general surgery at 77 Park Avenue, N.Y.C. Dr. Lodico received his surgical training at the New York Post Graduate Hospital. At the present time he is the assistant of Dr. Charles Gordon Heyd, and will continue in that capacity until the end of next June. In 1946 he was married to Marian Eileen Swendsen of Rhinebeck, N.Y. Both parents are proud of their six months old baby boy, Vincent James.

1941

Henry J. Caes.—After serving in the U.S. Navy during World War II, Dr. Caes is now Assistant Professor of Pathology at the College. He recently became Diplomate of the American Board of Pathology. He would be pleased to hear from any of his classmates. Address him care of New York Medical College, 1 East 105th Street, New York, 29, N.Y.

Dr. Bartlo W. Lombardo extends an open invitation to members of his class to visit him at his new home, 592 Parker Street, Newark, N.J. He would also like to hear from John Capalbo and John Bushman.

Charles Margulies announces the opening of his office for the practice of medicine at 1985 Ocean Avenue, Brooklyn, N.Y.

Jerome Samuel writes:—"This is my first note to the Chironian since my graduation in 1941. My wife and I will celebrate our second anniversary on September 22nd. At the end of this year I will have completed my residency in Ophthalmology at Kings County Hospital in Brooklyn, N.Y. I shall probably open my office in Brooklyn, January 1, 1949. I should like to hear from my friends. My best regards to all."

1942

John Hubert Faber is practicing with another doctor until they start a group practice in the fall. This has never been tried in Gloversville before. If anyone has any advice, send it along to the address shown below. The Fabers have a son, Theodore Edwin, two years old, and expect another baby in January. Address:—Dr. John Hubert Faber, 45 Southboro Avenue, Gloversville, N.Y.

Vincent J. Merendino having completed the necessary training for certification by the American Board of Obstetrics and Gynecology, announces the opening of his office at 155 East 62nd Street, New York City. Dr. Merendino asks "How about a class reunion one day soon?"

Joe Shapse is still at the Harlem Hospital, in the third year of his Surgical Residency.

Leon I. Small announces the opening of his office at 250 Milburn Avenue, Milburn, N.J., for the practice of Pediatrics.

Dr. and Mrs Theodore R. Struhl announce the arrival of Wendy Lynn on September 29th 1948, at Beth Israel Hospital, New York. Weight 7 lbs.

Harry Trambert is Resident in Obstetrics at the Harlem Hospital.

MARCH, 1943

Herbert G. Cohen is resident in Orthopedics at the Hospital for Joint Diseases, New York City.

DECEMBER, 1943

Joseph Brisbane writes:—"Was released from active duty by the U.S. Navy on March 25th last, while stationed at St. Albans Naval Hospital in charge of Surgical Ward. Spent four interesting days in Boston, taking the Fracture and Dislocation course recently given there by Sir R. Watson-Jones from England. His lectures were among the best I have ever attended. The month of June was spent taking that second to none course given by Dr. Lampe of Cornell on Anatomy. On July 1st I started an eighteen month residency at Mt. Sinai Hospital here in New York. The first six months will be spent taking Surgical Pathology under Dr. Purdy Stout of Presbyterian Hospital, plus Basic Sciences. Then, into the hospital for a year, which should qualify me for the American Boards in Surgery. It was interesting to note the item about Herbie Winkler, and would like to hear from other members of our class. Am living at 405 East 54th Street, New York City. Write, drop in or call Eldorado 5-3652. The Chironian sure does a nice job on the personals, and keeps one in touch with what the others are doing."

Joseph Henry Lede has opened his office at 650 Main Street, New Rochelle, New York, for the practice of Obstetrics and Gynecology.

William T. Loehmann announces the opening of his office for the general practice of medicine at 3715 East Tremont Avenue in the Bronx. Dr. Loehmann has recently completed a one year residency in medicine at Fordham Hospital, and is now on the visiting staff of that hospital.

David J. Smith, Jamaica, N.Y. writes. "We are happy to announce the birth of our son, Joseph Lee, born on July 21, 1948, at the Beth Israel Hospital, New York City. He is named after my brother, Dr. Joseph L. Smith, class of 1930."

1944

I. Walter Grycz writes: "It is with great pleasure that I look forward to returning to the New York Medical College as a student once again. I have been fortunate in having been selected as a member of the new class in Graduate Surgery, beginning on October 4th, 1948. I have only recently completed a Surgical Residency at the Norwalk General Hospital, Norwalk, Conn., which followed over two years in the service with the Army. The residency offered me much training and experience. Our group affiliated with Yale for an anatomy course, following the dissections of the medical students. I also spent three months on pathology, with many prosections to my credit. The remainder of my time was spent in the operating room, on the wards, and in the clinics.

I must say that it was indeed a great pleasure to meet and work with Dr. J. Vietta and Dr. I. Tarlov in Norwalk, the others of the Surgical Staff having been more than kind to me. I should like to advise that Dr. Herman R. Greenhouse, having been separated from the service (Army), is now in practice at 107 Whitney Avenue, New Haven, Conn. I also understand that there is a cute little daughter in the family. I know how happy he'd be to hear from his many friends and classmates.

Dad (Dr. Louis S. Grycz, Class 1920) is pleased at my returning to Alma Mater. Since he doesn't take the time to write, I'd like to say that he enjoys his work in Ophthalmology and being Assistant Ophthalmologist at the Hospital for these past five years. He's sorry he let so much time go by before getting into the field. There is a moral—"Do the work that makes you happy, and you'll be happy doing the work." He sends his best regards to his classmates."

1945

J. Conrad Greenwald writes the following:—"After returning from Japan in January of this year, and then spending five months at King County Hospital, I came up to Fordham Hospital where I will spend one year as Resident in Pathology. While at Kings County I renewed old friendships with George Zarou and Paul Stillman, both from the class of 1945. George now has an internship in Obs-Gyn at Norwegian Hospital in Brooklyn, while Paul, who was married several months ago, is up in Maine doing work in Ophthalmology. Have seen Zeke Epstein and Bob Forman several times. Both these classmates of mine are married and are the proud fathers of one child each. Zeke is doing work at Queens General while Bob is out in the world of Medicine. Enjoyed the Alumni Dinner and only regretted that more of our class could not be present. Here at Fordham there are about six interns from the class of 1948, while working with me up in Pathology is Joe Pedulla, class of 1947. Enjoy the Chironian immensely."

Harvey Hatchfield and Gerald Hewitt, both of the class of '45 returned from the Pacific Theater in December, and were married within two weeks of each other. Harvey married Miss Judy Lang on March 20th, and Gerry married Miss Mildred Segal April 3rd. At the present time Dr. Hewitt is anticipating the start of his residency in psychiatry at the Long Island College of Medicine, and Dr. Hatchfield is a fellow in obstetrics at Queens General Hospital.

John D. Horgan was discharged from the Army in July, after having served two years at the V. A. Hospital in Northampton, Mass. This is an N. P. hospital consequently most of his experience was in psychiatry. Dr. Horgan has opened his office for general practice at 55 Williams Street, East Hartford, Conn.

Edward H. Mandel writes: "As I write this I have just resumed an Assistant Residency in Dermatology at City Hospital following a five weeks course in Medical Mycology with Dr. N. F. Conant at Duke University. This residency will be in effect until October 1, 1948 at which time I shall begin the formal training at the New York Skin and Cancer Hospital in Dermatology for three years. Within the past week I received official certification confirming a nomination which has named me The Corresponding Member of the Japanese Dermatological Association in the United States."

IN MEMORIAM

John R. O'Brien was discharged from the Army on May 28th, 1948, and is now in private practice at 174 Bowers Street, Jersey City, N. J. "Our second child, a boy, John J. Jr., was born April 9, 1948. Our first child, May Win, is nineteen months old. Would like to hear from my classmates who are in and around New York."

1946

Albert Lewis Goodman is now a 1st Lieut. M.C., A.U.S. stationed at Chanute Air Base, Illinois. He entered the service last September, 1947, and after a month of basic at Fort Sam Huston, was transferred to Walter Reed General Hospital for a three months intensive training course in Ophthalmology. While at Walter Reed Hospital he met several classmates, Henry Jacobais, Mike Charlap, Jerry Schack, and accidentally met a former teacher, Dr. Borrelli, at the hospital exchange cafeteria. The course in Ophthalmology was excellent and included post graduate courses at George Washington University School of Medicine, Episcopal Eye, Ear, Nose and Throat Hospital, and at the Army Institute of Pathology. After the end of the course, with several diplomas tacked in his arms, off they went for Chanute Air Base. At Chanute his medical duties included chief of eye clinic, and ward officer of the dependent ward, which gave him medicine, diagnostic surgery, pediatrics, and obstetrics and gynecology. Dr. Goodman's wife and ten months son are with him, so he feels pretty fortunate so far. He sends best regards to the class of '46, and asks them how about dropping him a post card in c/o of Extension Hospital, Chanute Air Base, Illinois.

Alfred E. Mamelok is serving in the armed forces and at present is stationed at 1st Army Dispensary, 90 Church Street, New York, N.Y.

1947

Richard Schoonmaker Colfax, M. D., announces the opening of his office for general practice at 33 Bartholf Avenue, Pompton Lakes, N.J.

Jon M. Wilson is taking over the practice of Ernest R. Gentile, class of March, 1943, at 125 Hamilton Street, Bound Brook, N.J.. Dr. Gentile is coming back to his Alma Mater to take a Basic Science course in Urology.

1948

Arthur L. Chambers was married on June 10th, 1948 to Miss Irene L. Champagne, graduate of the Flower and Fifth Avenue Hospitals Nursing School.

Dr. Samuel Alcott Thompson has been appointed the First Secretary of the newly created Section on Chest Diseases by the Council of the Medical Society of the State of New York.

INDICATIONS FOR PROTOLYSATE

Protolysate is a readily available hydrolyzed protein for the patient with impaired digestive functions. When absorption is decreased, as in diarrheal disease, or when enzymes are deficient, as in pancreatic insufficiency, Protolysate will aid in provision of sufficient protein nourishment to avert protein starvation.

For literature and professional samples of Protolysate, write Mead Johnson & Company, Evansville 21, Indiana.

ILER, DR. GEORGE HILLS, Brooklyn, N. Y., was born in Troy, N. Y., on July 11, 1868, and received his early education in the Troy Public Schools. He received his M.D. degree from the New York Homeopathic Medical College in 1890. He interned at the Cumberland Street Hospital, and later was Assistant House Physician. He also did duty on a horse drawn ambulance. He served the Cumberland Hospital for 27 years. When Dr. Iler opened his office, Brooklyn was like open country. He always believed he was one of the first doctors to own an automobile, buying one in 1905. During World War I, Dr. Iler was a surgeon at the time Cumberland Hospital was an adjunct to the Naval Hospital. He also was a surgeon at Peck Memorial Hospital and Associate at St. John's Hospital, all in Brooklyn. In 1940 he received his gold diploma from our College. He was a Fellow of the American College of Surgeons; a member of the American Institute of Homeopathy; the Homeopathic Medical Society of the State of New York and the Kings County Homeopathic Medical Society. Dr. Iler died on August 11, 1948 at the age of eighty. He is survived by his widow, the former Maud E. Evans, and a son, Dr. Russell H. Iler, of Brooklyn.

MARSH, DR. HORATIO RICHMOND, Long Beach, Washington, was born in Joliet, Ills., on February 13, 1874. He received his B.S. degree at the University of Illinois, and his M.D. degree from the New York Homeopathic Medical College in 1897. Last year he received his Gold Diploma for fifty years of service in medicine. He was connected with the Ocean Beach Hospital, Ilwaco, Wash. During World War I he was Field Director of the Red Cross. He also was chairman of the Disaster Committee of the Red Cross. He was Past Grand Patriarch—I.O.O.F. and Surgeon General Patriarchs Militan, I.O.O.F. For a number of years he was a medical missionary in Alaska. He was a member of the Pacific County Medical Society; The Washington State Medical Society, and the American Medical Association. Dr. Marsh died in Warrenton, Oregon, on May 6, 1948, aged 74, of arteriosclerosis.

KELLOGG, DR. EDWIN WELLES, Jackson Heights, N. Y., was graduated from the New York Homeopathic Medical College in 1903, and practiced in New York City. Dr. Kellogg was Emeritus Associate Professor of Surgery at the New York Medical College and

the Flower and Fifth Avenue Hospitals, and was a Fellow of the American College of Surgeons. He was formerly a member of the Workmen's Compensation Committee of the New York State Department of Labor; a member of the Medical Society of the State of New York, and the Homeopathic Medical Society of the State of New York. Dr. Kellogg died on September 1, 1948 in his 69th year, at his summer home on Lake Waramaug, Conn. He is survived by his wife, Mrs. Miriam H. Kellogg; a son, Edwin, Jr.; a daughter, Mrs. David Housh, and two sisters.

FIFIELD, DR. H. LELAND, Syracuse, N. Y., was born in Thornton, N. H., on November 20, 1880. He graduated from the New York Homeopathic Medical College in 1906. He interned at the Boston Homeopathic Hospital, and was resident at the Hahnemann Hospital, New York City. After taking post-graduate courses in London, Vienna and Berlin, he became a specialist in Eye, Ear, Nose and Throat, settling in Syracuse, N. Y., in 1913. He was a Mason; a member of the A.M.A. and the Onondaga County Medical Society. Dr. Fifield died on August 19, 1948, aged 67 years. He is survived by his widow, Mrs. Bertha Cynthia Bacon Fifield.

CHILDS, DR. ESMOND AUSTIN, Long Beach, Calif., was graduated from the New York Homeopathic Medical College in 1909. Dr. Childs died in May, 1948, aged 67, of coronary thrombosis.

ARIOLA, DR. GABRIEL, Brooklyn, N. Y., was born in Italy. He graduated from the University of Naples in 1903, and received his M.D. degree from the New York Homeopathic Medical College in 1915. He was a general practitioner, and at the time of his death had been retired for almost twenty years. Dr. Ariola died in Hollywood, Florida, on June 7th, 1948, of a heart attack, Aged 71.

BORGIA, DR. JAMES MICHAEL, Brooklyn, N. Y., was graduated from the New York Homeopathic Medical College in 1918. He was on the staff of the Adelphi Hospital. Dr. Borgia died on June 9, 1948 of cirrhosis of the liver. Aged 58.

STOLLER, DR. BENJAMIN, Brooklyn, N. Y., was graduated from the New York Medical College in 1922. Dr. Stoller began practice duty in World War II as Captain in the Medical Corps, Army of U. S. in November, 1942. While in military service, Dr. Stoller died on April 17, 1946, aged 50, of hypertension and coronary sclerosis.

KLARISTENFELD, DR. SAMUEL M., New York, N. Y., was born in New York City, August 20, 1904. He received his elementary education in Brooklyn and was graduated from New York University in 1926 with a Bachelor of Science degree. He received his M.D. degree from the New York Homeopathic Medical College in 1930. After serving his internship at Flower Hospital, he became Admitting Physician at Gouverneur Hospital for several years, later joining their Diabetic Clinic. In 1934, he became associated with the Cardiology Staff at the Metropolitan Hospital and the Diabetic Clinic at Flower and Fifth Avenue Hospitals. Dr. Klaristenfeld served in the Medical Corps of the Armed Forces of the U. S. with the rank of Captain from 1942 to 1945. He was a member of the New York County Medical Society, New York State Medical Society and a fellow of the American Medical Association. Dr. Klaristenfeld died of pemphigus on July 11, 1948 at the age of 44. He is survived by his wife, Mrs. Lillian Klaristenfeld; his son, David C. age 17, who is a pre-medical sophomore at Long Island College; his parents, Mr. and Mrs. Abraham Klaristenfeld and two brothers and four sisters.

The Cornwall Hospital, Cornwall, New York, was presented with a new modern ambulance on June 11, 1948, as the result of a special campaign of the hospital staff and the community. Dr. McMenam, chief of the medical staff made the presentation speech, paying special tribute to the late Dr. Ralph Waldo Thompson, (graduate of our College, Class of 1908) having been the chairman of the ambulance campaign.

We are taking this opportunity of thanking all the alumni who were so kind as to advise the office of present addresses of alumni, as requested in the July, 1948, issue of the Chironian. Your cooperation is greatly appreciated.

JOSEPH H. FOBES, '01—*Editor*

DAY

The day is cold the nite is long
Why dream of stars so bright in song?
The house is dark the hearth is cold
The sky o'er cast the wind is bold
It bends the trees it rattles the door
We hear these sounds o'er and o'er.
Whence comes the magic of newborn Day
The wind and stars return to play
Silently, with moonbeams as they may
The Day appears with sun and light!
A gift to man, no tax, to fight.

BACKGROUND

The use of cow's milk, water and carbohydrate mixtures represents the one system of

infant feeding that consistently, for over three decades, has received universal pediatric

recognition. No carbohydrate employed in this system of infant feeding enjoys so rich and enduring a background of authoritative clinical experience as Dextri-Maltose.
