**Cross River Campus of Touro University
3 Times Square, New York, NY 10036**

Touro University is a Jewish-sponsored independent institution of higher and professional education serving the larger American community. Approximately 19,000 students are currently enrolled in its various schools and divisions. Touro University is accredited by the Middle States Commission on Higher Education, 3624 Market Street, Philadelphia, PA 19104, phone number (267) 284-5000. The Middle States Commission on Higher Education is an institutional accrediting agency recognized by the United States Secretary of Education and the Council for Higher Education Accreditation.

All Touro branches in California and Nevada are accredited by the Accrediting Commission, for Senior Colleges and Universities of the Western Association of Schools and Colleges, 985 Atlantic Avenue, #100 Alameda, CA 94501, phone number (510) 748-9001.

For more information on Touro University, please visit us on the web at: www.touro.edu or call (212) 463-0400.

Message from the President

Each year, our Faculty Publications book shines a spotlight on the extraordinary and distinct scholarly works of the Touro University community—a community that continues to grow in size, scope and diversity. Representing scholars from across the panoply of Touro’s 36 schools and numerous academic disciplines—with research from an impressive array of faculty researchers, published scholars and newly-minted authors—this volume marks Touro’s important publishing effort’s 14th anniversary. The support of our Libraries and their outstanding staff cannot be praised highly enough, and I am delighted to recognize the vital contributions of Bashe Simon, Director of the Touro University Libraries, Marie Ascher, Director of the Health Sciences Library at New York Medical College, Sara Tabaei, Library Information Literacy Director, David Druelinger, Scholarly Communication Librarian and Jeanette Aprile, Scholarly Communication and Content Librarian at New York Medical College.

We have 2,003 entries in the 2023 Faculty Publications book. [Touro Scholar](#), our institutional repository, increased in total downloads to 147,267 (compared with 124,795 downloads in 2022). Touro was cited 2,680 times for items which were published in 2023. We also saw an all-time high of 607,788 total social media engagements with items on Touro Scholar, as well as a record high of 9,955 total news mentions of items on Touro Scholar.

While many of Touro’s authors may never know precisely who or how many people they have impacted with their authored work, they can rest assured that many were inspired—and others will not only apply what they learned but will also perpetuate the lessons.

In short, publishing makes a difference. My sincere congratulations and gratitude to everyone whose hard work, scholarship, creativity and drive have made this volume a reality.

Sincerely,

A handwritten signature in black ink, appearing to read "Alan Kadish". The signature is fluid and cursive, written over a white background.

Dr. Alan Kadish
President
Touro University

Message from the Senior Vice President for Academic Affairs and Provost for the Graduate and Professional Divisions

Dear Colleagues,

The year 2023 clearly involved a continued rebound from the challenges imposed by COVID as we gained a keen sense of operating under the “new normal” while recapturing past momentum. This includes an increase in the number of faculty publications from 2022, but also is demonstrated by a significant increase in the annual downloads of items from Touro Scholar. In other metrics, we see evidence that the scholarly product of our faculty is garnering more attention than ever in the media. Congratulations to all whose publications appear in this impressive volume.

Our Touro Montana campus has completed its first year, synergies in research between the Lovelace Biomedical Research Institute in New Mexico and the rest of Touro are being advanced under the strong leadership of Senior Vice President Amar. Dr. Amar is working with the Faculty Renewal Task Force to continue to identify meaningful ways in which the faculty can be further supported in our scholarly pursuits, and new grant programs focusing on research for students as well as faculty continue to be offered. Most recently, under the leadership of Associate Provost Shlomo Argamon, a new grant program was announced that will lead to more research throughout the University in the AI space. Fruitful collaborations across our campuses allow Touro through its wide geography to begin to mirror the scale of endeavors that historically have been centered on older, large institutions of higher education that are single campus in nature.

These are exciting times to be at Touro University as we continue to concretely execute President Kadish’s vision of what Touro can be in its second fifty years. Throughout his tenure as our president, Dr. Kadish has consistently trumpeted how instruction and scholarship go hand in hand, with mutual benefit to those who are teaching and those who are being taught. Let us also not forget that our students are exposed to research directly, sometimes as research assistants and/or collaborators for faculty, or by conducting independent projects themselves; those endeavors yield scholarship that contributes to our overall productivity and reputation as a university.

How others look at Touro University rests on two key factors—how our graduates go on to succeed in their careers and the quality output of our faculty in scholarly journals, in manuscripts and in other forms of presentation. This reputational outcome mirrors the symbiosis of instruction and research in the classroom and in the lab.

I want to express appreciation and gratitude on behalf of the faculty to all members of the staff of the Touro Libraries for their professionalism and constant support of our faculty and students. A special note of thanks to Bashe Simon, Sara Tabaei and David Druelinger for their work on preparing this important volume capturing scholarly achievement.

Sincerely,

A handwritten signature in black ink, appearing to read 'Pat E Salkin', written in a cursive style.

Patricia E. Salkin, J.D., Ph.D.

**Senior Vice President for Academic Affairs, Touro University System
Provost for the Graduate and Professional Divisions, Touro University**

Message from the Senior Vice President for Research Affairs

Each year, it is always our great pleasure as leaders at Touro to witness the fruits of our scientists' labors in the form of faculty publications. As we commemorate the progress made in our growing research enterprise across Touro's esteemed institutions through conferences, awards, external funding and more, this book is one of the ways in which we can eternalize those results. After all, they are a form of legacy for those mentored in labs and classrooms, and lead to improved health and longevity for the community at large.

For 2023, there was a sizeable 2,003 faculty publications. Of these publications, I am also delighted to share that our faculty has reached a wider audience as well, with nearly 150,000 downloads, 607,788 mentions in social media, nearly 2,700 citations for their 2023 publications, and nearly three times the appearances in Touro-related news, with about 3,000 mentions last year versus almost 10,000 mentions this year.

For 2022, you will find that the publications our community put forth have much more diversity again, with COVID-19 being the prime topic for only 77 publications. I am also delighted to share that our faculty has reached a wider audience as well, with nearly 40,000 more downloads, nearly double the citations usage, approximately 50,000 more mentions in social media as compared to last year, and nearly 3,000 appearances in Touro-related news.

Certainly, the tenacity and innovation of our researchers play a significant role in the success of their work and publications, and so too does their ability to pivot into new territories for a broader understanding of our world and its health, and its delivery to a wider audience. It gives me great pleasure to say, we have succeeded in these overarching goals as a scientific community.

With that in mind, I am immensely proud of our faculty and their staff and lab support. I wish you every accolade you deserve and more. Likewise, I would like to thank our staff in the Touro Libraries, Bashe Simon, Director of the Touro University Libraries, Marie Ascher, Director of the Phillip Capozzi, M.D. Library, Sara Tabaei, Library Information Literacy Director, David Druelinger, Scholarly Communication Librarian and Jeanette Aprile, Scholarly Communication & Content Librarian at New York Medical College.

Regards,

Salomon Amar, DDS, Ph.D.

**Senior Vice President for Research Affairs and
Chief Biomedical Research Officer, Touro University
Vice President for Research, New York Medical College**

Note from the Touro University Libraries

This 14th annual publication of the Touro University Faculty Publications book is a reflection of the 2023 scholarship and research of the Touro University System and New York Medical College. It affords us the opportunity to once again present the depth of research and creative works of our Touro scholars and attests to the continued and diverse research produced by the Touro community. The yearly Faculty Publications books have shown a continuous increase in the academic output of Touro's staff and faculty.

There are 2,003 faculty entries in the 2023 book. In 2023, Touro publications on Touro Scholar were downloaded 147,267 times, an increase of over 20,000 from the previous year. According to Scopus, a large multidisciplinary database of peer-reviewed data, Touro faculty publications were cited 2,680 times in 2023 alone. All-time social media engagements of items on Touro Scholar number 607,788 and the total news mentions of items on Touro Scholar is 9,955. These statistics demonstrate the global reach of our faculty and staff, as well as their unwavering commitment to advancing global knowledge through their research and scholarship.

David Druelinger, Scholarly Communication Librarian, has worked tirelessly to collate and edit this edition of the Faculty Publications book. We thank him for his efforts and dedication. Thank you to Sara Tabaei, Library Information Literacy Director, who supervised and finalized the publication. Esther Greenfield, Director of Publications, and Laurie Kohanchi, Assistant Director of Publications, worked devotedly to ensure that this publication was of the highest quality. We thank you both. Marie Ascher, Director of the Phillip Capozzi, M.D. Library, and Jeanette Aprile, Scholarly Communication Librarian at New York Medical College, compiled and submitted the research of the NYMC staff. We value their assistance. Their professionalism is reflected in the quality of the Faculty Publications book.

We are indebted to the support that the library receives from the President of Touro University, Dr. Alan Kadish and the President's Office.

We encourage all staff members to submit their research and scholarly accomplishments to the Touro Libraries. Please submit your work via the Touro Scholar website: touro scholar.touro.edu/submit_research.html.

Sincerely,

Bashe Simon, MLS, M.A.
Director of Touro Libraries

Note from the Phillip Capozzi, M.D. Library

Every year the Touro University and New York Medical College (NYMC) Libraries take the time to pay tribute to our faculty authors by curating a volume which lists the scholarly publications produced by our respective faculty that meet specified inclusion criteria. It is my honor to be a part of this endeavor as we honor and respect the work of our faculty researchers and authors from New York Medical College during the calendar year 2023.

During 2023, New York Medical College's 381 faculty authors produced 768 publications. That includes 599 articles, 139 published conference abstracts, 6 complete books and 24 book chapters.

Please remember to list New York Medical College as your affiliation when submitting publications to journals. I ask this not just to help us find your articles and not just to provide NYMC with credit (although those are important reasons). There are also financial implications: As publishers move to open access models, they consider the publishing history of the institution with their journals during pricing negotiations. If more articles are identified as NYMC publications, it could mean better pricing for the institution and better publishing costs for our authors. Although these numbers are impressive, I am sure there are articles and books that we have missed, despite our best efforts.

In late October, faculty authors will gather on the New York Medical College campus to celebrate the 2023 publications listed here. It is, as always, my honor to be a part of this annual endeavor and event along with the staff of the Phillip Capozzi, M.D. Library and the NYMC Administration. At our event, awards will be announced for articles and authors that met certain standards of bibliographic achievement. We hope you all can join us.

Particular thanks to Jeanette Aprile, NYMC Scholarly Communication & Content Librarian at the Capozzi Library, who works tirelessly to continually improve processes and not miss a single publication now included in this volume. Her commitment and diligence are appreciated and acknowledged. I'd also like to mention the contributions of the rest of the Information Management staff under the direction of Danielle Aloia, Assistant Director for Information Management, in keeping the Touro Scholar repository up to date with faculty publication information.

And as always, thank you to our wonderful colleagues at Touro University Libraries, David Druelinger and Sara Tabaei, who ultimately bring the full Touro bibliography to fruition.

With congratulations and gratitude,

Marie T. Ascher, M.S., M.P.H.

Inclusion Criteria

To be considered for inclusion in the Faculty Publications Book, a work must:

1. Have had at least one faculty/staff author affiliated with the Touro University System at the time of publication
2. Match one of the included publication types below:

Included

Published work in a scholarly, academic or professional publication:

- Abstract
- Bibliography
- Book (authored/edited)
- Book section (authored/edited)
- Conference/symposium paper (published in proceedings)
- Dissertation
- Encyclopedia entry (scholarly or academic)
- Journal article
- Letter to the editor
- Monograph
- Review of a book or film
- Test review (in Mental Measurement Yearbook)
- Textbook
- Translation (of literary or scholarly work)

Creative work:

- Artistic work (poetry, novel, short story, published play, art exhibit, musical score, choreographed dance, etc.)
- Patent
- Software or website (on a significant scholarly, academic, professional or creative topic)

Excluded

- Announcements of presentations that are printed in conference/events program (including abstracts)
- Blogs
- Broadcast media
- CATs or CAPs (Critical Appraisal Topics or Papers)
- Committee reports
- Conference programs/schedules
- In-house or departmental newspaper articles
- Interviews
- Items that have the following descriptions: "in press," "forthcoming" or "corrected proofs"
- Job titles and responsibilities
- Newsletter items
- Newspaper articles
- Obituaries/eulogies
- Pending patent applications
- Popular magazine articles
- Preprints
- Presentations, including poster presentations
- Unpublished technical reports and working papers
- Vanity presses
- Any other kind of publications that are not yet published with sufficient metadata exposed

Every effort was made to identify and include all qualifying publications authored by Touro University System faculty and staff who published between January 1 and December 31 of 2023. We regret any omissions or inadvertent errors.

We invite authors to submit any feedback regarding this publication to touro.scholar@touro.edu.

Any publication that appears in the Faculty Focus Newsletter will now automatically be considered for inclusion in both Touro Scholar and the yearly Faculty Publications Book. The item must meet the inclusion criteria (see the previous page). Note that prepublication and preprint items are not accepted. Please see the Touro Scholar Author FAQ page (<https://touro scholar.touro.edu/faq.html>) for more information.
