'UNION NOW'

In a swiftly moving world, in which event crowds upon event with increasing rapidity, no more important problem confronts the Administration of your College than that of planning educational adjustments to meet the marked military, economic, and social changes now in progress. The present war and the post-war reconstruction are likely to bring about changes even more profound and significant than the past "depression" years.

Increased taxes, higher costs of materials, supplies, replacements, and equipment are tangible — their effects immediate and obvious.

More obscure, however, are the effects of our Nation's beliefs, its visions, faiths, hopes, convictions and ambitions. To a considerable degree these beliefs govern our people. To a considerable degree these ideological concepts chart the course of our Nation.

What will be the result of these social, economic, and ideologic changes in your College? What will be their effect on your life and mine? Will the force of public opinion, welded into a national ideology, recognize the disastrous and wide-spread results of the curtailment of college education? Will these too rapid changes result in federal support? Will changes in our national attitudes alter or modify the ideologies of youth so that fewer and fewer enter upon the study of medicine, causing sooner or later an actual shortage of students and doctors?

To none of these questions do I know the answer, but I do know that this is the time for concerted action on our part and, because of my belief, I give you this toast for the New Year: "*Let us — Faculty, Administration, Students, Alumni, Interns, Nurses, College citizenry — unite to make ours the best college possible by a positive, not passive, program of cooperation and mutual help, based upon singleness of purpose and an atmosphere of mutual trust and understanding.*"

J. A. W. Hetrick, M. D.  
*Acting Dean*

## EMERGENCY MEDICAL SERVICE

"Current developments in technics of warfare leading to the possibility of unheralded bombing of civilian populations, as well as potential hazards from sabotage, make imperative the preparation of facilities for providing medical service to casualties that may result from such incidents. The need for these emergency facilities may not arise, but their organization must be a fundamental part of our civilian defense program."\*

"The Medical Division of the Office of Civilian Defense is charged with the preparation of plans for emergency medical service and equipment."\*

"In states on both seaboards, and in vulnerable industrial areas in the interior, general hospitals, both voluntary and governmental should organize emergency medical field units and assemble basic equipment. An emergency medical field unit should consist of two or more squads, and a physician should be appointed to command the entire unit. Squad leaders, in turn, should be designated. The size of the emergency field unit should be in proportion to the bed capacity of the parent hospital. All members of field units should be instructed in first aid, including care of burns, prevention of shock, control of hemorrhage, emergency treatment of fractures and wounds, and in the technic of decontamination."\*

"In hospitals of more than 200 beds the emergency field unit should consist of two squads of four doctors, four or more nurses and four or more orderlies or nurses' aides, one of the physicians in each squad to act as squad leader. Each of the squads should be on first call during a twelve hour period of the day. The personnel and equipment of a squad should be divisible into four teams capable of functioning if necessary at separate sites of disaster."\*

The Flower and Fifth Avenue Hospitals has organized and equipped three squads, each consisting of two internes, two nurses, and two orderlies. In collaboration with the American National Red Cross, intensive courses have been started for the training and use of volunteer nurses' aides. On completion of this practical training, volunteer nurses' aides will become eligible to assist nurses and supplement their work so that each nurse may be able to serve a greater number of patients. Nurses' aides will also supplant orderlies as members of the Emergency Field Units.

In addition to the establishment of Emergency Field Units, the institution has placed itself on a wartime preparedness basis providing for prompt care, not only of any new patients rushed to the hospital in an emergency, but also for patients already confined within its doors. All staff members and employees have assignments to be carried out in case of extreme emergency.

— *It can happen here so we are prepared* —

## **Military Service for Medical Students, Internes and Residents**

The Association of American Medical Colleges has co-operated with National Headquarters of the Selective Service System and the Surgeon Generals of the Army and Navy in a plan designed to "persuade" all third and fourth year medical students who are physically and otherwise eligible to join the medical corps reserve of either the Army or the Navy.

Under the plan agreed upon the medical students of the first and second year will be under the jurisdiction of Selective Service. However, upon proper recommendation of the Dean of the Medical College, these students have been placed in a deferred class. Upon entering the third year they become eligible for draft unless they join the Medical Administrative Corps Reserve. All third and fourth year students are eligible for commission as Second Lieutenants in the M.A.C.R. Upon graduation, members of the M.A.C.R. apply for transfer to the Medical Corps Reserve. They will be permitted to complete an internship of at least one year. A similar plan is offered by the Navy.

As far as practicable residents in hospitals approved for graduate education will be permitted to complete preparation for their specialty. All concerned recognize that the military as well as civilian needs for specialists should be given full consideration.

## **Medical Degree Obtainable In Three Years**

In order to replenish the dwindling supply of Interns and Medical Officers for the Army and Navy, the members of the Association of American Medical Colleges have agreed to continue their courses through the summer so that the medical degree may be obtained in three years. In order to carry out this plan the New York Medical College, Flower and Fifth Avenue Hospitals, will give one trimester of work each summer. It is anticipated that the summer course will begin about July first, and continue for eleven weeks.

## SERVICE FOR PROBLEM CASES

The Flower and Fifth Avenue Hospitals announces that they have arranged an all inclusive service at \$5.00 a day, for problem cases that can be used for teaching purposes.

The following note was received from the parents of a patient who had gastric hemorrhages for seven years, and who was unsuccessfully treated in various other hospitals. He was sent to the Flower and Fifth Avenue Hospitals by one of our loyal Alumni at the \$5.00 a day all inclusive ward rate, and was placed under the graduate school for study. After many conferences he was operated, and the ulcer was successfully removed.

Dear Doctor: Bill is feeling just fine and has been working for three weeks. The old wound is practically healed, and he goes to Dr. Day once a week. Thanks to you, Doctor, this will be the happiest Christmas we have ever had. With best personal regards, Sincerely, Mr. and Mrs. — — — — —

We hope that the Alumni will take advantage of this service, and send other problem cases to the Department of Graduate Surgery.

A LETTER RECEIVED FROM J. FISHMAN, '33

Dear Editor:

Since there are frequent changes in the Alumni in Service, I would appreciate it if you could keep your list up to date with corrections made for these changes. This list helps us to get in touch with these men and enables us to refer our local relatives and mutual friends to them, so that strange alumni in strange places will have friends there much quicker. I hope your readers will help us with these changes. Thanks for your kind service.

J. Fishman, M.D.

## In Memoriam

HINCKS, William Sylvanus, '84, Great Neck, L. I., N. Y. died on September 9, 1941 at the age of 79.

MARSH, James Morgan, '90, Elkhorn, Wisc. Dr. Marsh was born at Winthrop, N. Y. on June 27, 1862, the son of Morgan and Sarah Pelsue Marsh. Since 1900, which is the time he came to Elkhorn, he had been active in many Walworth County circles. He was city public health officer for many years; a member of the American Institute of Homeopathy and the Walworth County Medical Ass'n. He was one of the ten surviving graduates of the class of 1890, and attended the golden anniversary celebration at our Alumni Banquet in June, 1940. Dr. Marsh died on Friday, October 21, 1941 of uremic poisoning, at the age of 79. He is survived by his wife; seven daughters; a son; a daughter-in-law; and twenty-one grand children. Two sons also preceded him in death.

PEASE, Charles Griffin, '91, was born in New York City on Dec. 4, 1854. He received the degree of Doctor of Dental Surgery from the Philadelphia Dental College in 1890, and in 1891 received the degree of Doctor of Medicine from the New York Homeopathic Medical College. In 1881 Dr. Pease married Clara Estelle Egan, who died in 1883. In 1901 he married Mary Leonora Spear, of Montgomery, Alabama. She died in 1904. For three quarters of a century Dr. Pease waged unrelenting war against the evils of tobacco. He died of hardening of the arteries on October 7, 1941, at the age of 86. Surviving are an adopted daughter, Mrs. A. Audrey Urick Fiedler, and a brother, Dr. J. Grant Pease of Florida.

DEUEL, Walter E. Jr., '08, Penn's Grove, New Jersey, died on July 13, 1941, at the age of 62.

THEIS, Kenneth G. '28, was born in Nyack, N. Y. He graduated from the New York University, and in 1928 received his medical degree from the New York Medical College. He interned at the Broad Street Hospital, N. Y. C., and at the Nyack Hospital. Later he was in charge of the Tappan Hospital, Tappan, N. Y. and at the time of his death he conducted the Valley View Hospital at Blauvelt, N. Y. Dr. Theis was a member of the A. M. A.; the New York State, New York County and Rockland County Medical Societies, and the New York Athletic Club. Surviving are his mother, Mrs. O. Franklyn Theis, two daughters, the Misses Yvonne Sandra and Eleanor Adele Theis, and a brother, Dr. Franklyn B. Theis

---

BALDWIN, William M. — Trustee of the New York Medical College, Flower and Fifth Avenue Hospitals for twenty-five years, serving two terms as President of the Board, died at the Flower and Fifth Avenue Hospitals on Sunday, January 4th at the age of 79.

## CLINICAL CONGRESS OF THE AMERICAN COLLEGE OF SURGEONS

The thirty-first Clinical Congress of the American College of Surgeons was held in Boston from November 3rd to the 7th inclusive. About three thousand surgeons attended the Congress, and these, together with members of their families and friends, hospital executives, representatives of nursing schools and exhibitors, made a total of about five thousand who visited Boston during this time. The hotel facilities of even as large a City as this were severely overtaxed, and many members had to "commute" from their hotels to the various meetings and clinics.

Very interesting papers discussing the scientific advances in surgery and research in related sciences were presented at many meetings, and it was sometimes hard to choose which session to attend, since often four or five vitally interesting subjects would be presented at the same time. There were also operative clinics in the many fine hospitals in and about Boston, but the inability of most of the spectators to see much that was going on at the operating table caused the Dry Clinics to be generally preferred.

Initiation of new members for the degree of Fellowship was held in Symphony Hall on Tuesday evening, November 4th. Although there were many addresses of great interest during the evening, the highspot of the program was the conferring of an honorary degree in the College to Surgeon Rear Admiral Gordon-Taylor of the Royal Navy and Vice-President of the Royal College of Surgeons. Besides bringing with him a message of fellowship from the Royal College of Surgeons in London, he presented to our College some fragments of the main meeting room of the Royal College building which had been ruthlessly destroyed by Nazi bombs.

Honorary fellowships were also granted to Surgeon General McIntire of the United States Navy; Professor Mirizzi of the University of Cordova, Argentina; and Professor Silva of the University of Mexico.

Surgeons were admitted to Fellowship from every state of our Union as well as Hawaii, Puerto Rico, Canada, Newfoundland, Argentine, Brazil, Cuba, Mexico, Venezuela and India. The following Alumni of our College received their fellowship degrees at this time:

Walter Gray Crump, Jr.  
Louis J. Di Lorenzo  
Edmund H. Hubner  
Albert Lesser

A. Frederick McGourty  
Samuel L. Saltzman  
Franklyn B. Theis  
Benjamin Toly

Dr. Leo Winter, who was formerly lecturer in Oral Surgery in our College also received his degree.

On Wednesday evening Dr. Louis Kaufman, head of the Department of Surgery, tendered a dinner to those receiving Fellowship who are connected with our Department of Surgery, and had as guests several other members of the department.

## MEDICAL STUDENTS' CLUB ACTIVITIES

What are the needs of present day medical students? Perhaps the needs of the medical students of today are not much different fundamentally from those of students of fifty years ago. Yet with so much of the world in utter chaos, with war clouds becoming more and more dark and ominous each day, with our democratic way of life in serious jeopardy and with the uncertainties of the future becoming increasingly great, the student of today must face and cope with problems that will require him to be even more than a doctor of medicine.

Some of the prerequisites that the student of today will need as he faces the next thirty or forty years of service to his fellowmen are: health, intellectual activity other than medical, a well rounded personality, a well-balanced philosophy of life, the development of some hobby, and the highest of ideals. In truth, he should not only possess the highest ideals, but should also have a voice in helping to elevate the moral and spiritual level of his own community and country, and he should make it heard. These are but a few of the needs of medical students of today, but they are perhaps pertinent.

The Medical Students' Club, an organization which has had an increasingly significant place in the life of our college is attempting to meet some of these needs of our students. It seeks to provide a broadening and enriching experience for medical students by offering a variety of educational, recreational and social activities. It attempts to meet all students at the level of their interest and to make every activity well worth the time and energy put into it.

### A C T I V I T I E S

*Glee Club.* The College Glee Club, which was organized for the first time last year, has already reached mid-season form, and under the direction of Mr. Elwyn Carter, even surpasses last year's choral group. The Club made its initial appearance this year at the Bazaar for British Relief at the Hotel Biltmore, and was enthusiastically received. The next concert was given at the Christmas Party on December 18th. In addition to several concerts including the Home concert in the spring, arrangements are being made for one or two radio broadcasts. The value of this-kind of activity in terms of fellowship, relaxation and real fun cannot be measured, but it is safe to say it is a real highlight in the extra curricular activities of the students.

*Student-Faculty Luncheons* The weekly student-faculty luncheons continue to be popular. A group of ten first-year students have opportunity to get acquainted with their faculty adviser over a delectable luncheon. In many cases these get-to-gethers have prompted further informal meetings in the homes of faculty advisers.

*Basketball* The varsity basketball team representing the College is now preparing for the inter-medical school league of the Metropolitan area, and for its annual contest with Hahnemann. Considerable interest is being shown in this sport this year and the team is anxious to bring the plaque, which was donated by our Alumni Association, back to our College, as well as to keep possession of the Hahnemann trophy. Inter-class tournaments in basketball and bowling as well as the annual ping-pong tournament are helping to meet the recreational needs of the students.

*Dances* Two all-college dances have thus far been held and were well attended by students, nurses and members of the faculty.

*Medical Art Group* One new project initiated this year is the medical art group: This class, under the leadership of one of the students, and organized specifically for first-year students, has for its purpose the teaching of fundamentals of drawing, particularly medical.

*Sculpturing* The clay sculpturing class, which was so popular last year, is now being organized.

*Forums* A series of forums is being planned for the coming months (pertaining to specific problems of medical students).

The students themselves have a share in the financing of the club program, but to meet the total budget, financial assistance is needed from the Alumni. Contributions in the past have ranged from \$1.00 to \$25.00. Your contribution, be it large or small, is much needed, and it will be gratefully received and appreciated.

---

### "IS THIS PRODUCT COUNCIL-ACCEPTED?"

This is the first question many physicians ask the detail man, when a new product is presented. If the detail man answers, "No," the doctor saves time by saying, "Come around again when the Council accepts your product." If the detail man answers, "Yes," the doctor knows that the composition of the product has been carefully verified, and that members of the Council have scrutinized the label, weighed the evidence, checked the claims, and agreed that the product merits the confidence of the physicians. The doctor can ask his own questions, and make his own decision about using the product, but not only has he saved himself a vast amount of time but he has derived the benefit of a fearless, expert, fact-finding body whose sole function is to protect him and his patient. No one physician, even if he were qualified, could afford to devote so much time and study to every new product. His Council renders this service for him, freely. Nowhere else in the world is there a group that performs the function so ably served by the Council on Pharmacy and Chemistry and the Council on Foods. Mead Johnson & Company, co-operates with both Councils, not because we have to but because we want to. Our detail men can always answer you, "Yes, this Mead Product is Council-Accepted." — Adv.

## PERSONALS

Please send personal items to the News Editor, 1 East 105th Street, N. Y. C.

HELFRICH, Charles H. '84, now retired and living at Passaic, N. J., announces the marriage of his son, Karl H. to Miss Barbara Clarke of Ellsworth, Maine.

HARVEY, Frank T. '93, writes to say that while in the Medical School he was one of the enthusiastic editors of the "Chironian". Dr. Elmer H. Copeland, '93, was the other editor. Dr. Harvey retired in 1938 and is now living in La Jolla, Calif.

DOWLING, J. Ivimey, '95 recently sold his summer home at Bridgehampton, L. I. During the 25 years he summered on Long Island he was connected with the Southampton Hospital and lectured to the nurses on the eye, ear, nose and throat. His association with the Southampton Hospital being now discontinued; he will devote his time to practice in his home town of Albany, N. Y.

LLOYD, Ralph I. '96, was made President of the Academy of Ophthalmology and Otolaryngology in Chicago during October, 1941. Dr. Lloyd also announces his engagement to marry Miss Carrie Fleming of Brooklyn, N. Y.

NOYES, Ward R. '96 (and N. Y. Ophthalmic Hosp. '07) located in Brattleboro, Vt. as Oculist and Aurist, has now associated with himself his son, Leighton Helmuth Noyes, O. L. University of Vermont, '35, and resident surgeon for three years in N. Y. City Hospital, Eye Department. Dr. Noyes says he enjoys reading the "Chironian" and keeping in touch with the "old timers".

PAYNE, James A. '99, is attending physician to the Medical Clinic, Kings County Hospital, Brooklyn, N. Y.

LAWRENCE, William T. '99, of Melrose, Mass. has sailed for Capetown, Africa, where he will serve as Medical Officer in the Mt. Silinda mission station for the American Board of Missions until a

younger doctor can be secured. Dr. Lawrence, who is 66 years of age, has worked previously among the Ndaou people of East Africa.

GAINES, John Strother, 2nd, '03 was a delegate to Fordham University Centenary Celebration on September 15th 1941 from his Alma Mater, Georgetown (Ky.) College '98.

CARLETON, Sprague, '06. Dr. and Mrs. Sprague Carleton announce the marriage of their daughter, Jane Lee, to Dr. George R. Santoro, on Wednesday, January 7th, 1942. The ceremony will take place at the home of the bride, and will be attended by members of both families. Miss Carleton has been doing technical work at the New York Medical College for several years. Dr. Santoro graduated from the New York Medical College in 1939, and is now stationed at Fort Hamilton, N.Y.

SAFFORD, Henry 8. '08. We learn that Dr. Safford has another novel in the making, the title of which will be "Tory Tavern". This is a novel of the Revolutionary Period of American History, and deals with the Great Hempstead Plain on Long Island, and with the spy service of General George Washington. Some of the characters portrayed are Nathan Hale, Major Andre, Benedict Arnold, Ethen Allen, John Jay, Major Rogers and others.

ROANE, Sexton C. '16. Dr. and Mrs. Sexton C. Roane of N.Y. City announce the marriage of their daughter, Althea Marguerite, to Lieut. John Charles Williams of N.Y.C. and Saddle River, N.J. Lieut. Williams is the son of Dr. John Charles Williams. The ceremony took place at Christ Church on July 12, 1941, Rev. Sidney T. Cook, officiating. The couple have taken up residence at Watertown, N.Y. Lieut. Williams is stationed at Pine Camp, N.Y.

PANGBURN, John W. '17, was married on August 30, 1941, at Albany, N. Y., to Mrs. Esther Roberts, biochemist at the New Rochelle Hospital.

LEFKOVITS, Aaron M. '28, became Diplomate of American Board of Internal Medicine, June 1941. He is on extended active duty at Reception Center, Fort Dix, N. J. He has the rank of Captain.

BAXT, Herman, '30. Dr. and Mrs. Herman Baxt are the happy parents of twin boys, John Henry and Richard Philip, born at the Womens Hospital on February 21, 1941.

SCHAM, Manuel J. '31, is a Captain in the U. S. Army Medical Corps, and is stationed at Fort Jay, N. Y. At present he is Chief Medical Officer of the Fort Jay Pre-Induction station, which entails supervision of 35 Medical Officers and the processing of several hundred selectees daily.

LESSER, Albert, '31, was elected to Fellowship in the American College of Surgeons at the annual Congress of the College in Boston, on Nov. 3, 1941. Dr. Lesser is on the surgical service of Dr. Louis R. Kaufman at the Flower and Fifth Ave. Hospital and the Metropolitan Hospital.

WEISMAN, Abner I. '32, is the author of a book recently published, entitled, "You Too Can Have A Baby". Dr. Weisman has recently been elected to Fellowship in the New York Academy of Medicine.

SHAUL, John F. '35, has passed the American Board of Pediatrics examinations given at Boston on October 8th, 1941.

BALOGH, William A. '35 was called to service on February 14, 1941. He is stationed at Camp Livingston, La., 107th Medical Regiment, Captain Co. G. Enroute to Carlisle Barrick's he met Louis lamele, '35, stationed at Fort Bragg, N. C., and reminisced et al. Mrs. Balogh will join the doctor in the near future.

BECKWITH, Sidney A. '35 is now practicing at Stockbridge, Michigan. He is the father of two children.

SMITH, Dean W. '35, who has a good practice at Jackson, Michigan, is the father of a girl and a boy.

DI FABIO, Francis X. '36, at the present time is doing private Anesthesia practice at Parkway Hospital, Lutheran Hospital, New Amsterdam Hospital and the Booth Memorial Hospital.

If they could talk,  
Council Seals  
would say:

“When you see one of us on a package of medicine or food, it means first of all that the manufacturer thought enough of the product to be willing to have it and his claims carefully examined by a board of critical, unbiased experts . . . We're glad to tell you that this product was examined, that the manufacturer was willing to listen to criticisms and suggestions the Council made, that he signified his willingness to restrict his advertising claims to proved ones, and that he will keep the Council informed of any intended changes in product or claims . . . There may be other similar products as good as this one, but when you see us on a package, you know. Why guess, or why take someone's self-interested word? If the product is everything the manufacturer claims, why should he hesitate to submit it to the Council, for acceptance?”
