Dear Graduates:

As I reflect on the past three years I must commend you for your patience, understanding and cooperation so often not characteristic of persons at a fledgling institution. Being located in buildings which do not belong to the College has caused many administrative difficulties. Nevertheless you maintained your enthusiasm and a healthy sense of humor which helped us overcome many of the difficulties.

We, the faculty and administration, feel that we have provided you with a strong and sound educational background that should enable you to grow and assume leadership positions within your field. In return, we have received your dedication and friendship.

I trust this is not good-bye. My door has always been open to you and will remain so with the expectation that we can maintain and nurture the relationship we started at Touro.

I wish you success, and I look forward to your active participation in the Alumni Association.

Sincerely,

Joseph Weisberg, P.T., Ph.D.

To the Touro College PA Program Class of 1993:

Welcome to the Physician Assistant profession. You have just successfully completed, what I believe to be the most rigorous curriculum in the United States. The amount of medical knowledge that you have acquired within two years is usually acquired by a physician in four to six years. You have achieved this feat because of your academic ability and your dedication towards reaching the goal of practicing medicine as a PA.

It is with a great deal of pride, on behalf of Touro College, that I will present you to the College President, Dr. Lander, to receive your diploma at the graduation ceremony on September 19, 1993, at the Touro College Law Center, Huntington, New York. You have demonstrated to the Physician Assistant Program that you will be a caring, competent health care provider. Together, you and the PA program are making a positive impact on the delivery of health care in the United States.

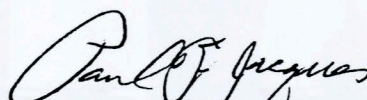

Health care reform is currently the number one topic in the nation, both on a national and state level. Reform is requested by society because of escalating health care costs and inadequate access. Both national and state governments look to PAs as an integrated part of the reform solution. You and your colleagues must keep informed on the issues and support both the American Academy of Physician Assistants and the constituent state and local chapters where you reside. These professional organizations represent your interests and they strive to increase professional recognition for the medical services you are providing.

Receipt of your diploma signifies completion of the intensive education provided to you by the PA program over the last two years. However, it does not signal the end of the educational process. The program has provided you with a working foundation from which to practice medicine, with the supervision of a physician. You will be held to the same standards of care as the physician community and therefore, your continued education is a necessity. The program has a long-term plan for developing a series of continuing medical education seminars to provide you this additional information.

The program staff, faculty and I believe that we have offered you the best possible educational experience. As you leave the rigors of the program behind, I hope that you will kindly think of us, keep in touch, and support us as we continue to educate other individuals to become Physician Assistants.

Sincerely yours,

Paul F. Jacques, RPA-C

To a woman who epitomizes
Selflessness, Integrity, Honor, Love and
Generosity of mind and spirit.

To our Mommy.

Thank you for showing us that with
dedication and determination
the seemingly impossible
can become a reality.

You have taught us all so much these past two years.
Through your incomparable inner strength,
you have showed us all that we should persevere,
despite all the setbacks and all the excuses.

You are an inspiration to all of us
someone to emulate.

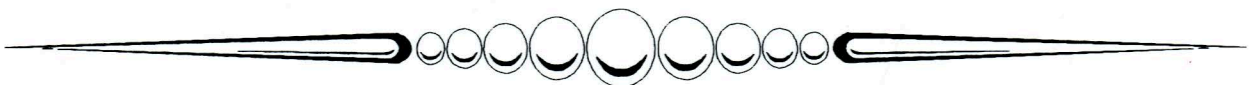

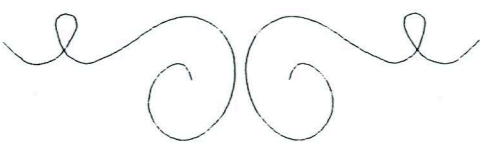

What greater gift could a mother give.
We have been blessed with you.

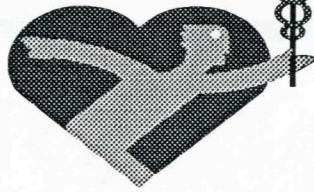

You fought against all the odds
and YOU WON!

Thank you for teaching us all that dreams can come true.

We Love, Admire and Respect you so,

Love Linda and Yehuda

Mamala,

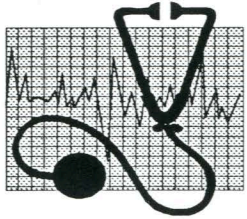

*You're such an inspiration to us all!
Your determination to succeed with excellence, sleepless
nights filled with intense studying, strong and wanting will
and a loving, kind soul has carried you to this great
pinnacle in your life.*

*You have waited so long for this to finally be able to do
what you wanted to do all your life, to be a P.A. -
a professional, to help others in need. To do what you do
best- to comfort others and to heal them.*

*We are so proud of you.
All our friends are so proud of you and the health care

We all must give thanks
to a woman who has given so much
of her self to us.

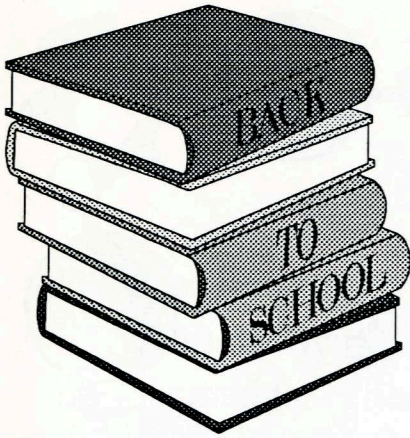

You gave us assurance
when we needed it most;
through your meticulous medical care and
and your genuine compassion.

G-d has sent us an
Angel of Mercy in you.
A complete stranger, so giving, so kind.

You have proved to us that we are truly
all connected.

Thank you.

From all of your patients,
which already were and are to be.

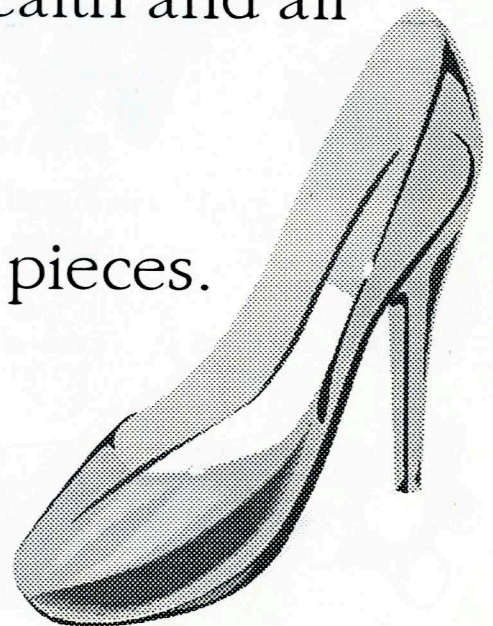

Our Angel Mommy,

You've handled all the challenges in your life with grace and strength, this is no exception. You've flown beyond what was asked of you and landed with honors. All who have met you, respect and admire you, but you're our Mommy and the pride we feel is overwhelming. We're blessed to have you and for the joy you give us! May G-d grant you peace and health and all that brings true happiness.

We love you to absolute pieces.

Our Dearest Babi,

You always dropped everything to do for us kids. The world could be tumbling down around us but you always stopped to tell an endless fairy tales, play chinese checkers, feed the ducks and go for ice cream. You've taken us to the ballet and opera and bought us everything that wasn't nailed down. You tell us how perfectly wonderful we are and how much we're loved and that's priceless.

Thank you.

We're all so proud of you. You set such a good example of working and studying to reach your goal with such vigor and strength. You've checked our ears and throats and even wanted you to examine our eyes, give us our allergy shots, and put our stitches in. Our mommies told us soon, soon. We love you our gracious Grandma and your love and selflessness, not only cover the seven of us, plus all your children but all your patients and future patients.

To Our Very Own P.A.,

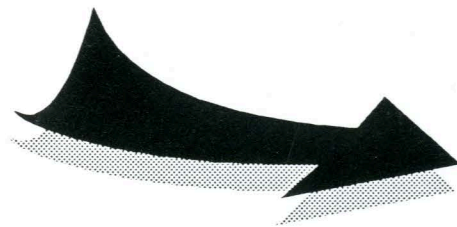

This is just the pituitary of your life,
Your cerebellum surpasses your medulla,
Your arteries and veins pump love to all
you inject,

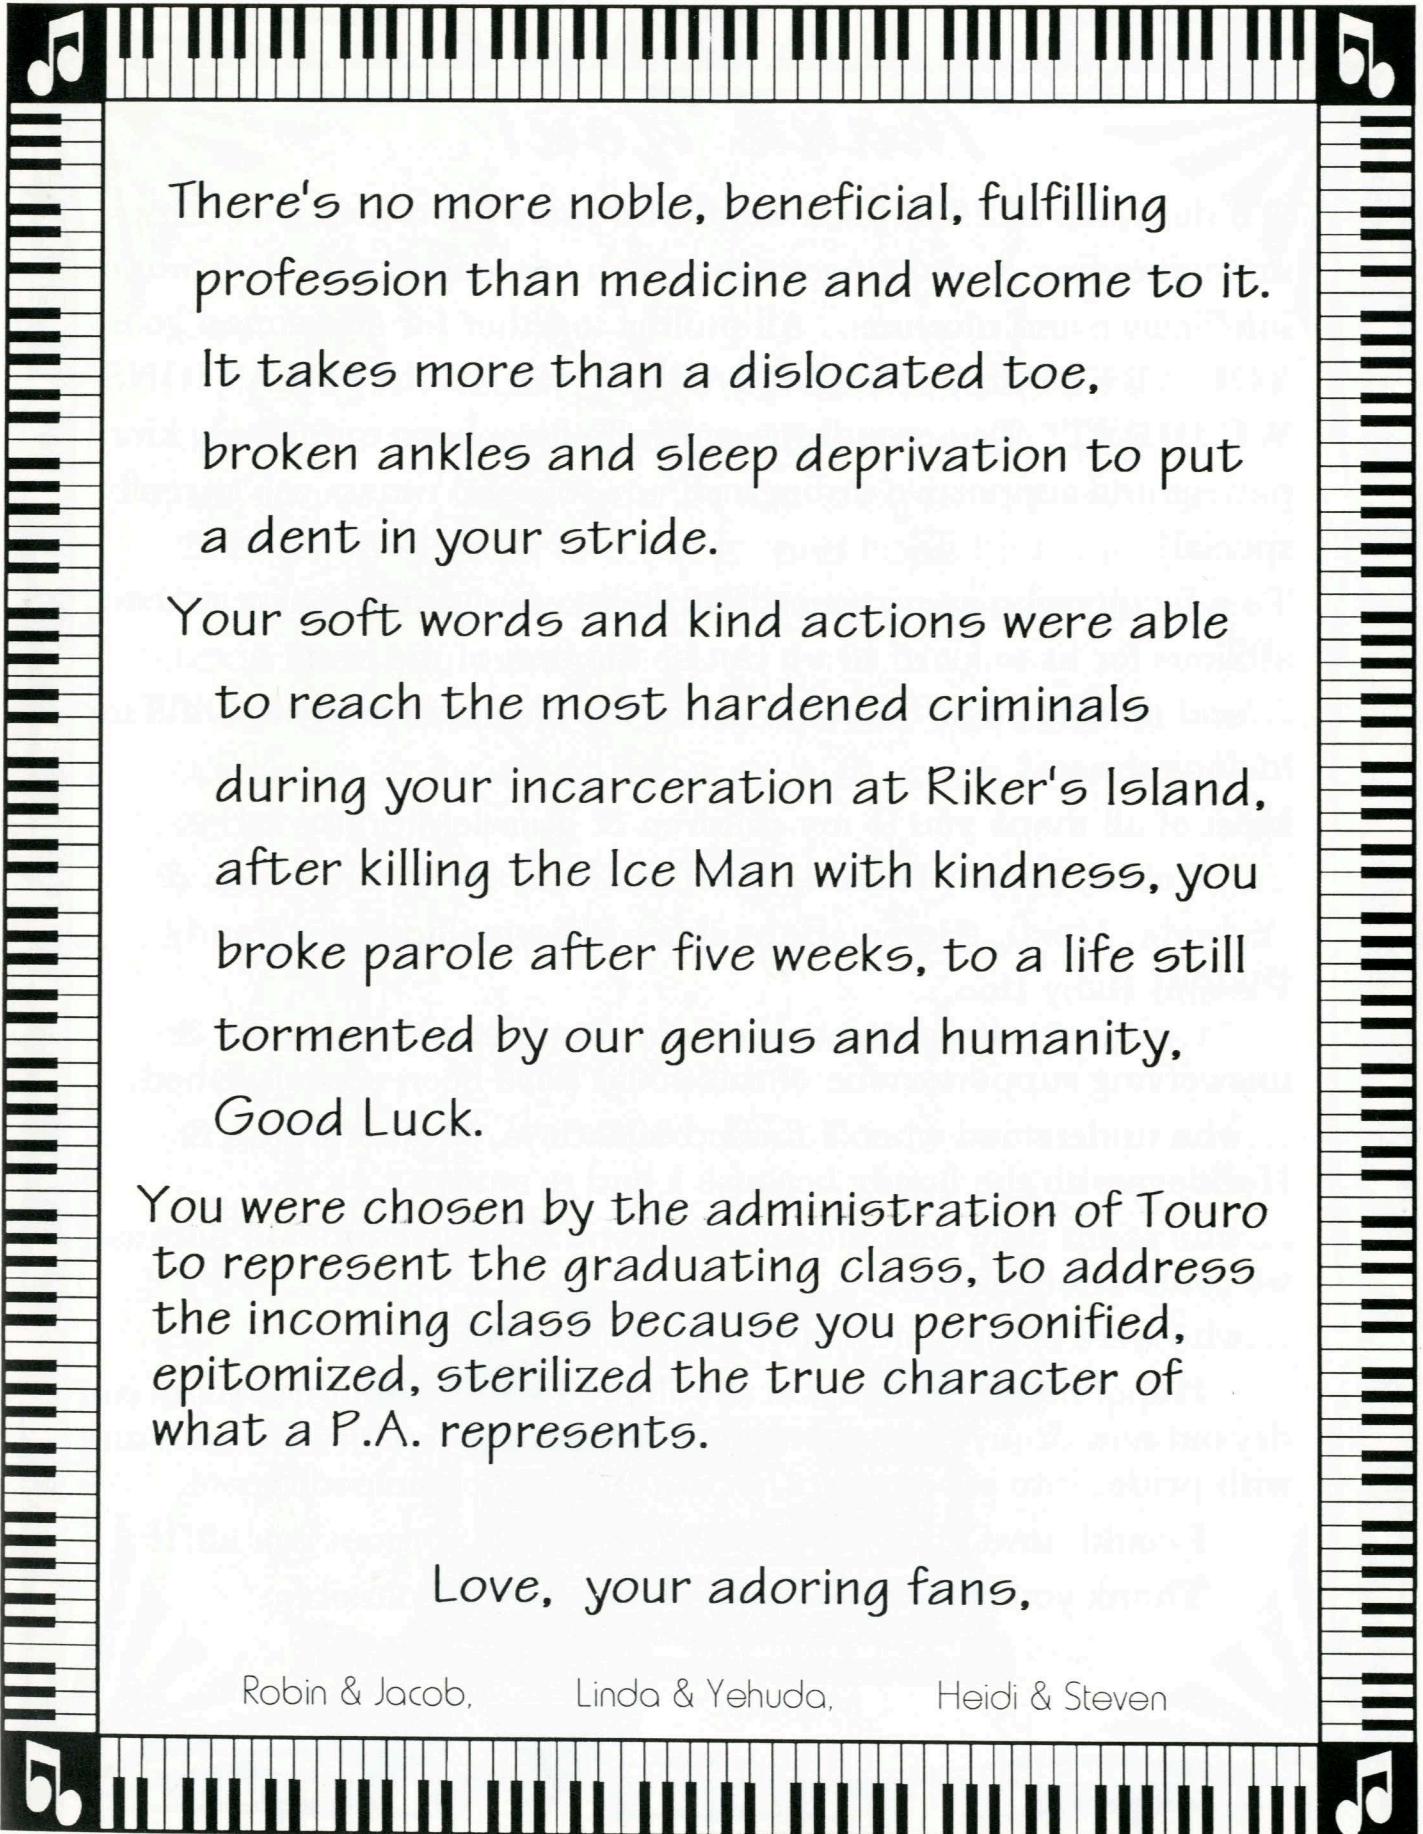

Your neuron dance is all the rage in the
O.R.,

You've saved many a life, of an orange,
with your subdermal injections,

Your foresight and forceps has opened
the way to a brighter future for
mankind,

Your skills with the retractor have
suctioned our lives dry,

There's no more noble, beneficial, fulfilling
profession than medicine and welcome to it.
It takes more than a dislocated toe,
broken ankles and sleep deprivation to put
a dent in your stride.

Your soft words and kind actions were able
to reach the most hardened criminals
during your incarceration at Riker's Island,
after killing the Ice Man with kindness, you
broke parole after five weeks, to a life still
tormented by our genius and humanity,
Good Luck.

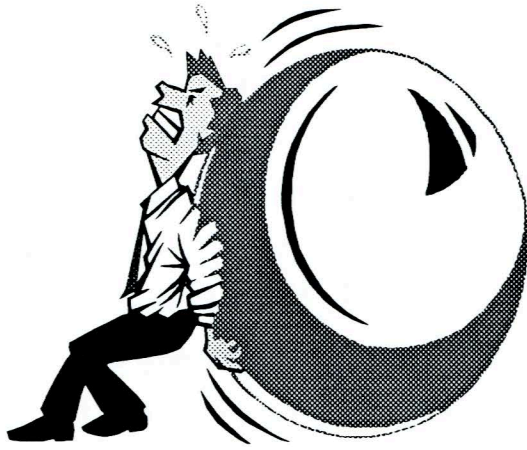

You were chosen by the administration of Touro
to represent the graduating class, to address
the incoming class because you personified,
epitomized, sterilized the true character of
what a P.A. represents.

Love, your adoring fans,

Robin & Jacob,

Linda & Yehuda,

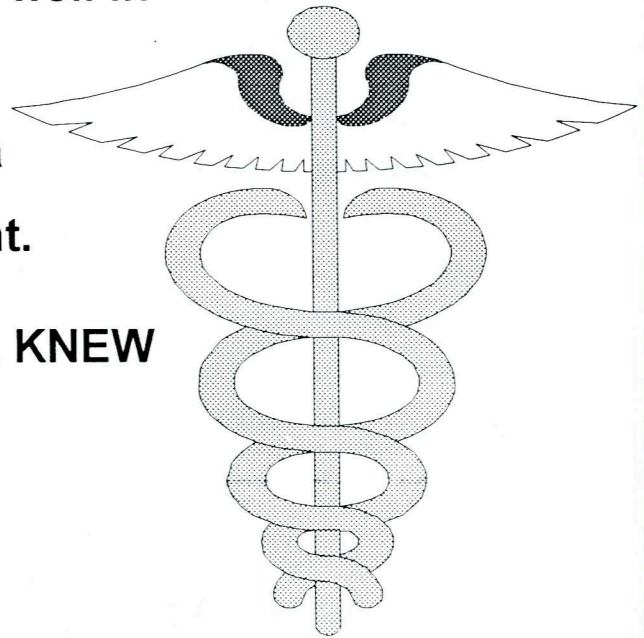

Heidi & Steven

Mazel Tov Isy!!
We knew you could do it!
Best of luck always!

Shimov, Devorah, & Chaya Mushka

Dearest Isy: (to 120 years)

An appropriate analogy by your wife:

As you know from observation, pregnancy is a long, hard haul. Just when you overcome (or outgrow) one obstacle, another one manifests itself. It seems endless. Then finally, with only the agony of labor to get through (even with an epidural), not mention the rocky recovery - You've given birth! Once you have that child it's all worth it.

After Tovie, remember I said, "Isy, next time you get pregnant." Some thought you could not overcome the obstacles facing you to even enter PA school. You took a dream that we made for ourselves in the darkness and you struggled through every symptom, confronted every ache and pain and you're done! With your hard work and dedication you've given birth to a new life for all of us and a new reality. I look forward to sharing the rest of this adventure with you.

Just as you don't really know what it is to be pregnant and labor, like a good spouse, you can only stand on the sidelines murmuring sympathetic or annoying encouragement (depending on my mood), and saying to yourself, "Boy, I sure am glad that's not me." I too have stood on the sidelines of your endeavor watching, encouraging and annoying you and saying to myself, "I know I can't really imagine what it's like, and boy, am I glad that's not me."

I'm incredibly proud of you.

Perhaps, after all it is a poor analogy. You never got to put your feet up and let things slide or got me to study for you. PA school was a much more demanding "pregnancy" than mine were. Forgive me, but it took me weeks to think of what to say. Three of the kids were in the room with me. I was finally woken up so many times that when they finally all settled into deep sleep I was wide awake. So I thought, I know, I'll put myself to sleep by thinking of what to write in Isy's ad - that always draws a blank.

Now here I am at 5:30 a.m. composing your ad. Poor analogy or not, let's go with it since I don't want to miss the deadline.

In closing, I do think it is only fair that your pregnancy, labor and delivery is 29 months long (I'll be generous and include prerequisites and studying for the board exam). I'm still three up on you - so far - PLEASE, don't try to even the score!

LOVE YOU MADLY,

Aliza Raya, your partner in time

*Mazel Tov Isy
on your graduation.
We are so proud of
your accomplishment.
Lol zeine mit mazel -
May you motzliach in your

To Totty: (known as Isy during his time off)

Twenty-seven months of grueling schooling,
(Those five prerequisites we are including.)
Long hours of deep concentration
the amount of knowledge absorbed is beyond contemplation.
Coming home after a long day of classes
no peaceful haven, but the clamoring masses.
Six children of varying ages
subject to your nervous rages.
Trying hard to keep your cool
while we tell you the details of our days in school.
Demanding your attention till you command us to be gone
leaving you to study from midnight till dawn.
Scraping along on so little sleep tries your mellow disposition,
while Shloimie and Nechemia climb into your bed so you can't
find a comfortable position.
Luckily Sarala is there to help you study and quiz you for tests.
You always work hard and give your very best.
Riki's always there with her sweet encouragement and loving smile
rejuvenating you with her lack of guile.
When your energy is seriously flagging, and you're starting
to slow
Shuie to the rescue - raising your blood pressure to the boiling
point, you're raring to go.
Tovie is a two year old with a lot to say,
her present to you is, she thrown her paci away.
We've all survived your classes and rotations
can't believe we made it to graduation
Now that you are finally done
we hope to have a lot of fun!
A promise made so very long ago,
on that first paycheck, to La Kasbah we will go!!!

*With love & pride from
your cheering section,*

Sarala, Shuie, Riki, Nechemia,
Shloimie & Tovie

Humor in Medicine

The doctor was busy, and it took hours to check all of his patients. Down to Mr. Smith, the doctor apologized to the old man, saying, "I hope you didn't mind waiting so long." Mr. Smith said, "Its a shame you couldn't see my illness in its early stages."

Dr. Carver still made house calls. This one afternoon he was called to the Tuttle house. Mrs. Tuttle was in terrible pain. The doctor came out of the bedroom a minute after he'd gone in and asked Mr. Tuttle, "Do you have a hammer?" A puzzled Mr. Tuttle nodded, went to his toolshed, and returned with a hammer. The doctor thanked him and went back into the bedroom. A moment later, he came out and asked, "Do you have a chisel?" Mr. Tuttle complied with the request. In the next ten minutes, Dr. Carver asked for and received a pair of pliers and a hacksaw. That last request got to Mr. Tuttle. He asked, "What are you doing to my wife?" "Not a thing," the doctor said. "I can't get my instrument bag open."

A pretty nudist went to a doctor, who examined her and said, "Young lady, you are pregnant." The nudist said, "That's not possible. We practice sex only by looking." The doctor said, "Somebody there must be cockeyed!"

A woman rushes into a doctor's office, "Doc," she says, "what should I take when I'm run down?" The Doctor says, "The license number."

Doctor, are papayas healthy?"
"I never heard one complain!"

A gynecologist doesn't have it easy. At the end of the day he must be bushed!

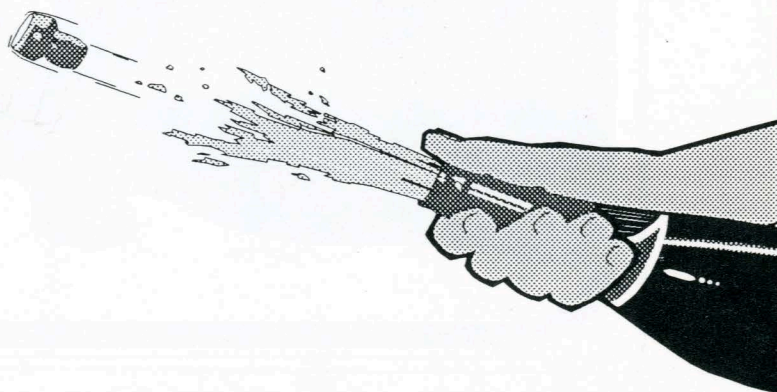

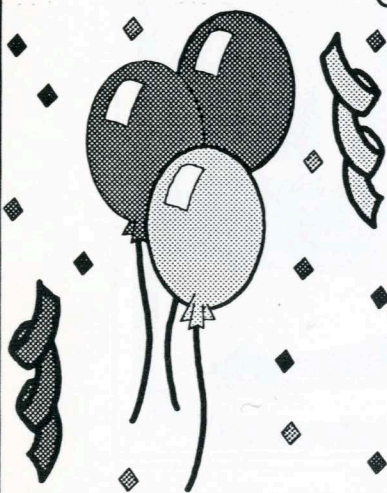

A specialist is a doctor with a smaller practice but a bigger home!

Al was finding it difficult to sleep at night. He begged the doctor to give him a strong sedative. The doctor obliged, but told him to take only half of the prescribed pill. To make sure he slept, Al took a whole pill and went to sleep.

As dawn came up, Al awoke. He felt refreshed. Cheerful, he went to work. As he walked into the office, he saw the boss and said, "I'm ready. I slept like a log. I jumped out of bed like a kid this morning." The boss said, "Nice. But where were you yesterday?"

To the Class of 1993 Physician Assistant Program,
Faculty & Administration,
CONGRATULATIONS!!!!!!!!!!!!!!

My Love For You

My love for you
Is like the sky,
With dreams that soar
And hopes that fly.

It's like a
Never ending ocean,
An everlasting,
Deep emotion.

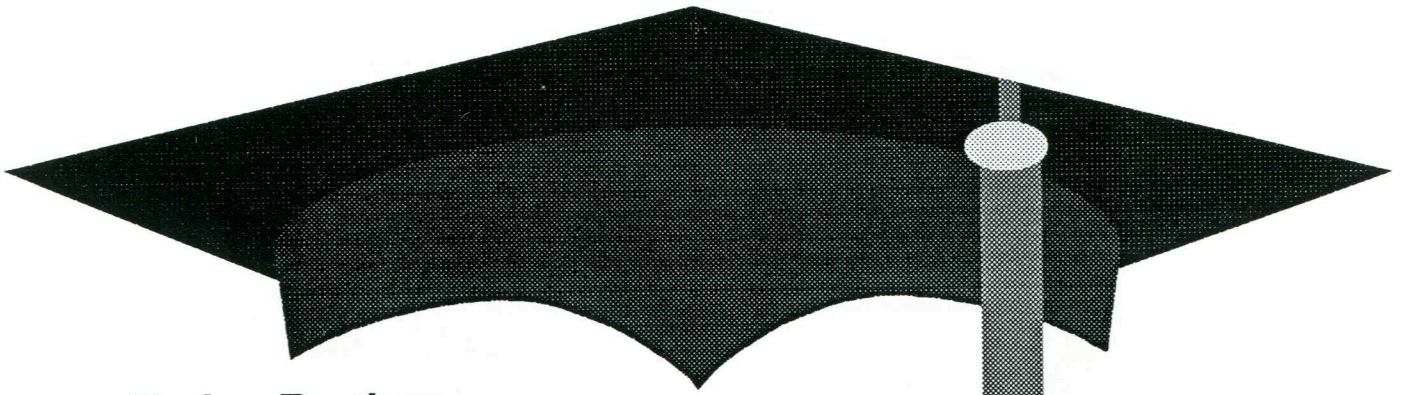

It has the tenderness
Of spring,
The charm that warmth
And laughter bring.

It has the simple
Strength of stone.
It shields us from
A life alone.

It's ever growing,
Ever new.
It's always there,

Let each single voice live its own lush life,
and, at the same time,
they play a part of a strictly ordered wholeness.

This is exactly as it is with us humans.
Each of us is one single voice; a miracle of individuality.

And when we re-discover our profound and true individuality
We also remember our link to the wholeness
Our belonging to Life, The Earth and to Each Other.
