ADDING ACHIEVEMENT TO ACHIEVEMENT

1962 began auspiciously for the College. It was with considerable pride that we were able to announce that the College had more than \$7,000,000 in research grants firmly committed as the year began, not including training grants or anticipated funds from numerous research grant applications.

A medical school's research program is, of course, only one index of its standing, but I think it is highly significant that our research budget has grown into the millions in a few short years.

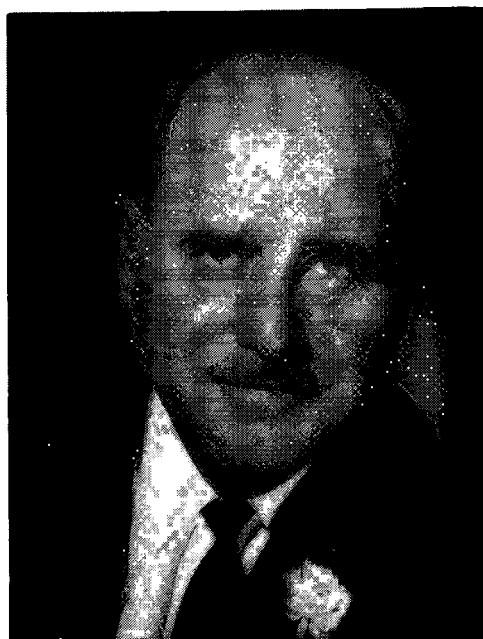

Important work is being done by our faculty in heart disease, in cancer studies, in children's afflictions such as cerebral palsy, in rheumatoid arthritis and other connective tissue diseases, in diabetes and in a host of other vital areas.

Such work is the hallmark of a distinguished faculty. And a strong faculty means a strong teaching program. Since education is the College's primary concern, I believe we have cause for deep gratification over the College's progress.

I know that everyone in the College family is conscious of its forward march. Alumni have vigorously demonstrated this awareness in their outstanding support of the 1961 Annual Fund. I am sure we will do so again this year, and in even greater numbers.

It is in our power to add achievement to achievement, giving new lustre to the name of New York Medical College as we broaden and deepen the scope of its service to medicine and to humanity. There is no limit to the College's potential *if we but match our faith to our vision and our actions to our faith.*

—RALPH E. SNYDER, M.D.
President and Dean

FROM THE ALUMNI PRESIDENT

This marks the third year that I have had the privilege of serving as President of our Alumni Association." What has made it such a rewarding experience is the growth of alumni activity and participation in this period.

Alumni interest has been stimulated by the College's rapid progress in many areas of service to the community and the nation. In turn, our interest, as reflected in our support of the College's programs, has enabled it to make further strides forward.

One of the most significant ways in which we have aided the College is through our participation in its Annual Fund. We can be particularly proud of the substantial number of alumni who became members

of the Century Club, and of the leading role played by alumni in the formation of the 400 Club. Last year, the gifts of alumni made up the largest total provided by any group in the campaign. More than a third of all alumni contributed to the Fund. This year I hope we may do even better.

The 1962 Annual Fund is now under way. An active committee has been organized and will be in touch with each of us in the near future. Our gifts make possible a strengthened faculty, new teaching programs, expanded research. All these spell a greater role of leadership for our College. I know that when you are called upon you will want to do all you can to help.

My thanks and very best wishes.

CARL C. SALZMAN, M.D. '24

Surgical Team Saves A Life In The Emergency Room

On Tuesday evening of January 30, 1962, a seventeen year old boy was held up by hoodlums on East 110th Street, robbed of the 53 cents he had in his pocket, and stabbed in the chest. The boy was John Micallef, a stock clerk, whose family came to this country from Malta two years ago to settle in New York City. He was brought to Metropolitan Hospital by his brothers, in an apparently lifeless state. Directed by the attending surgeon, Dr. Sheldon O. Burman, who fortunately happened to be at the hospital, a team of surgical residents performed an extraordinary medical feat and brought the boy back to life.

It was approximately 8:00 p.m. when Dr. Mark Anapoell, chief surgical resident (class of 1957), Dr. John DeAngelis (class of 1957) and Dr. James Morrissey (class of 1960) were interrupted in their ward duties by a call from the emergency room notifying them of John Micallef's arrival. They rushed down to the emergency room where Dr. Tahere Bagheri, the resident on duty, was already massaging the heart externally. The boy had neither a palpable pulse nor audible heart beat. Dr. Anapoell opened the left chest and began to massage the heart. Dr. DeAngelis inserted an endotracheal tube for mouth-to-tube breathing. While Dr. DeAngelis inflated the lungs, Dr. Morrissey performed three cutdowns and, with the aid of several interns, injected plasma and dextran into the veins; 4,000 cc. of fresh blood were supplied.

After several moments of massage the heart resumed beating of its own accord. A hole in the left atrium, however, had become evident. Dr. Anapoell placed his finger over the hole to prevent hemorrhage. Hemostasis was maintained in this way until the blood pressure and pulse returned to normal, at which time John was put to sleep by means of the endotracheal tube previously inserted. The pericardium was incised widely, and clotted blood evacuated. The hole in the heart was sutured, carefully avoiding the left anterior descending coronary artery which was next to the hole. The left chest was evacuated of massive liquid and clotted blood and the chest cavity explored. A penetrating wound was discovered in the left lung and one large artery was hemorrhaging. Both the lung and the artery were repaired with sutures. The lung was expanded and a thoracotomy tube

JOHN MICALLEF

His life saved by Metropolitan surgical team.

SURGICAL TEAM (*Continued from Page 5*)

placed in the left chest, after which the chest was closed in layers. A dry sterile dressing was placed over the thoracotomy incision and around the thoracotomy tube, and John was removed to the recovery room.

He regained consciousness in the recovery room and, when his condition was explained to him, John asked to see a priest. During the following two and a half days he was attended by the team of residents, who took turns watching at his bedside 24 hours a day. He was later transferred to the male surgical ward for his period of recuperation. Soon he was able to walk around without difficulty, eat normally, and have his picture taken by the newspaper photographers. The sutures were removed on February 12th; the following week, after having made a remarkable recovery, he was transferred to the department of medicine for final observation. His discharge from the hospital was expected to take place shortly afterwards.

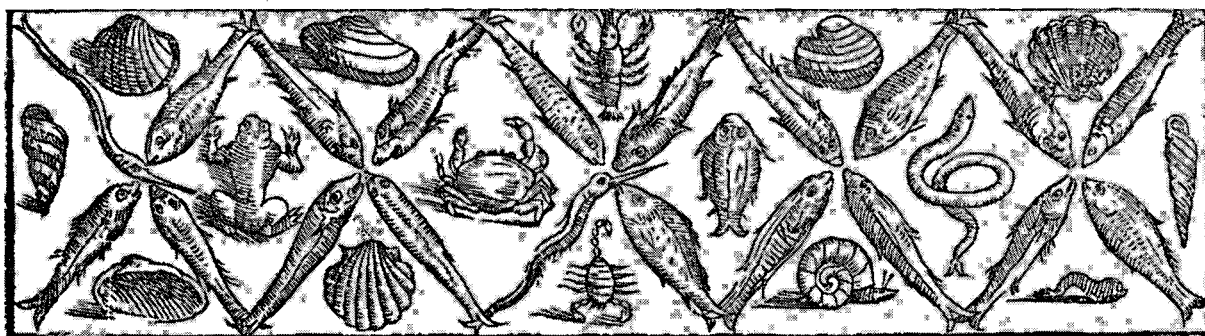

The doctors and nurses who contributed to this brilliant cooperative effort are members of an emergency service at Metropolitan Hospital which takes in over 120,000 active cases each year. A highly qualified team of residents is on call 24 hours a day to attend cases such as this, in which the life of a patient may depend upon the quickness and competence of their performance.

From left: Dr. Mohamed Bagheri, Dr. James French Morrissey, patient John Micallef, Dr. John DeAngelis, and Dr. Mark Anapoell.

WOMEN IN MEDICINE

THREE PROFILES

As far back as in the days of antiquity women had a place in medicine, if only a symbolic one: health and medicine were often the domain not of gods, but of goddesses, such as Hygeia and Demeter in ancient Greece, Isis in Egypt, Immortality in Persia. There have been medical women in nearly every era since—in the Middle Ages St. Hildegard von Bingen wrote valuable medical treatises, Marie Colinet was a noted physician of the Renaissance, Anna Moranda Manzolini was elected professor of anatomy at the University of Bologna in 1760. In the 19th century, women doctors of fortitude and perseverance struggled against the seemingly incontrovertible laws of tradition to gain admittance to medical colleges and to establish themselves in practice. An English doctor, James Barry, who took his Doctor of Medicine degree at Edinburgh in 1812, served courageously as a surgeon in the battle of Waterloo and was later promoted to the highest medical position in the service, inspector general of hospitals. At his death, post-mortem examination revealed the astounding fact that Dr. Barry had been a woman.

Today, women who feel the calling to become doctors need not go to such lengths as Dr.

Barry to fulfill their ambition. In the last 40 years the number of women graduates of medical colleges in this country has averaged about five per cent of the total; only two medical colleges in America, Jefferson and Dartmouth, still exclude women. In medical research, teaching and practice today, women have distinguished themselves in a variety of specialties and filled many prominent positions.

Dr. Reta Adams (1936), Dr. Jane C. Wright (1945) and Dr. Cyrille R. Halkin (1945), alumnae of New York Medical College, are each involved in quite different aspects of medicine. Dr. Reta Adams' entrance into the field of medicine was rather an unusual one. She had always felt a great interest in ancient civilizations, especially that of India.

When she was given the opportunity to go to India, it was on the condition that she come equipped with an M.D. degree so that she could "do something useful." And indeed she has been doing something useful in India for a number of years: in a country where the need for medical care and instruction is a pressing one, Dr. Adams, as a physician, is helping to achieve an important goal.

The interest in ancient civiliza-

DR. RETA ADAMS

DR. JANE C. WRIGHT

WOMEN IN MEDICINE (Continued from Page 7)

tions, which was Dr. Adams' introduction to medicine, at one point nearly enticed her away from it. Accustomed to poring over ancient medical treatises in her leisure hours, Dr. Adams decided to put to practical test some of the ancient recipes she had been reading about. The result of her curiosity was the offer of a fellowship in chemistry from Princeton University. "But," says Dr. Adams, "alas and alack I had not that desire"; although it had launched her into medicine at the start, scholarship could not take the place of practice.

Like so many women doctors today, Dr. Adams responds with a touch of surprise at any reference to the "problem" of being a woman doctor. "I don't think I have ever thought as of myself other than a physician," is her reply. "I have been in private practice, institutional work, a consultant in psychiatry, and have traveled considerably; but I can't remember ever thinking of myself as a woman first. The work is there and I just do what comes to me as best I can. I can't imagine going through my life in any other field than medicine."

Dr. Jane Cooke Wright has dedicated herself within another, vastly important area of medicine, that of cancer research. Adjunct Associate in Research Surgery in charge of cancer research at the N.Y.U.—Bellevue Medical Center, Dr. Wright directs the laboratory and clinical research procedures, the aim of which is to discover chemical agents effective in the treatment of human cancer. This research is based on the study of human tumors both in their natural setting—the human body—and in test tubes.

With a staff of five doctors, a tissue culturist, a

hematologist and three secretaries under her direction, Dr. Wright is constantly called upon to answer somebody's question about something, whether it be one of the doctors' queries about medication for a patient, or the tissue culturist's request for further information on a particular tumor, or the secretary's question about what should be said in this letter and by the way has Dr. Wright signed the other batch on the desk and if not would she please do so.

Actually Dr. Wright had been glancing over the letters, signing them and putting them aside while she was being interviewed, and answering all the questions put to her, and at the same time the telephone receiver seemed to be in her hand, and the buzzer ringing once, twice, three times. Oddly enough there was no trace of harrassment on her face. Sunlight streamed in through the window of her office, catching the highlights of the cherrywood desk and brightening the mustard color of the rug.

This, however, is only one aspect of Dr. Wright's varied professional life. Recently she was engaged in a very different sort of activity: a medical safari in Kenya and Tanganyika. In 1957 Dr. Wright toured Ghana as a member of the team sent out by the African Research Foundation to make a survey of the country's health conditions. The African Research Foundation, in cooperation with local governments, aims to provide medical care, education and research facilities in areas of Africa where these essentials are lacking. On the tour of Kenya and Tanganyika, which took place during February and March of 1961, Dr. Wright was a member of the Foundation's mobile medical unit which is, in effect, a hospital on wheels, fully equipped with medical and surgical supplies, x-ray materials, as well as running

DR. CYRILLE R. HALKIN

WOMEN IN MEDICINE (Continued from Page 9)

water and electricity. Mobile medical units solve the problem of medical care for large numbers of people in Africa, bringing hospitals to those who cannot travel the great distances to central areas.

The medical team camped out at night: "We slept in sleeping bags in tents and kept the fires going all night to keep the wild animals away." During the day patients came to the unit for treatment and individual instruction; laboratory studies were made, medicines administered and food supplements given to the severely undernourished children. Dr. Wright reports from her first hand experience that the African Research Foundation "is accomplishing right now a great work at amazingly low cost. What they could do with more support is a thrilling prospect."

At home, Dr. Wright contends with other vastly important problems, those concerning husband and children. "I must get out this afternoon and buy the girls some dresses," said Dr. Wright at one point, glancing ruefully at the papers before her on the desk. Alison and Jane are 12 and nearly 14 years old, respectively. Dr. Wright's husband, Mr. David Jones, a lawyer, is deputy commissioner at the New York City Department of Correction. They live in New York City, where Dr. Wright herself was born and raised. After she had completed her liberal arts education at Smith College and taken her medical degree at New York Medical College, Dr. Wright did her internship and first year residency at Bellevue. When asked how she first became interested in cancer research Dr. Wright replied that it was during her two years of residency at Harlem Hospital. "My father was head of cancer research there, and he put me right to work."

For Dr. Wright the day might begin at 7:30 a.m., when she leaves the house, and continue until 10:30 p.m. without a break between appointments, meetings, talks she might be presenting, and various other activities in addition to her work at Bellevue. Dr. Wright is a member of numerous societies for which she is frequently called upon to speak or give a paper. In response to a query about time for herself, a holiday now and then, Dr. Wright whispered, "We're going to Puerto Rico for a week with the children. That's why I have to buy them dresses this afternoon. But, shhhhh, don't print that."

Clearly our women doctors ask very little time for themselves, and consequently get very little. But it is clear as well that the work they are doing is intensely satisfying and could hardly be considered sacrifice.

WOMEN IN MEDICINE (Continued from Page 10)

During Dr. Cyrille Halkin's one day a week at the Mental Retardation Clinic at Flower Fifth Avenue Hospital, there is rarely a free moment in which to catch one's breath between conferences, patients and telephone calls. The Clinic, founded in 1949 by Dr. Margaret Giannini and Dr. Halkin, is the first of its kind in this country, and perhaps in the world. The multidisciplinary approach to the problem of mental retardation in children is carried out by the team of pediatricians and psychiatrists at the Clinic, who provide diagnosis and treatment for the children as well as counseling for the parents. Individual casework is included in both the diagnostic and treatment plans.

During the rest of the week Dr. Halkin is kept equally busy at the Children's Center, a Department of Welfare home for abandoned children and children of broken homes, where she is attending pediatrician and directs the departments of preventive medicine and pediatric care. The Children's Center provides school, dormitory and library facilities for the 500 children who are continually in residence there. Besides her work at the Mental Retardation Clinic and the Children's Center, Dr. Halkin serves in the pediatrics clinic at Metropolitan Hospital, and, as she puts it, "in between I try to sandwich in a little private practice."

But this, of course, is not all: there are husband, Dr. Ralph Schwartz, a pediatrician on the staff at Flower Fifth Avenue Hospital, son Scott, 12, daughter Rose, 6, and naturally a busy family life. Scott attends the Horace Mann School, Rose the Lycée Française. "Rose is very gay and happy-go-lucky; at the Lycée Française she gets some healthy discipline. Scott is a year ahead of himself at school. They're both—oh," said Dr. Halkin, catching herself guiltily, "mothers aren't supposed to boast about their children."

When she was asked how women doctors manage it all—medical practice, home and family—Dr. Halkin explained that it takes a great deal of pre-planning and a personality which responds to order and discipline; domestic help is necessary as well. "You have to plan everything according to schedule, and it works. But of course if one thing goes wrong—poof, the whole schedule is topsy turvy."

Do you really have enough time with the children, was the next question. Dr. Halkin replied that both she and the children value the time they spend together more than they would if she were at home all day, so that though there is less time, it is more in-

tense and meaningful. She arranges to be finished with her hospital work and calls by four or five in the afternoon, when the children come home from school. Summers are spent together at the family's summer home in the Catskills. "We engage in pleasant pastimes, such as repairing the roof, cleaning out the cellar, and so forth." Dr. Halkin has some spare time occupations of her own: painting, sculpting, and now and then she "indulges in buying paintings and antique porcelains."

Although medicine is often a family tradition, carried on by son or daughter in each generation, Dr. Halkin comes from a family of scholars. Two of her uncles have their doctorates in Semitic languages, and one is a well known Hebrew poet, teaching at Columbia. Dr. Halkin herself, after taking the usual aptitude tests, was strongly advised to go into the academic world, specifically in romance languages, and by all means to avoid the scientific fields. "That's how accurate these tests are," she laughed. "I wouldn't change medicine for anything." The children, however, seem to be completing the circle. Scott is already something of a scholar, and Rose will probably continue with romance languages.

Dr. Halkin did her undergraduate work at Hunter College and the University of Michigan; after taking her medical degree at New York Medical College she did her internship at Beth Israel Hospital, residencies at Willard Parker Hospital and Sydenham Hospital, and completed the graduate course at New York Medical College.

About her decision to become a doctor, Dr. Halkin explained that when she was considering medicine there were only two other fields open to women, business and teaching, and neither appealed to her. "I've always felt that women should have interests outside the home. It may sound sentimental, but I wanted to achieve something as a woman." Her work in pediatrics is extremely satisfying. To watch a child growing up and witness the continuity of life is to her a thrilling experience. At the Children's Center, for example, the work is particularly rewarding. "These children are the most underprivileged group in our society. Often they come to us after having witnessed such profoundly disturbing scenes at home that they can hardly even speak. They make a tremendous adjustment, and when they are ready, return to their now rehabilitated homes, or are given foster homes. Every drop of effort in this work is part of the long hard struggle, and in its way is a contribution to society."

Alumni Work To Break '61 Annual Fund Record

With campaign plans set and a committee of 85 organized, the 1962 alumni drive for the College's Annual Fund moved into high gear this month.

Dr. Saul A. Schwartz, who headed the outstandingly successful 1961 effort, is serving again as Alumni Campaign Chairman. He said the goal of the alumni campaign would be to "win the support of the great majority of alumni for the College's programs of growth and progress." Last year, the number of alumni contributors to the Annual Fund was almost doubled. A third of all alumni were enrolled as contributors.

To make another major advance toward the ultimate objective of 100% participation, the alumni campaign committee will visit or telephone at least 2500 alumni, Dr. Schwartz said. A series of telephone squad meetings will be held at the College for this purpose.

With the aid of telephone meetings, the alumni committee hopes to record major gains over 1961 by the time of the formal Kick-Off Dinner of the cam-

paign, which will be held on March 28 at the Harvard Club.

Alumni launched their drive at an organizational meeting at the College on February 8th. At that meeting, Dr. Ralph E. Snyder, President and Dean, congratulated alumni on their 1961 success and urged an all-out effort in 1962.

He reported on the College's plans for development into a medical university, noting especially that the College now has petitions before the Board of Regents for the establishment of a Graduate School of Medical Sciences, where training will be offered in such fields as biochemistry, physiology and pathology.

As one significant indication of the College's progress, Dr. Snyder pointed out that the College had more than \$7,000,000 in research grants firmly committed as 1962 began.

Dr. Snyder presented Dr. Schwartz with a plaque in appreciation of his services as 1961 Alumni Campaign Chairman to the applause of the assembled alumni.

From left: Dr. Ralph E. Snyder, Dr. Carl C. Salzman, Dr. Leonard P. Wershub, Dr. J. Clifford Hayner.

1962 CAMPAIGN CHAIRMAN

DR. SAUL A. SCHWARTZ

Dr. Salzman recently announced the appointment of Miss Judith Goode as executive secretary of the Alumni Association. Miss Goode, a Bard College alumna, succeeds Mr. Gordon Leinwand, whose resignation was effective on January 15, 1962. Alumni are invited to address their correspondence to Miss Goode at the alumni office should they require any information regarding alumni activities. Miss Goode will also act as executive editor of THE CHIRONIAN and welcomes alumni news and any other material for the magazine which might be of interest.

A NEGLECTED HERO

On June 2, 1881, a young intern on the house staff of Metropolitan Hospital died of typhus fever.* He was Charles N. Brantigan, graduated from New York Medical College (then New York Homeopathic) in the class of 1881. Although few of us would recognize his name, Dr. Brantigan was the first person associated with the College to give his life in the line of duty. He was, in a sense, a hero; surely his memory deserves a little praise.

—DR. MARTIN E. SILVERSTEIN
Archivist

Ob-Gyn Society Looks Forward To Future Growth

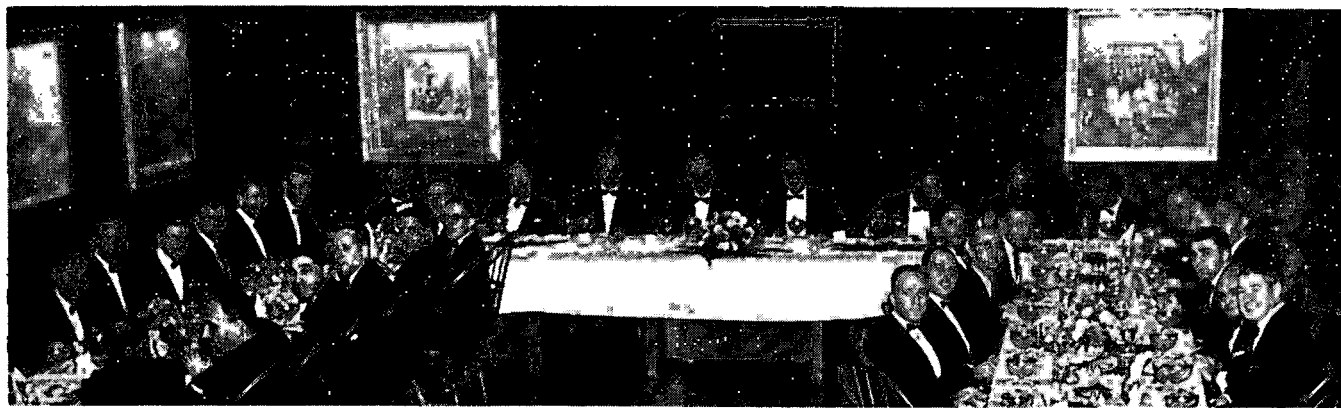

On December 7, 1961, the Obstetrical and Gynecological Society of New York Medical College held its first annual dinner meeting. The meeting was conducted in a spirit of hopefulness in view of the Society's continued growth and its plans for future activities.

The Society was founded by Dr. Myron Gordon and Dr. John G. Mussio in 1959 for the purpose both of maintaining interest in the department of obstetrics and gynecology, and creating among its members a productive exchange of ideas and experience gained through practice and research. Originally composed solely of ex-residents of the department, the Society's membership was expanded last year to include alumni of the College who had completed their training in obstetrics and gynecology at other institutions. The proposition to include alumni grew out of a realization on the part of the Society's established members that alumni who had studied obstetrics and gynecology at the College retained a sense of loyalty to the department which merited their participation in the Society. It is believed by the officers that this is the first organization of its kind to include alumni of the College as well as ex-residents of the department. Membership in the Society is divided into three groups: active members, who are ex-residents; associate members, who are alumni and members of the departmental staff; honorary members, doctors in the field chosen for special recognition.

Presiding at the meeting, Dr. Myron Gordon introduced as guest speaker Dr. Allan C. Barnes, Chief of Obstetrics and Gynecology at Johns Hopkins Hospital and editor of the American Journal of Obstetrics and Gynecology. In his talk entitled "Iron Curtain Obstetrics and Gynecology", Dr. Barnes presented his observations on the practice of this specialty in the Soviet Union. Dr. Ralph E. Snyder, President and Dean, addressed the gathering and expressed his wholehearted approval of organizations of this nature, emphasizing their importance to the welfare of the College. The Society elected as its first honorary member the senior ex-resident and Professor Emeritus of the Department, Dr. Leon S. Loizeau, who entertained the group with reminiscences. Dr. Allan C. Barnes was elected to honorary membership as well.

That the future of the Society is one of rapid development was evident in the status and projected plans of the Department outlined by the chairman, Dr. Martin L. Stone. There are now 20 residents and fellows in training with the Department while a relatively short time ago there were only six. This portends a rapid increase in membership in the future. In addition, the Society has a wide geographic representation, including members in California, Arizona, Connecticut, and Illinois. Among the projects proposed for the future is a travel club which would hold meetings in various parts of the country, providing members of different locations with the opportunity to acquaint fellow members with their home grounds.

The next meeting of the Society will be held in April, 1962, at the annual meeting of the American College of Obstetricians and Gynecologists in Chicago.

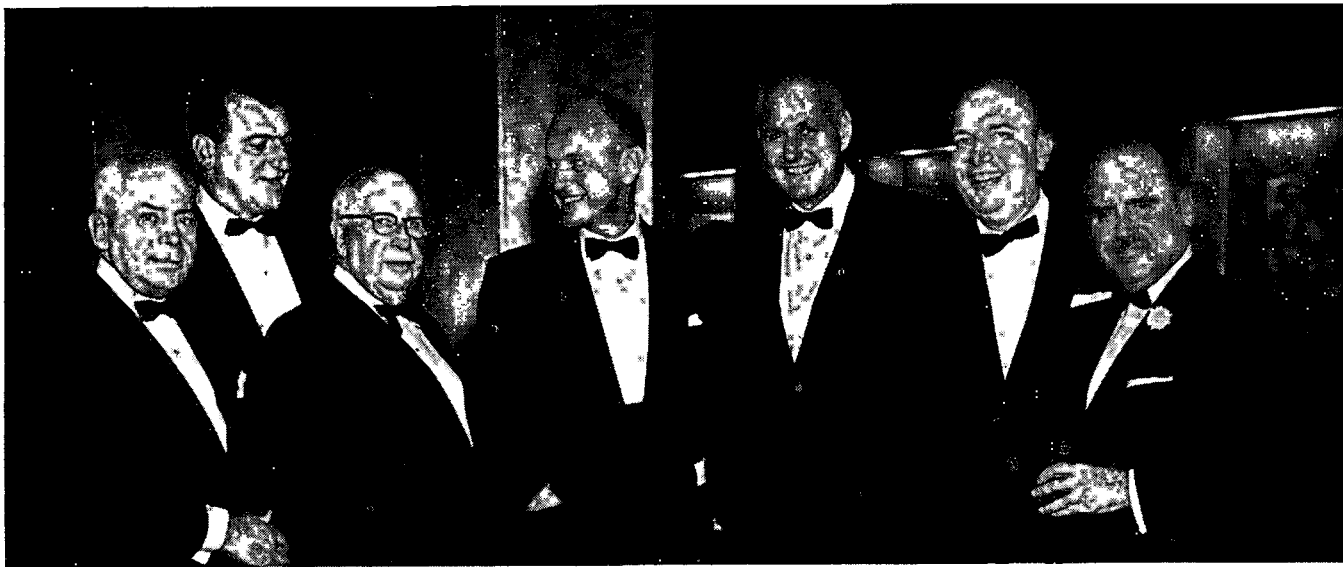

First annual dinner meeting of the Obstetrical and Gynecological Society of New York Medical College.

First Annual Dinner Meeting
Obstetrical and Gynecological Society
of the New York Medical College

As part of its program of expansion, the Society is attempting to locate all former residents of Flower and Fifth Avenue Hospitals and Metropolitan Hospital, and alumni of the College now practicing obstetrics and gynecology. Please write or telephone Dr. Alvin Donnenfeld, Secretary, at 106 East 78th Street, New York City.

From Left: Dr. John G. Mussio, Vice President, Dr. Myron Gordon, President, Dr. Leon S. Loizeau, Professor Emeritus, Dr. Allan C. Barnes, Guest Speaker, Dr. Martin L. Stone, Dr. Ralph E. Snyder and Dr. Carl C. Salzman.

Reunion In New York

Dr. Carl Salzman (right) joins in welcoming Hon. Robert Briscoe, the Jewish Mayor of Dublin, Ireland (center) on return visit to these shores. Joining in the welcome is Dr. Ralph E. Snyder, president and dean of New York Medical College, Flower and Fifth Avenue Hospitals. The mayor toured the institution at Dr. Salzman's invitation and was honored with the presentation of a replica of the college's seal. Dr. Salzman, who is president of the Alumni Association of New York Medical College, first met Mayor Briscoe three years ago in Ireland, when the Training Ship Empire State IV on which he was serving as surgeon at the Maritime College of the State University of New York, put in there.

BOOKS PRESENTED TO THE COLLEGE LIBRARY

Mr. and Mrs. Harry Dill Kinney have donated to the College Library a varied collection of classics and miscellany, totaling 165 volumes, some of which date back to the eighteen hundreds. The books, which include works of Balzac, Trollope, George Eliot, and Charlotte Brontë, are intended as recreational reading for students of the Medical College and the Nurses' College.

Mr. Kinney's father, the late Dr. Charles Spencer Kinney, was a graduate of New York Medical Col-

lege; Dr. Selden T. Kinney, Mr. Kinney's brother, is also a graduate of the College. (*see page 30*)

Another gift to the College Library was recently made by Dr. Saverio Bentivegna, instructor in surgery at the College. Dr. Bentivegna's gift consisted of a six volume set of Galen's works, published in Venice in 1576. The books are in Latin, translated from the Greek, and contain some beautiful illustrations done in black and white by D. Iacobù Boncompagnù.

CLASS NOTES

1920

William Greenwald has announced the removal of his office to the Park-Madison Professional Building, at 47 East 67th Street, New York 21, New York.

1921

Lilie Jedlica ~~Krepela~~ writes that after 40 years of active practice she has retired to Homestead, Florida, where the weather and living are idyllic."

1924

Anthony George Sabin has been placed on the retired list of the U. S. Army in the rank of lieutenant colonel.

1928

I. Macklin Kaplan, of Teaneck, New Jersey, published a paper entitled "The Cardiac Patient and Surgery: An Integrated Approach" in the September 1961 issue of *The Journal of The Medical Society of New Jersey*.

Stephen W. Lesko, of Wallington, New Jersey, has been elected president of the medical staff of St. Mary's Hospital. Dr. Lesko, formerly chief of the second service division, has been at St. Mary's since serving his internship there in 1928-1929.

1930

Saul A. Schwartz,
1882 Grand Concourse,
Bronx, New York

Henry K. Bobroff writes that he has "returned to work again with the Indians". He is now the medical officer in charge of the Laguna Health Center, U.S.P.H.S., Division of Indian Health, at Laguna, New Mexico.

1931

Harry Barowsky,
246 West End Avenue,
New York, New York

Edward R. Richter has been appointed to the medical staff of International Airport at Idlewild, Long Island, New York, as Orthopedic Consultant and Surgeon. Dr. Richter has removed his residence and office to 814 West Broadway, at Woodmere, New York.

1932

Leon Paris,
2685 Creston Avenue,
Bronx, New York

Walter P. Merkelbach was elected president of Montclair Community Hospital at Montclair, New Jersey.

Theodore Rothman, Clinical Professor of Psychiatry at the University of Southern California School of medicine, was elected secretary-treasurer of the newly formed American College of Neuropsychopharmacology. Dr. Rothman had previously acted as chairman of the Organizing Committee. He has been appointed, as well, the executive director of the Rush Research Foundation, a non-profit corporation whose aim is to promote psychiatric research on a permanent team basis. The foundation will be supported by private funds and sponsored by the University of Southern California Department of Psychiatry and the Cedars of Lebanon Hospital at Los Angeles.

1935

Roy E. Wallace,
32 Cayuga Street,
Seneca Falls, New York

Roy E. Wallace, class secretary, reports: "Joseph Kaufman is practicing in Newark, New Jersey, and has just been made president elect of the New York State Academy of General Practice. Congratulations from the class of '35, Joe. Herbert Schreier has resigned from the staff of the Willard State Hospital to accept a position as psychiatrist at Mary State Hospital, at Utica, New York".

Martin M. Fisher, Assistant Clinical Professor of Medicine at New York Medical College, addressed the seminar on Trauma and Peripheral Vascular Diseases at the Sheraton Astor Hotel in New York City on September 16, 1961. Dr. Fisher's subject was "Thrombophlebitis: Pulmonary Infarction and the Relation of Trauma".

1936

Anthony J. Maffia,
1123 Park Avenue,
New York 28, New York

Joseph D. Cuono was appointed clinical associate in surgery and assistant surgeon at New York Medical College and Flower Fifth Avenue Hospital. He was appointed as well to the Metropolitan Hospital Center as visiting surgeon. Dr. Cuono has been active in thoracic and traumatic surgery and also serves as medical advisor to Organon, Incorporated, of West Orange, New Jersey.

From Dallas, Texas, Reta Adams writes: "My 25th silver anniversary diploma finally caught up with me and I was very pleased with it. After spending seven years in India I did a residency in psychiatry; I passed the Board examinations and was put in charge of the Day Hospital and After Care Clinic at Camarillo. I plan to return to India in the near future."

1938

Lyman J. Sire,
901 Harrison Street,
Syracuse 10, New York

Edward Gendel has been elected a fellow of the Academy of Psychoanalysis. Dr. Gendel attended the World Mental Health Congress in Paris last summer.

1940

Samuel B. Moore has announced the opening of his office for the practice of psychiatry at 130 Forest Avenue, Glen Cove, New York.

1941

Henry P. Leis, Jr.,
2 East 55th Street,
New York 22, New York

Sidney L. Cramer has been elected councilor to the American College of Radiology of the State of Connecticut. Dr. Cramer has been elected as well to the board of directors of the Hartford County Medical Association.

1943

Howard B. Rasi,
139 Clinton Street,
Brooklyn, New York

John Bogacz has been named to the board of directors of the Whittier House Boys Club in Jersey City, New Jersey. Dr. Bogacz is on the surgical staff at Christ Hospital.

Adeline St. Martin reports: "Miriam Heller Stinkler is married to Dr. M. Bernard Stinkler, a neurosurgeon, and they are living with their three children in the Radburn section of Fairlawn, New Jersey. Miriam was a pediatrician but in January will re-open her office for the practice of psychiatry."

James V. McNulty has been elected vice-president of the Board of Medical Examiners of the State of California.

John Menustik, Jr. has been elected president of the Clinton County Medical Society for 1962-1963. Dr. Menustik has been practicing anesthesiology in Plattsburgh, New York, since 1950. He would be glad to hear from classmates.

Robert A. O'Conner was one of a panel of six heart specialists at a medical forum on heart disease sponsored by the Bergen County Heart Association, the Bergen County Medical Society and *The Record* (a daily newspaper), in Bergen County, New Jersey, on November 15, 1961. Dr. O'Conner spoke on rheumatic fever.

Elias R. Stoller, of New Rochelle, New York, moderated the second Tom Paine Forum of B'nai B'rith on November 1, 1961, at the Women's Club. Dr. Stoller, who is Associate Attending Gastroenterologist at Beth Israel Hospital in New York City, lives in New Rochelle with his wife and two children.

1944

George P. Potekhen writes that he has moved to 49 Hillcrest Road, Martinsville, New Jersey, and is now senior attending anesthesiologist at Muhlenberg Hospital in Plainfield, New Jersey. Dr. Potekhen is chief of the division for the coming year. "Still only 3 children: Bruce, 14; Tania, 12; George Jr., 10," he reports. He would like to hear from classmates.

William Schraft, Jr., President of the Westchester Unit of the American Cancer Society, presented the charter of the Peekskill Unit of the Society at their November 14th, 1961 meeting. Dr. Schraft, attending physician at Grasslands Hospital, is director of the laboratory at New Rochelle Hospital and associate director of the laboratory at Lawrence Hospital in Bronxville.

1945

Edward H. Mandel has had the following article published in the *Journal of The Mount Sinai Hospital*: "The Anticoagulant Properties of Chloroquine Dihydrochloride (Aralen^R), Hydroxychloroquine Sulfate (Plaquenil^R), and Quinine Dihydrochloride. Results of Tests in Vitro", Volume, XXXIX, Number 1, Jan.-Feb., 1962.

1946

C. Donald Kuntze has been chosen by the Civic Conference of Lenoia, New Jersey, to run for election to the Board of Education in February. Dr. Kuntze, who is Chief of Obstetrics and Gynecology at St. Mary's Hospital and Assistant Clinical Professor at New York Medical College, is interested in the young people of Leonia and currently has three children in the public schools.

1947

Herbert M. Eskwitt,
59 State Street,
Teaneck, New Jersey

Norman Mactas Ackerman spoke on "Psychiatry in Relation to Medical Practice" over Station WNYC on September 7, 1961, as part of the New York Medical Society program, "You and Your Health". On November 18, 1961, Dr. Ackerman addressed the American Association for Social Psychiatry at the Eastern Regional Meeting in New York City, on the subject of "Revolution and Rebellion".

1949

Myrton F. Beeler, of New Orleans, was elected to the Council on Clinical Chemistry of the American Society of Clinical Pathologists, in October, 1961, for a five year term.

James E. Bowes writes: "Moved back East from Salt Lake City to Portsmouth, Rhode Island where oldest son was accepted at Portsmouth Priory. Assisted Rhode Island Department of Health in mass polio immunization campaign during summer of 1960 and spring of 1961. Am now taking a fellowship at Yale in Public Health for a year, before reopening an OB-GYN office or going into clinical research. Was distressing to learn of Lew Murdock's death. He personally helped many of us through school."

1950

David Plotkin,
495 Merrick Road,
Massapequa, New York

Richard C. Reed, in collaboration with administrator Francis M. Coe, spoke on "Project 1961" of the New Jersey State Federation of Women's Clubs, at the monthly meeting of the Village Improvement Association on January 11, 1962. The project is an educational program aimed at saving the lives of newborn infants with congenital abnormalities through early detection of the defects. Dr. Reed is associate attending surgeon in the department of pediatric surgery at the babies unit at the United Hospital of Newark, and regional surgeon for the Essex Troop of the New Jersey National Guard.

James H. Spillane was accepted as a fellow of the American College of Surgeons at their Chicago meeting on October 5, 1961. Dr. Spillane is currently serving on the Traffic Safety Committee of the State Medical Society of New Jersey and is chairman of the Committee for Conservation of Speech and Hearing, also of the State Medical Society. Dr. and Mrs. Spillane live in Phillipsburg, New Jersey.

1951

Ray Foley writes that they have "moved into new home this past summer—seven miles 'up the mountain' from hospital and office. Our four boys enjoy feeding deer on the lawn now that the snow is driving them down."

Anafred N. Halpern, in collaboration with her husband, Dr. Seymour L. Halpern, conducted a study on the loss of weight with Metrecal as a means of controlling diabetes. Drs. Halpern presented the conclusions of their joint research to a meeting of the American Medical Association.

Paul Tucci has been appointed chief of urology at St. Joseph's Hospital in Yonkers. Dr. Tucci, who is also chief of urology at Harlem Hospital in New York City and instructor of urology at New York Medical College, lives in Tuckahoe, New York, with his wife, Berta, and children, John Paul, Brenda Jean and Andrea Paula.

1952

Victor Goldin,
171 West 79th Street,
New York, New York

Edward A. Talmage has been certified by the American Board of Anesthesiology and elected fellow in the American College of Chest Physicians.

1953

Robert S. Donnenfeld,
1 Joyce Road,
Hartsdale, New York

Peter J. T. Beeton, Senior Surgeon and Chief of the U.S. Public Health Service Outpatient Clinic in Mobile, Alabama, paid a nostalgic visit to the S.S. Alanson B. Houghton, the ship on which he had served seventeen years ago during World War II. Dr. Beeton had recognized the ship anchored among other inactive vessels in the Maritime Administration's Reserve Fleet while on a U.S. Coast Guard cruise up the Mobile River, and obtained permission to go aboard. A resident of Mobile since 1959, Dr. Beeton has two sons and a daughter, and a fourth child on the way.

Lloyd H. Berner has announced the relocation of his office at 1107 Park Avenue, New York 28, New York.

Joseph E. Davis was recently elected to fellowship in the New York Academy of Medicine.

Robert S. Donnenfeld was one of four writers of *Just Four Minutes*, a color and sound film on resuscitation for cardiac arrest made at Grassland Hospital and presented at one of the scientific sessions of the American Heart Association at Miami Beach during October, 1961.

J. W. Mills reports a third addition to his family, Susan Jane, born on Memorial Day, 1961. Dr. Mills adds that he saw Al Devins and his wife at the October Sectional OB-GYN College Meeting.

In July, 1961, Kenneth H. Reichardt joined the Alumni Association and contributed \$25.52 to the student loan fund. About his past and present activities, Dr. Reichardt writes: "After completing my internship, I was in private practice for four and half years in Yuma, Arizona, where I met and married my wife, Ladonna, who is a registered nurse. The old wanderlust got the best of me and I decided that I would be much happier practicing medicine in the Navy. I attended the Naval School of Aviation Medicine in Pensacola, Florida and was designated a flight surgeon in 1959. I have been stationed on Guam for the past two years and will return to the States in July, 1962, at which time I will begin a three year residency in aviation medicine."

Frederick C. Spurgeon has announced the opening of his office for the practice of ophthalmology at 27927 Deep Valley Drive, Palos Verdes Estates, California.

1954

Jean Krag Ritvo,
66 Wabanhill Road,
Chestnut Hill, Massachusetts

Sanford H. Anzel writes: "We are now stationed at U.S.-A.F. Hospital at Wiesbaden, A.P.O. 633, New York, N. Y. We are the Orthopedic Referral Center for Europe, Africa and the Near East, and our selection of cases is excellent. Had an article entitled 'Acromio-Clavicular Dislocations and Subluxations' published in the *Journal of Bone and Joint Surgery* in April, 1961."

From **Bruce M. Burtan**: "Rod Coler was East for a one month vacation. He was accompanied by his charming wife, Thelma (son, Clark, remained at home.) Had a wonderful visit and we brought each other up to date on the years since graduation. Rod is practicing internal medicine and cardiology in Kennewick, Washington (address 811 S. Auburn). Also learned from him that Harold Ellner moved to Kennewick from New York City to open his office for the practice of urology. Harold is fast becoming a westerner! As for myself, I have joined the department of radiology at Morristown Memorial Hospital, Morristown, New Jersey, as assistant director. We are now in the process of building a house in Brookside. Our daughter, Lynne Victoria, will be one year old in January."

Stanley Burrows has been appointed pathologist and director of laboratories at Newport Hospital in Rhode Island. Dr. Burrows was recently released from the Air Force after service at Keesler Air Force Hospital in Biloxi, Mississippi. Dr. Burrows is licensed by the Atomic Energy Commission for the use of radioisotopes. He and his wife, Gytel, have a daughter, Adria, two.

Herve M. Byron writes: "I would like to thank all the members of our class who contributed to the annual fund. The number of donors is increasing steadily every year. I was promoted to the rank of assistant clinical professor of ophthalmology by the director of the department, Dr. Benjamin Friedman. I am very proud to be research associate of Dr. G. Peter Halberg, under whose direction a gigantic glaucoma screening survey is being conducted at Metropolitan Hospital."

Harold Steinberg has announced his association with Dr. Paul Beres in the practice of internal medicine, at 143 Main Street, Westport, Connecticut.

1955

William A. Stevens,
310 Wedge Wood Terrace,
Syracuse, New York

W. Richard Anderson reports: "My wife, Sally, children (Barbara, Scott and Bari Jo) and I are enjoying the Florida sun coast in St. Petersburg. My association in obstetrics-gynecology has proven pleasant and profitable. We wish to extend an invitation to any visiting classmates to give us a call."

Claude Arnaud completed a residency in internal medicine at the Milwaukee County Hospital in July, 1961, and is now a fellow in metabolism (on an N. I. H. grant) at the University of Marquette Medical School.

Malcolm D. MacLean has been completing a fellowship in the department of proctologic surgery at Temple University Medical Center in Philadelphia. Dr. MacLean will move to Nassau County, Long Island, in January, 1962 to take up private practice in colon and rectal surgery.

Captain Gerald W. Parker, U.S.A.F. (M.C.), has completed a residency in internal medicine and is assigned to the gastroenterology service at the U.S.A.F. Hospital at Lackland Medical Center in Texas. He is co-author of an article

entitled "Cluster Headache", which appeared in the November 1961 issue of the *Archives of Internal Medicine*.

David F. Reese was awarded the degree of Master of Science in radiology from the University of Minnesota on December 14, 1961. Dr. Reese completed a residency in radiology at the Mayo Foundation in September, 1961, and since that time has been living in Mineola, Long Island.

Richard J. Smith reports that in June, 1962, he will have completed two years of active duty as chief of orthopedic surgery at the U. S. Public Health Service Hospital in Boston. He will then begin a year on fellowship in hand surgery, studying in Los Angeles and in England. Dr. Smith plans to return to New York on the completion of his fellowship.

Charles Stabinsky has announced the opening of his office for the practice of gynecology and obstetrics at 152 East Avenue, Norwalk, Connecticut.

James Trone reports: "Rosemary arrived on September 14, 1961, to make a threesome with brothers Jimmy and Danny. Their father is going to start residency in cardiology at the Naval Hospital at San Diego, California, in July, and mother is delighted at thoughts of a change of scenery."

1956

Stephen N. Rous,
300 16th Street, N.E.,
Rochester, Minnesota

Steve Rous, class secretary writes:

"**Marty Andersen** is now in his last one and a half years of neurosurgery residency at Grace-New Haven Hospital. Marty spent the past academic year at the Columbia-Presbyterian Medical Center (New York City) studying neurology.

"**Donald Bradley** is practicing anesthesia at the St. Francis Hospital in Miami Beach, Florida.

From Morristown, New Jersey, we learn that **Larry Norton** is in general practice and is affiliated with the Morristown General and All Souls Hospital. Larry served in the Air Force from 1957 to 1959.

"**Fred Wuest**, wife Pat, and all four children are at the Oakland, California Naval Hospital where Fred is a consultant in ophthalmology. Fred completed his residency in that speciality in July of 1960. He has already published two papers, one in the *American Journal of Ophthalmology* and one in the *Archives of Ophthalmology*.

"**Lew Sullivan** is with the Army in Landstuhl, Germany, as a consultant in OB-GYN. He writes that Ev Eaton is just over the border in Orléans, France, and they see each other often. Lew still plans to set up shop on the West Coast after his military discharge in the summer of 1962.

"The Philadelphia area continues to claim many of our class. **George Scheers** is in OB-GYN residency at Temple University Hospital. **Joe Fennelly** is finishing up his medical residency at the V. A. hospital and is still president of the local F.F.A.H. Alumni Chapter there. **Fred Cushmore** is also at the V. A. hospital and is training in radiology. Fred has two children now, Barbara and Janice. **Walter James Mack**, having finished his radiology training while on active duty

in the Navy, is now a consultant in radiology at the Philadelphia Naval Hospital. Walt has three children: Jimmy, Barbara and Tommy. **George Hare** and his lovely wife, Jo, are living in Camden, New Jersey, where George is on the staff of the Cooper Hospital practicing internal medicine and is also an instructor in same at Philadelphia's Jefferson Medical College. George has published an article in the *New Jersey State Medical Journal* on 'Staph Pneumonia'.

"**Gerry Holzwasser** is an associate radiologist at the Rochester General Hospital. He and his wife, Edith, have now got three children: Laura Jean, 5 years, Diana, 3 years and John, age 1½.

"**Tom Ryan** has completed his orthopedic training while on active duty with the Air Force, and is now a consultant in his specialty at the Air Force Hospital, Wright-Patterson A.F.B., at Dayton, Ohio.

"**Gil Sandler** is now practicing internal medicine in the Hempstead (New York) area and has hospital privileges at Nassau Hospital; Hempstead General; Mercy Hospital; Meadowbrook Hospital; Mid-Island Hospital; and Freeport Doctors Hospital. Wow! Sounds like he has a monopoly to me! Good luck, Gil. Now all you need is a wife!

"**Naomi Goldstein** is practicing as a clinical assistant in psychiatry at the Hillside Hospital in Long Island. She is also a staff consultant psychiatrist to the Court of Special Sessions of the City of New York.

"From Travis A.F.B., California, comes word that **Court-enay Headland** is assistant chief of radiology and chief of the radiotherapy section of the hospital. Court finished up his residency one and a half years ago at Denver's Presbyterian Hospital.

"**Bill Hart** is right back home in sunny California where he is completing a residency in internal medicine at the Los Angeles Veterans Hospital Medical Center. He writes that he sees **Ron Pion** and **Sandy Sherman** from time to time and that **Big Jim Woodburn** was out for a visit from his Ohio bailiwick and is actually thinking of moving West.

"Those prolific Providentians have 15 kids already. I refer of course, to **Jim Leach** (4), **Tom Martin** (2), **Doug Nisbet** (3), **Ed Maher** (3), and **Big Jim Hagerty** (3). Jim is now at the Bronx (New York) V. A. Hospital in radiology. Tom is in general practice in Pawtucket, Rhode Island. Doug is in OB-GYN residency at the Rhode Island Hospital. Eddie is in general practice in Warwick, R. I., and Big Jim is finishing up an OB-GYN residency at the Woman's Hospital in Detroit, Michigan.

"**Gene Harris** has completed his orthopedic training at Los Angeles County Hospital and is now practicing in Beverly Hills, California, with hospital privileges at U.C.L.A. Medical Center, Mount Sinai Hospital, Cedars of Lebanon, Temple, Midway, Westside, and Daniel Freeman Hospitals. Gene and Mimi have one son, Adam.

"**Art Hickey** was in the navy from 1956 to 1961, part of which time was spent in orthopedic training. He is now finishing up his training as a civilian at St. Joseph's Hospital in Patterson, New Jersey.

"**Ray Sabatini** is in general practice in the Bronx, at 2114 Glebe Avenue. He practices at Westchester Square, Parkchester General and Pelham Bay Hospitals. All very well, Ray, but you should get married too!

"The class pundit, **William Aloysius Liebler**, has now finished his orthopedic training and is in practice at 742 Park Avenue. He has operating privileges at Lenox Hill, St. Luke's and Polyclinic Hospitals. Bud has published two articles in the *Journal of Bone and Joint Surgery*.

"Practicing in the noble field of urology is **John Donoghue**, who is now a staff urologist at the St. Albans Naval Hospital where he completed his Navy residence. John and wife, Barbara, now have four little Donoghues.

"The private practice of OB-GYN has claimed **Stan Wegryn** to its ranks. Stan works at St. Elizabeth's Hospital in Elizabeth, New Jersey, and he is already the author of six published articles in his field.

"After four years at the Hartford Hospital, **Bert Hopkins** finally left Hartford because the Trinity football team was so bad. He is now practicing internal medicine in Ayer, Massachusetts—just a whisper away from Amherst where he can watch real quality football. Bert and his wife, Sara Elisabeth, have two children: Scott Edward and Rebecca.

"**Dick Green** has received an appointment as assistant in dermatology at the skin and cancer unit of the University Hospital in New York. He practices dermatology at 50 Park Avenue.

"**Dick Cook** is practicing out in Mastic, New York, on Long Island. He is in general practice and has privileges at Brookhaven Memorial and Bayview General Hospitals, in addition to being deputy medical examiner for Suffolk County.

"Witty, urbane **Clay Orvis** has settled in Elkins, West Virginia, where he is practicing OB-GYN. Clay is a member of the American College of Obstetricians and Gynecologists and also of the American Society of Abdominal Surgeons.

"**Joel Zisk** has two years left of a general surgery residency at Cedars of Lebanon Hospital in Los Angeles. Joel has published a paper on 'Regional Ileitis Complicated by Adenocarcinoma of the Ileum' in *Surgery*. June, 1960.

"**Joe Torruella** is in general surgery residency at the U. S. Public Health Service Hospital in San Francisco. Joe and Margie have four children.

"**Dave Stein** sends word that he is still on active duty in the Navy, serving at the Naval Hospital in Bethesda, Maryland. Dave is a member of the American Academy of Allergy and a member of the Academy's Committee on Foods.

"Boston's elite Peter Bent Brigham Hospital is where **Ed Madden** is now serving as chief resident in orthopedics. The last three years have seen Ed alternating between the Massachusetts General and the Children's Hospital Medical Center. Ed and Dorothy have four children.

"Now in general practice and working at the Glens Falls, New York, Hospital, is **Harry Luria**. Harry is also vice president of the Warren County branch of the American Academy of General Practice.

"Dotty Zucker-Franklin is now at Bellevue Hospital learning all there is to know about electron microscopy. She has so far co-authored a half dozen papers and is also co-author of a book (with Braunsteiner) entitled *Physiology and Pathology of Leukocytes*.

"Bob Lindon spent two years with the Army in Europe and has been at the Nassau Hospital (Long Island) since 1960 in orthopedic residency. Bob is one of the few remaining bachelors.

"Hank Tyszkowski is in general practice in Rumford, Rhode Island. He works at both St. Joseph's and Our Lady of Fatima Hospitals and is on the executive committee of the former. He is also president elect of the American Academy of General Practitioners in this county, as well as having been chairman of the Academy's annual dinner.

"Jim Mooney and Jim Doheny are associated in general practice in Derby, Connecticut. They have their patients at the Griffin Hospital and at St. Vincent's Hospital in Bridgeport. Jim Mooney is vice-president of his regional medical society and has had an article accepted on 'Porphyria and Pregnancy' for publication in the *Journal of Obstetrics and Gynecology*.

"Arno Hohn has completed his pediatric residency at the Buffalo Children's Hospital, served two years in the Air Force and is now taking some further training in Philadelphia. He has co-authored a paper in the *Journal of Pediatrics* on 'A Guide for Canulating Small Vessels.'

"Mel Van Woert, having completed three years of internal medicine training at the University of Chicago Clinics, is now putting it all to good use in Korea where he is serving in the Army.

"Don Belliveau is still at the Monmouth (New Jersey) Medical Center completing his training in orthopedics. Don and Medelyn have five children.

"Jim Tully completed his anesthesia training at the Hospital of the University of Pennsylvania and is now practicing at the Holy Name Hospital in Teaneck, New Jersey.

"A Christmas note from John Adams better half, Mickey, says that after six remaining months in the Navy the Emersons will go into private practice (ophthalmology) in Miami. Emersons, you had better be prepared for lots of winter visitors.

"Bill and Mary Ann Bradley also expect to get out of the Navy in July, and are looking for a location on the Eastern seaboard.

"Marty Rose, who had already taken part one of the general surgery boards, is now at the Brooklyn V. A. Hospital in thoracic surgery. His address is 9801 Shore Road, Brooklyn, New York.

"Dick and Olie Babcock, now sporting three youngsters, are in their second year of OB-GYN residency at County Hospital in Salt Lake City, Utah. Their address is 1255 Laird Avenue, Salt Lake City, 5.

"Joe Marcy is now practicing in partnership (radiology) in

Garden City, Long Island, and living there too. He is on the staff of the Mercy Hospital in Rockville Centre. He and beautiful Marianne enclosed a picture of their two handsome children and imply that a third one may not be far off!

"Sara Bond Arnaud is now a fellow in hematology at Marquette University Medical School after completing a pediatrics residency at Milwaukee Children's Hospital. Sara and Claude are living at W. 292 4024 South Hillside Road, Waukesha, Wisconsin.

"Classmates, I know this has been a lot of news, but it still touches less than half our class. Please, keep the letters coming and always send along new tidbits as they happen. Even if nobody else reads it, don't *you* love to see your name in print?"

1957

Joseph A. Intile, Jr.,
U.S. Army Hospital,
Fort Carson, Colorado

Joseph A. Intile, Jr., class secretary, writes:

"Our first exposure to medicine outside of formal teaching programs is proving very profitable. We have nine people on the medical service of which I am assistant chief. The basic training and the newly activated 5th Division make Fort Carson a busy place. However, extra-curricular activities haven't been completely overlooked. Fairly successful elk, deer and pheasant hunting, along with our newest fad, learning-to-ski, have absorbed all our available free time. Mel Van Woert, class of 1956, is on our medical service too. We've had a lot of fun together chasing after pheasants and even shooting at them once in a while.

"A case report and discussion concerning actinomycosis, which I co-authored at the end of residency, was recently accepted for publication by the *Journal of the American Medical Association* whose editorial board, to our pleasant surprise, requested that we write an editorial to go along with the paper.

"We were happy to receive Christmas cards from: Norris Culf, who was awarded a commendation medal for the fine job he did at Fort Lewis, Washington, prior to returning to civilian residency in Rochester, New York; the Thomas Hunts (Tom is in private practice in radiology); the Venard Kinneys at the Mayo Clinic; the Robert Littlejohns of Barberton, Ohio; the Thomas O'Connells and Thomas Mathews at El Paso, Texas and Denver, Colorado, respectively; the Richard Kenyons of Richmond, Virginia; and the Thomas Dyers at Flower Hospital.

"Richard Cobb is a resident in radiology at St. Raphael's Hospital in New Haven. He and Pat were expecting their fourth child at the time of their last note.

"Richard Snyder told us in a recent letter of his hair-raising experience on the open sea. William Scragg's next assignment will be at Fort Leavenworth, Kansas, which is, unfortunately, very little known for its excellent facilities.

"William McCully spent his Army time in France and is now a resident in internal medicine at Meadowbrook Hospital. They have four children.

"Audrey Demarest Hardin had a third son last August. Audrey is on the student health staff at Syracuse University.

"Timothy Brewer is in his second year as a special fellow in cardiovascular disease at the Cleveland Clinic. He is unsure about what he will do after July 1st. Three sons and a daughter may be influential in the Brewer plans.

"Richard Oberfield had an article entitled 'Lichen Sclerosus et Atrophicus and Kraurosis Vulvae: Are They the Same Disease?' published in the May 1961 issue of the A.M.A. *Archives of Dermatology*. To top this off, he was awarded a Mead Johnson Residency Scholarship for internal medicine by the American College of Physicians.

"Russel King, out of the Air Force, is in general practice in New Haven, Connecticut.

"We will be looking forward to seeing as many of the class as possible at the fifth anniversary reunion to be held on June 4th at the alumni banquet. Further details will follow."

1958

Charles D. McCullough,
St. Vincent's Hospital,
New York, New York

Robert J. Blankfein, who is in his second year of residency in neurology, is serving in neurology at Montfiore Hospital.

Arthur Ginsberg reports the birth of his first child, Ira Allan, a boy of 8 pounds 7 ounces, on September 25, 1961, at Fort Dix, New Jersey. Dr. Ginsberg has been in the Armed Forces since July, 1960, serving in Korea from August, 1960 to September, 1961.

Captain Edward V. H. Henry, who commands the 464th Tactical Hospital at Pope Air Force Base in North Carolina, was appointed to the Regular Air Force in November, 1961.

Howard Kline, a senior resident in medicine at the University of California Medical Service, San Francisco, will take a fellowship in cardiology with Dr. Charles K. Friedberg next year at Mount Sinai Hospital in New York City.

Edward S. Nicholls has begun general practice in Garden Grove, California. He has "two sons one two and one one."

Ed Parmer is completing a residency in radiology at the Bronx V. A. Hospital. He reports that "Dick Resnick finally married and is at Montifiore Hospital in psychiatry."

Louis N. Scotti was discharged from the Army in June, 1961. He now has two daughters, aged 2½ and 7 months, respectively.

1960

Frederick E. Siefert,
30 Brookside Drive,
Greenwich, Connecticut

Fred Siefert, class secretary writes:

"At this writing I'm still suffering the after-effects of a hung-over New Year's Day, so here goes with a hodge podge of items: received a card from Bill Flynn confirming that he is in service as a flight surgeon in Munich, Germany (address: 8th Transportation Bn., A.P.O. 29, New York, New

York). Herb Joseph sent word that he is a father (son, Michael, born in September, 1961) and is continuing as a surgical resident at the Hospital of Joint Diseases in New York City. He aims for orthopedics.

"Barbara and Al Rothenberg say they will welcome a call from any classmates in their new neighborhood, 19 Grace Court, Brooklyn Heights. And . . . congratulations to Stanley Ostern (still at Jewish Hospital, Brooklyn - medicine) on his marriage last September to Claire Rothenberg of Woodmere, Long Island.

"Got a long note from long lost Gene Sweeney. He is in the Navy, working with Destroyer Division 362 out of Norfolk, Virginia. Gene says he's engaged in Project Mercury working on the first man-shot. Following that he leaves for an extended European tour and returns to Norfolk in August, 1962, via Quebec and New York City. Then he hopes for a trip to the West Coast and Japan!

"Harvey Grant is also at Norfolk; Gene bumped into him there and says that Harvey is doing a year of general surgery and will do three years of ENT at Bethesda, Maryland.

"Belated wishes for a Happy New Year to all, and many thanks for the Christmas Greetings from Mary and Jack Tobin (still in the Navy, Jack?) Martie and Ed Gordon, Naida and Gil Ortiz, and Sheila and John Russell (what are you doing these days, John?).

"Floyd J. Donohue received his license from the State Board of Medical Examiners of New Jersey on October 6, 1961. Dr. Donahue will continue his studies at Bellevue Hospital in New York City.

"John C. Duffy was presented with \$500 as the grand award winner in the "In My Opinion" contest of 1960-1961, in *The New Physician*, the national journal of the Student American Medical Association. He reports the birth of his son, Charles Anthony, on August 29, 1961, at Lackland A. F. Hospital in San Antonio, Texas. At present Dr. Duffy is a flight surgeon attached to the 831st Tactical Air Command Hospital at George A.F.B. in Victorville, California.

"William Ehrenfeld is a resident in surgery at Beth Israel Hospital in New York City.

"Robert J. Fitzgerald is currently assigned to the U.S.N.S. "Upshur" of the Military Sea Transport Service and is making monthly runs to and from Europe.

"George W. Seuffert has been appointed a resident in internal medicine at the Mayo Foundation."

1961

Mrs. John G. Ketterer, Jr.
16980 Van Aken Boulevard
Saker Heights 20, Ohio

Judith Frank Ketterer, class secretary writes:

"Greetings to all from Cleveland. Depicted by devoted Ohioans as 'the best location in the nation', Lake Erie's answer to New York City is, at this writing, courageously dusting off old man winter's latest gift, while this member of the unforgettable class of 1961 is secretly dreaming of wonderful Hawaii.

"**Vincent Smith** writes that Hawaii is 'a real fun place'. He had seen **Chris and Nancy Kidder** at a native "Luau". They, too, are very happy. Sounds wonderful to this frost-bitten frau. **Vinnie** has applied for commission in the U.S. Navy requesting the Orient or the Mediterranean. **Norm Weiss** has also asked for Mediterranean shore or fleet duty. He claims 'Navy life is tops'. He may take a four month course in military psychiatry at Bethesda.

"**Charles McGuire** is planning to do a psychiatry residency in Connecticut Valley Hospital which is affiliated with Yale, and **Conrad Jacobs** has been accepted to the Institute of Living in Hartford. **Connie** writes that he and **Carol Odar** were married on June 11, and are enjoying married life.

"**George Lutz** is taking a medical residency at the Bronx V. A. and **Larry Cohen** will start a residency, also in internal medicine, at the V. A. hospital in Boston. **Tony Smith** has decided to spend a year in surgical pathology.

"Surgical residencies are on scheduled for **Dave Smith** at the Mayo Clinic, **John O'Reilly** and **Charles Morhardt** at Hartford General Hospital and **Kirk Kazarian** at St. Clare's Hospital, New York City.

"**Wilma Gladstone** will begin an OB-GYN residency in July at New York Hospital. Returning to Flower will be **Bernie Singer** in psychiatry, **Larry Mansbach**, **Barry Tichler**, **Bob Van Son**, and **Hank Saphier** in OB-GYN.

"Grapevine news indicates **Dom Pasquale** is very busy and happy in the Navy at St. Petersburg. West Palm Beach interns **Al Langhorne**, **Jim Henry**, **Mike Corbett**, **Jim** and **Pam Walker** are apparently very pleased at Good Samaritan Hospital. Have no news of their future plans.

"**Betty Muffett**, too, is happy at Byrn Mawr Hospital, undecided about practice, a fellowship or residency, perhaps in pathology.

"Unfortunately, the word from Mountainside Hospital via **Bob Glaßman** is that everyone is disappointed and dissatisfied with the internship. Class of '62 take note.

"Best wishes to **Karen Grimmell** and congratulations to **George O'Rourke** whose engagement was announced in a recent *New York Times*. **Bonnie** and **Pat O'Hara** are expecting their second child and **Stan** and **Susie Stein** have a new son, **Wayne**.

"**John** and I have thoroughly enjoyed our internship at the Cleveland Clinic. Plan to stay on in general surgery and pediatrics respectively. So, beautiful Cleveland, that 'best location in the nation', will be home for the next few years.

"As interns our class has traveled from Massachusetts to Hawaii, California to Florida. We look forward to hearing from all of you, of your families, your future plans for residencies, service and practice. Good luck to all.
Judy"

OBITUARIES

William John Davis, 1918. Died on July 26, 1961, at East Orange, New Jersey. He had served as the school physician at New York Medical College and was an emeritus member of the East Orange General Hospital.

Isidore Frank Fishman, 1928. Died on January 3, 1962, at New York City. He was born in Russia and came to this country as a boy. He attended Fordham and Columbia Universities, was an associate clinical professor at New York Medical College, a full attending ophthalmologist at Flower Fifth Avenue Hospital and the Bird S. Coler Hospital. Dr. Fishman was well known in clinical research ophthalmology; he devoted many hours to the teaching of students at the College.

Harry Anthony DiBlanda, 1932. Died on July 23, 1961, at Norwalk, Connecticut. He was a veteran of World War II and had served as town health officer in Weston, Connecticut. He had been associated with Norwalk Hospital.

Francis Patrick O'Meara, 1936. Died on December 8, 1961, at Boston, Massachusetts. He was awarded four battle stars for his military service in World War II.

Solomon L. Zimmerman, 1937. Died on December 8, 1961, at Columbia, South Carolina. Dr. Zimmerman was Chief of medical services of the Veterans Administration Hospital at Columbia, South Carolina. He was graduated from New York University in 1933 and had served in the Army during World War II and in Korea; he had attained the rank of lieutenant colonel.

Preliminary report on hypnosis as an anesthetic agent in electroconvulsive therapy with succinylcholine.
J. Neuropsychiat. 2: 178-182, March-April 1961.

DEPARTMENT OF SURGERY

- Ariel, I. M.
Malignant melanoma of the vagina. Report of a successfully treated case.
Obstet. Gynec. (N. Y.) 17: 222-228, February 1961.
- ✓Fox, C. L. and Lasker, S. E.
Response to fluid therapy and tissue electrolyte changes in scalded and flash burned monkeys.
Surk. Gynec. Obstet. 112: 274, March 1961.
- Glasser, S. T.
Recognition and treatment of peripheral vascular disease.
J. Med. Ass'n. Alabama 30: 1-7, March 1961.
- Heimlich, H. J.
Replacement of the entire esophagus for malignant or benign stenosis.
Amer. J. Gastroent. 35: 311, April 1961.

- Heimlich, H. J. and Gitlitz, G. F.
 --Bile duct reconstruction with a gastric pedicle tube.
 Arch. Surg. 82: 755-763, May 1961.
- Leis, H. P., Jr.
 Significance and treatment of nipple discharge.
 J. Int. Coll. Surg. 35: 47-54, January 1961.
- Madden, R. E. and Burk, D.
 Production of viable single cell suspensions from solid tumors.
 Proc. Amer. Assn. for Cancer Research 3: 247, March 1961
- Madden, J. L. and McCann, W. J.
 Reconstruction of the common bile duct by end-to-end anastomosis without the use of an internal splint or stent support.
 Surg. Gynec. Obstet. 112: 305-314, March 1961.
- Pack, G. T. and Davis, J.
 Nevus giganticus pigmentosus with malignant transformation.
 Surgery 49: 347, March 1961.
- Rockey, E. E., Blazsik, C. F., Thompson, S. A. and Virabutr, S.
 Four and one-half years' experience in the treatment of emphysema and other insufficiencies by tracheal fenestration.
 Dis. Chest 39: 1-12, February 1961.
