Center for Disaster Medicine

Information Brief

Tuesday, August 30, 2022

As the COVID-19 pandemic continues to evolve, we are seeing other emerging public health threats/emergencies and we continue to address ongoing/emerging disaster issues, the Center for Disaster Medicine has been and will continue to be a source of reliable information, education and models for mitigation, preparedness, response, and recovery. As such we have expanded this informational document to address the broader areas addressed by the center while retaining critical COVID19 information. As the pace of new information and changes occur, we will evaluate the current once per week to determine if this information should be provided on a more frequent basis

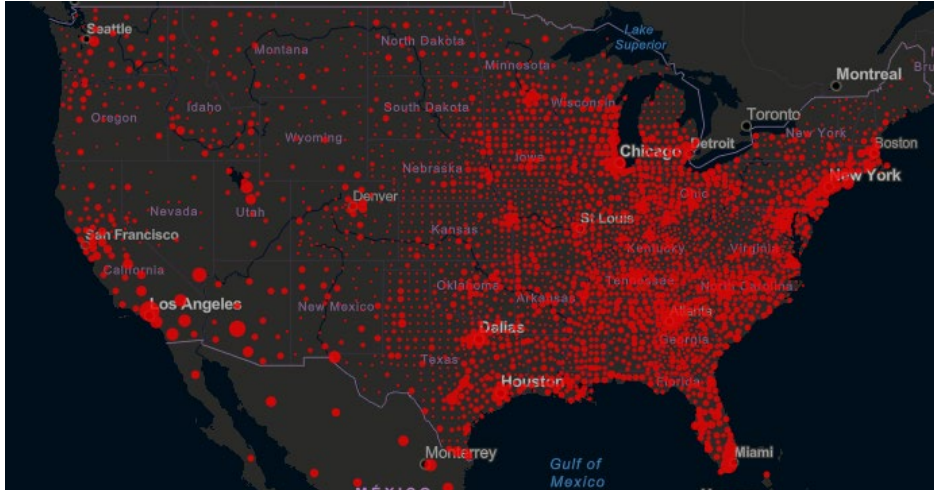

David Markenson, M.D., M.B.A.
Director
Center for Disaster Medicine

COVID-19 Statistics

	Total Cases	Total Deaths	Total Vaccine Doses Admin.
Worldwide	601,665,279	6,488,926	12,133,162,192
United States	94,283,777	1,044,355	604,656,326
New Jersey	2,673,004	34,532	18,072,396
New York	5,980,715	71,051	40,978,821
Connecticut	873,420	11,197	8,025,449

United States COVID-19 Case Map / GIS

Center for Disaster Medicine Updates

- Coordinating and overseeing COVID-19 screenings at NYMC campus.
- Continue to partner with local organizations such as Westchester Department of Emergency Services and Westchester Medical Center to ensure ongoing collaboration with all public safety agencies.
- Coordinating volunteers to support local public health response to COVID-19.
- Conducting research and analysis of current events and COVID-19 response to identify strengths and areas for improvement in other regions.
- Updating and developing new programs to provide enhanced education on public health emergencies including pandemics.
- Exploring course development opportunities in infection prevention and control for frontline responders in the hospital and in the field.
- Serving as a source of information for COVID-19 related concerns or questions regarding public health, emergency medical service (EMS), public safety and healthcare response.
- Local networking and pandemic response analysis for New York's tri-state area, using first-person experiences to highlight current trends.
- On August 28, 2022, staff from the Center for Disaster Medicine conducted a special training on Incident Command System, Emergency Management and Personal Preparedness for all Principals and Assistant Principals of the Yonkers School District. Such training highlights the importance of raising awareness and knowledge for any emergency or disaster.

The White House

On August 26, 2022, the White House Monkeypox Response Team and Public Health Officials provided a press briefing regarding monkeypox. Bob Fenton, the White House Monkeypox Response Coordinator, Secretary Becerra, Assistant Secretary O'Connell, and Dr. Walensky provided a brief update and shared some key announcements from the Biden administration's whole-of-government response to the monkeypox outbreak. <https://www.whitehouse.gov/briefing-room/press-briefings/2022/08/26/press-briefing-by-white-house-monkeypox-response-team-and-public-health-officials-3/>

On August 25, 2022, the White House provided a readout of Meeting with Colleges and Universities on Monkeypox and COVID-19 Guidance for a Safe Return to Campus- members of the White House Monkeypox and COVID-19 response teams, as well as representatives from the CDC, met virtually with college presidents, campus health officials, and student affairs

professionals from across the country to discuss best practices and measures for colleges and universities to take to curb the spread of Monkeypox and COVID-19. The virtual meeting included more than 1,000 stakeholders from the higher education community, with additional participation via livestream.

<https://www.whitehouse.gov/briefing-room/statements-releases/2022/08/25/readout-of-meeting-with-colleges-and-universities-on-monkeypox-and-covid-19-guidance-for-a-safe-return-to-campus/>

The official website of the White House delivers updated information as the country grapples with converging crises. This will include actions to control current public health threats, provide economic relief, tackle climate change, and advance racial equity and civil rights, as well as immediate actions to reform our immigration system and restore America's standing in the world. This website will provide all information in one central location. <https://www.whitehouse.gov>

COVID-19 Website

On March 30, 2022, Biden Administration Launched COVID.gov, a New One-Stop Shop Website for Vaccines, Tests, Treatments, Masks, and the Latest COVID-19 Information- a new website was launched in an effort to consolidate information for consumers.

<https://www.whitehouse.gov/briefing-room/statements-releases/2022/03/30/fact-sheet-biden-administration-launches-covid-gov-a-new-one-stop-shop-website-for-vaccines-tests-treatments-masks-and-the-latest-covid-19-information/>

Health and Human Services (HHS)

On August 29, 2022, HHS Funds U.S.-Based Production of Smallpox and Monkeypox Vaccine- The U.S. Department of Health and Human Services (HHS) will provide approximately \$11 million to support the first U.S.-based fill and finish manufacturing of JYNNEOS – a vaccine approved to prevent smallpox and monkeypox – at Grand River Aseptic Manufacturing (GRAM) in Grand Rapids, Michigan.

National Institutes of Health (NIH)

View the latest COVID-19 information from NIH.

<https://www.nih.gov/coronavirus>

Centers for Disease Control and Prevention (CDC)

Monkeypox is a rare disease caused by infection with the monkeypox virus.

Monkeypox virus is part of the same family of viruses as variola virus, the virus that causes smallpox. Monkeypox symptoms are like smallpox symptoms, but milder, and monkeypox is rarely fatal. Monkeypox is not related to chickenpox.

For the latest CDC information including symptoms, testing, vaccines and prevention regarding monkeypox, please visit

<https://www.cdc.gov/poxvirus/monkeypox/>

According to the CDC, as of August 29, 2022, there are 18,101 cases in the United States. For the latest monkeypox cases in the United States, please visit:

<https://www.cdc.gov/poxvirus/monkeypox/response/2022/us-map.html>

According to the CDC, as of August 29, 2022, there are 48,844 cases in the world.

For the latest global monkeypox cases, please visit:

<https://www.cdc.gov/poxvirus/monkeypox/response/2022/world-map.html>

As of August 26, 2022, the CDC updated the Monkeypox Toolkit for Event Organizers-

<https://www.cdc.gov/poxvirus/monkeypox/resources/toolkits/organizer.html>

As of August 24, 2022, the CDC updated the monkeypox section regarding the latest information on signs and symptoms, vaccines, prevention, sexual health, cases and data.

<https://www.cdc.gov/poxvirus/monkeypox/index.html>

On August 24, 2022, the CDC provided updated guidance on Novavax COVID-19, Adjuvanted Vaccine: Overview and Safety

<https://www.cdc.gov/coronavirus/2019-ncov/vaccines/novavax.html>

CDC provides updated information about the variants in the United States- The emerging variants CDC is closely monitoring have mutations in the virus genome that

alter the characteristics and cause the virus to act differently in ways that are significant to public health (e.g., causes more severe disease, spreads more easily between humans, requires different treatments, changes the effectiveness of current vaccines). It's important to understand that genetic mutations are expected, and some variants can spread and become predominant while others subside.
<https://www.cdc.gov/coronavirus/2019-ncov/transmission/variant-cases.html>

CDC provides daily data tracker which has maps and charts tracking cases, deaths, and trends of COVID-19 in the United States- updated daily by 8 p.m. ET.
<https://covid.cdc.gov/covid-data-tracker/#datatracker-home>

For the latest CDC information
<https://www.cdc.gov/coronavirus/2019-ncov/cases-updates/index.html>

United States Food and Drug Administration (FDA)

As of August 26, 2022, 439 tests and sample collection devices are authorized by the FDA under emergency use authorizations (EUAs). These include 302 molecular tests and sample collection devices, 85 antibody and other immune response tests, 51 antigen tests, and 1 diagnostic breath test. There are 78 molecular authorizations and 1 antibody authorization that can be used with home-collected samples. There is 1 EUA for a molecular prescription at-home test, 2 EUAs for antigen prescription at-home tests, 19 EUAs for antigen over-the-counter (OTC) at-home tests, and 3 for molecular OTC at-home tests. The FDA has authorized 31 antigen tests and 8 molecular tests for serial screening programs. The FDA has also authorized 1100 revisions to EUA authorizations.
<https://www.fda.gov/news-events/press-announcements/fda-roundup-august-26-2022>

On August 26, 2022, the FDA removed N95 Respirators from Medical Device Shortage List, Signaling Sufficient Supply- the U.S. Food and Drug Administration announced the removal of N95 respirators from the agency's medical device shortage list, signaling that demand or projected demand for this type of face protection device commonly used in health care settings no longer exceeds the supply. This action is the result of increased domestic manufacturing of N95 respirators, as well as updates to the FDA's supply chain assessment based on engagement with industry and federal stakeholders, and the Centers for Disease Control and Prevention's National Institute for Occupational Safety and Health's (NIOSH) approval of new disposable N95s and reusable respirators.
<https://www.fda.gov/news-events/press-announcements/fda-removes-n95-respirators-medical-device-shortage-list-signaling-sufficient-supply>

The FDA created a specific monkeypox response page which serves as a central source of information regarding diagnostics, vaccines, and therapeutics. For the latest FDA information regarding monkeypox, please visit
<https://www.fda.gov/emergency-preparedness-and-response/mcm-issues/fda-monkeypox-response>

For the latest overall FDA information about COVID-19.

Vaccines

In this section, vaccine-related information from various sources will be collected, reviewed, and tabulated here. As of July 19, 2022, the FDA has granted Emergency Use Authorization (EUA) to Janssen/Johnson & Johnson for adults over 18 years and Novavax for adults over 18 years of age and EUA for Moderna and Pfizer for children 6 months to five years. On August 26, 2022, the FDA authorized the emergency use of Novavax COVID-19 Vaccine, Adjuvanted for the prevention of Coronavirus Disease 2019 (COVID-19) caused by severe acute respiratory syndrome coronavirus 2 (SARS-CoV-2) in individuals 12 through 17 years of age. This authorization follows a rigorous analysis and evaluation of the safety and effectiveness data conducted by the FDA. On August 23, 2021, the FDA granted full approval to Pfizer for adults. On January 31, 2022, the FDA granted full approval to Moderna for adults. Now with two vaccines with full FDA approval and three vaccines with EUA for adults and children, the goal is to vaccinate a larger number of persons in the coming months throughout the United States. As additional vaccines are granted EUA, information for those vaccines will also be included.

CDC created this section regarding COVID-19 vaccinations in the United States- CDC provides overall U.S. COVID-19 Vaccine, deliveries and administration, maps, charts, and data updated daily by 8 p.m. This section represents all vaccine partners including jurisdictional partner clinics, retail pharmacies, long-term care facilities, Federal Emergency Management Agency and Health Resources and Services Administration partner sites, and federal entity facilities.

https://covid.cdc.gov/covid-data-tracker/#vaccinations_vacc-total-admin-rate-total

The NYS DOH COVID-19 Vaccine Tracker Dashboard will update New Yorkers on the distribution of the vaccine including the number of doses received by the state, a breakdown of first or second doses, and the number of persons vaccinated with the first and second doses in each region.

<https://covid19vaccine.health.ny.gov/covid-19-vaccine-tracker>

The NYS DOH provides updated monkeypox information regarding signs and symptoms, cases, vaccine, treatment and prevention at

<https://health.ny.gov/diseases/communicable/zoonoses/monkeypox/>

CDC created this section regarding the Johnson & Johnson's Janssen vaccine to provide updated relevant information including side effects and safety data, clinical trials demographic statistics, and information on how the vaccine works.

<https://www.cdc.gov/coronavirus/2019-ncov/vaccines/different-vaccines/janssen.html>

CDC created this section regarding the Moderna vaccine to provide updated relevant information including side effects and safety data, clinical trials demographic statistics, and information on how the vaccine works. As of January 31, 2022, the fully FDA approved Moderna vaccine will now be known as SPIKEVAX for ages 6 months and older.

<https://www.cdc.gov/coronavirus/2019-ncov/vaccines/different-vaccines/Moderna.html>

CDC created this section regarding the Pfizer BioNTech vaccine to provide updated relevant information including side effects and safety data, clinical trials demographic statistics, and information on how the vaccine works. As of October 16, 2021, the fully FDA approved Pfizer vaccine will now be known as COMIRNATY for ages 6 months and older.

<https://www.cdc.gov/coronavirus/2019-ncov/vaccines/different-vaccines/Pfizer-BioNTech.html>

HHS created this section to provide the latest information about COVID-19 vaccines.

<https://www.hhs.gov/coronavirus/covid-19-vaccines/index.html>

Educational Institution Information

- Higher Education
 - As of August 29, 2022, COVID-19 masking policies for fall are all over the place. Disability advocates worry about what it all means for diversity and inclusion, though the University of Pittsburgh has negotiated a new way to accommodate high-risk faculty members.
<https://www.insidehighered.com/news/2022/08/29/covid-19-masking-policies-fall-are-all-over-place>
- K-12
 - On August 26, 2022, 14percent of parents with children under the age of 5 said their child received a COVID-19 vaccine, according to a recent Gallup poll. This finding comes about two months after the U.S. Food and Drug Administration authorized the vaccine for emergency use for this group of young children. Read more at <https://www.k12dive.com/news/poll-just-14-of-parents-with-children-under-5-say-their-child-got-a-covid/630620/>
 - On August 24, 2022- Homeless student funding expanded during the pandemic. Will it be sustained? When Congress passed the American Rescue Plan in 2021 with \$800 million earmarked for the Homeless Children and Youth program, it was the most one-time federal funding homeless students and their families, advocates and liaisons had ever been promised. Up to that point, although hundreds of thousands of homeless students dropped off the grid during the pandemic or bounced from one temporary shelter to another, surveys showed billions of dollars in pandemic federal aid had barely reached these learners. Read more at <https://www.k12dive.com/news/homeless-student-funding-expanded-during-the-pandemic-will-it-be-sustained/630393/>

State Updates

New York

- On August 26, 2022, Governor Hochul announced that the New York State Department of Labor will provide a report analyzing the impact of the COVID-19 pandemic on women in the workplace with a particular focus on the multi-layered gender wage gap. This report will build on the findings of the 2018 Gender Wage Gap report, co-chaired by Governor Hochul and NYSDOL Commissioner Roberta Reardon, which included a number of policy and programmatic recommendations to close the wage gap. <https://www.governor.ny.gov/news/governor-hochul-commissions-new-report-women-workplace-honor-womens-equality-day>

New York State Department of Health (DOH)

On August 29, 2022, Governor Hochul updated New Yorkers on the state's progress combating COVID-19. "As we continue to prepare for any potential future surges, use the tools that help protect against and treat COVID-19," Governor Hochul said. "The vaccine and booster are the best tools we have to keep COVID-19 at bay. I encourage those who are not up to date on their vaccine and booster doses to get caught up immediately. Take a test if you feel unwell and if you do test positive, talk to your doctor about potential treatment."

As of August 29, 2022, there are 3,197 cases of monkeypox in New York State. For the latest monkeypox information including vaccines and provider information from NYS DOH, please visit:

<https://www.health.ny.gov/diseases/communicable/zoonoses/monkeypox/>

New Jersey

- On August 26, 2022- "With the start of the new school year right around the corner, this is welcome news for New Jersey parents," said Governor Phil Murphy. "Novavax offers another safe and effective option to help protect adolescents against COVID-19 as they prepare to return to their classes. I encourage everyone to stay up to date on both their COVID-19 vaccine doses and any other recommended vaccines that they may need going into the fall." <https://www.state.nj.us/governor/news/news/562022/approved/20220826c.shtml>

Connecticut

- Governor Lamont Provided Update on Connecticut's Coronavirus Response Efforts- The Connecticut Department of Public Health is reporting that as of August 24, 2022, a total of 269,737 cases of COVID-19 among fully vaccinated persons in Connecticut have been identified. Those cases account for 9.81% of the more than 2.7 million people in the state who are fully vaccinated. <https://portal.ct.gov/Office-of-the-Governor/News/Press-Releases/2022/08-2022/Governor-Lamont-Coronavirus-Update-August-25>

Local Updates

New York Blood Center (NYBC)

As of August 29, 2022, Westchester County has 80 cases of monkeypox.

Monkeypox Vaccine Clinics on Mondays and Wednesdays at 134 Court Street, White Plains. Appointments are required. People at higher risk for monkeypox infection may consider vaccination with the two-dose JYNNEOS vaccine. In accordance with CDC guidance, this includes those who:

- Had contact with someone who had a rash that looks like monkeypox or with someone who was diagnosed with confirmed or probable monkeypox
- Had skin-to-skin contact with someone in a social network experiencing monkeypox activity; this includes men who have sex with men who meet partners through an online website, digital application ("app"), or social event such as at a bar or party
- Traveled outside the United States to a country with confirmed cases of monkeypox or where monkeypox activity has been ongoing

Monkeypox Vaccine appointments are also available at:

- Westchester Medical Center, 15 Oval Connector, Valhalla, NY 10595
Monday through Friday from 9 am - 5 pm, appointment required.
Call (914) 326-2060 to schedule an appointment.
